PREFACE

*“Who doesn't know what looks for,
Doesn't understand what founds”*

Since unmemorable times the man has tried to look for a being that it denominated GOD. In the humanity's history, few have found it, and a great part has been lost in the road.

In this chapter we want to emphasize in three fundamental points that you: friendly reader, should necessarily meditate to understand this book.

The first corresponds to an internal interrogation, the question is: Do I want to look for to God?, second: For what reason do I want to look for God?, third: Which is the God that I look for?.

All created beings, for nature, looks for their origin, is a fundamental impulse, as well to eat, to sleep, Etc. We all know that our physical origin is given for a person called Mother and another called Father. But in spite of this, many people feel in the intimate of their being, that their origin goes beyond of the physical thing, that is to say, Metaphysician, spiritual, etc. That origin, its called **God**. Not I will enter to the impossible mission of wanting to define what God it is, or who He is. I will limit myself to say **GOD EXISTS** and it is not an illusion of our minds as some psychologists and psychiatrists have wanted to define.

That constant impulse in the humanity of looking for this Supreme Being has its logical reasons. We feel empty, **only and defenseless**.

In spite of having the best terrestrial parents, comforts, children, spouse, we continuous feeling that we lack something, that something, that we sometimes call **happiness**, that contemplative state before the same nature of life. In the history of this world only those that have been able to find God have been able to achieve the absolute happiness, or **nirvanic** state, examples we have in **Jesús the Christ, Buddha, Krishna**, these beings that always wanted to offer that internal happiness to the humanity in spite of all

Blue Book: The Path to initiation

the circumstances. The problem consisted in that we didn't look for that spiritual happiness but the earthly one, perhaps.

Our problem reside then, in knowing what we really want to look for, in What God we look for, that it is the key question dear reader, define what it is that you look for and this way won't lose your time.

We realize for history, the type of God that the humanity has projected: The omnipotent, tyrannical, punishing God that breaks his own laws? A quantity of human characteristics, typical of the human beings. We forget that God is not human; it is more of what we can imagine, because **HE is perfection**. Here is our problem then, that we are **not perfect** and we don't even look for perfection, How will we be able to understand God and their things if we are imperfect?. The beings mentioned before as **Jesus** achieved the perfection and then were rewarded with the spiritual happiness of becoming unified with God. Because they completed their mission in this world, that is to transcend the matter, to be perfected, to be able to acquire that communication with their **Creator**. And this way God through them teaches us the path to reach **HIM**.

What I mean then, dear reader that only if you become purified and perfected will be able to reach the *Celestial Father*. This is a **Celestial Law**, this Law you cannot violate, not even the *Creative Father*, because **Him as a perfect being gives example**. So if you aspire to fin God outside of the purification and the perfection of yourself (In other terms: The spiritual evolution) **will lose your time**.

The human being has learn this, like one says, for bad ways. That is to say, through **pain**, for example: Mrs. M. she was a nurse that was always in bad humor, rude, didn't greet anybody, practically works for economic more than humanitarian ends. 15 years after being professional, when suddenly suffered a cerebral stroke that took her on the edge of death. For what she was hospitalized near one month. A lot of people that knew it, said that was a punishment of God for her behavior with people. Thanks to heaven the woman recovered, although in a state of partial amnesia, but the most surprising thing is that its behavior with the fellow men improved drastically, now greets everybody, is affectionate and people are beginning to like her. Then, I wouldnt say that what happened to her was a **punishment of God**,

Blue Book: The Path to initiation

but a **gift**, since that event allowed her **to evolve spiritually** that is the most important thing. I dare to say that, that period of time was the most important in her existence and that the rest is really a lost time, because at the end, I repeat, what is worth is the spiritual evolution.

This book will allow us to learn for the for a benevolent way, because it indicates simple forms to become purified and to be perfected. We should keep in mind that this is will not occur from a moment to other, and the essential thing, is at least to begin.

An important aspect is that people through their actions and form of thinking are defending its God. If you have passed all your life saying lies, although they are compassionate, your God is a liar (Because you adore him, you believe in it). **Since each one search to imitate to their internal God.** And this way, if you are a promiscuous one, a thief, an envious one, a destroyer, bitter, alcoholic, vicious, Etc.

Its common among people to find that in spite of knowing that God is perfect, they carry out unbecoming actions as abortion, hatred, deceiveness, and they wait even that asking for forgiveness at the moment and later on continues in sin, it will take them to spiritual realization, something totally absurd. The things don't come for chance, it is necessary to have an conscience attitude toward what is looked for.

The same thing that to graduate from any profession, you need to be conscience of study and to apply what you learn. The same thing happens to the spiritual path.

For the honor that the sacred truth possess, if you know and believe that God is perfect, imitate him and that God it will be manifested in you, In thyself.

The other vital point, is that the orientations given in this book are **not human (extracted of the mental thought)**. These teachings have received them directly from spiritual **beings** that are **not** of this materialistic world. And

Blue Book: The Path to initiation

that obviously we have adapted them to the ordinary language so that even a child can understand them. For me, this is vital, because in the humanity's history, the supposed leaders have made many errors; they have distorted the celestial messages. Here the messages are given, such as we receive them. And this is easy to verify, only reading one of their messages transcribed faithfully, since they are 100% spiritual.

We want to share it , because we want to help you. Since for these times, **it is the water to drink in the desert that shall not be wasted.**

INTRODUCTION

**“Do not be as the wind
before the straw, neither
the straw before the wind ”**

When we are in the final of the XX Century, the Snake is bitten its tail and closes a cycle, all the occult, those enigmas that have invaded our psyche during centuries, for these final times they will be unveiled. It comes to the light the clarified wisdom of the Fifth Sun and we are their children, drink in the overflowing fountains of the human and divine wisdom; the bandage of the ignorance that has hidden the sacred truth, falls from our eyes, like will also fall from the eyes of all that that drinks in this majestic flow. Well it is known that the life of this world called **Earth** has been, it is and it will be guided for enigmatic threads coming from the different dimensions of the nature.

Thanks to this unveiled knowledge, we have ended up checking that each one of us is a human soul that has been envoyed to the earth from their Divine Soul, the one that is made to **image and likeness** of the *Creative Father*, that is to say that to call ourselves *children* of God, the Divine Soul must be latent in us, otherwise we will have to lean before the apostle's Paul prayer when he tells us: “We are adoptive children of God”.

Study this book, study it with patience and you will see that slowly be embodying it; it is this way the spirit works, as imitatus of the external nature, as the plants slowly are born, they grow, they are developed, and they give their flowers, while the peasant, with wise patient, waits the crop. The sower doesn't despair, he patiently analyzes the development of its plants, he knows that in its moment will give fruits, and we also know that in its moment we will achieve **Cristificación**.

When writing these lines we know that these they will arrive at the hands of somebody that after reading through it, throw it to a side, considering it not very fundamental, but we also write these pages, to be sure that the book doesn't have the blame of that lamentable action, as well as we are sure that it will arrive at the hands of that only with studying the introits, will understand the meaning of these lines.

Blue Book: The Path to initiation

More than ten years investigating the enigmas and mysteries that have disturbed us and that it took us to different religious schools, metaphysicians, occult and endotéricos, Etc. It allows us to write these messages, transcribing them, the orientations that we receive in our time and that now in your time you receive.

Friendly reader, the objective purpose when writing this book is to mark the margin for the conquest of the **ADEPT**. This reconquest of the **AKASHIK world**, lifts true men, transcendental souls, because truly the current **temples, churches** only have the material robe, with the symbols, the beliefs, the dogmas, and those that like to ritualize make it mechanically, because for these times the faith has caught a cold.

As much the transcendental sciences as the religion have lost their potential and they have lost that majestic fluency that they had in their origin. The history registers; that the old schools sprouted and suitable thinkers got up, leaders, **teachers** of the high spirituality and that it is necessary to keep in mind that for those times the humanity was less; for these times it should arise a **TEACHER or GURU** at least for each million of inhabitants, but is not this way, that is to say that in this country (Colombia), with near 36 million inhabitants, they would have to exist at least 30 true and suitable Teachers of the Great Fraternity, incarnated continually to guide us well.

We have kept the writings of the old ones of the church of the Middle Ages that in their times was pioneer in lifting souls and Christifying men. Today they have lost these sublime values completely. This because their leaders have been identified with other activities that anything has to do with the ritualización.

But more lamentable it is the decadence from the occult schools to world level that have lost the true guide of the esoteric; they have allowed the antagonism in itself, that primitive esoteric, today it shines for their absence.

Tarot, for example, Unveild for **the Universal** Fraternity to investigate the mysteries of the life and the mysteries of the death, today it is only used like game of cards and other opprtunist use it as a bridge between them and the money; and that to say of the majestic Experimental Quirology, mentioned in

Blue Book: *The Path to initiation*

Isaiah Cap. 49, 16 that it represents the study of thyself including the diagnosis of the illnesses through the **hands**. For these times used as vulgar system of divination, that doesn't have to do something with their origin.

In synthesis, kind reader, we can evidence that the Magicians of television, had to be shielded in their multicolored robes for shame before their real **mission** in the sphere earth.

The *spiritual* reality characteristic of Great **Fraternity**, it has been replaced for the disastrous ilusionism, parallel the acolytes are with these actions, that is to say the scientists in the field of the electronics that they have been about substituting the human being's internal abilities through apparatuses. The Telephone was invented to block the idea of the development of the **Telepathy**, the same ones in form of the cellular headphone that **Clairaudience** has displaced and this way we have an entire summary of sleeping abilities that the human being neither far it supposes that they are inside himself, but it is never late.

This book is called to occupy the corresponding place and to be made felt in the **Occult concert** and for own right before the current humanity, the current science, we Also hope it arrives at the hands of a warrior (of peace) that feels in thyself the splendid urge that takes humanity that takes man to look for the Creative **Father**. Then that friend and that brother will be able to experience these teachings and to expand them for the whole face of the earth, but truly I tell you that the spiritual author of this book **will attend** all that that begins his Radical evolution.

Here is this book: *The Path of the Initiation*, as final trumpet that calls its brethen, because there are people that live and they have never wondered: Why do they live? And for what purpose?. Other they have been asked the question and they didn't have answer, and it is that to be disoriented is not difficult to find, I neither it is difficult to find a confused being, displacement in life is easy. We relate this as when you go to the theater and the film has begun, you are confused and you don't know who is who. In the life it happens equally, you came here and disordered is all you see. Nowadays you don't know of where you come, because who came first they destroyed all the sacred orientation documents, and if you don't know of where you

Blue Book: *The Path to initiation*

come, neither you know what to do at this time to find your origin, and more difficult it is to know where you're going.

Thanks to the Creative Father's limitless mercy sends us celestial messengers, and although the **GLORY OF GOD IS IN HIDING HIS SECRETS, THAT OF THE MAN IS IN UNVEILING THEM.** This is what were doing those we have received the orientations of the Universe for the creator's grace. This book unveils fundamental codes that we can say: IT IS A VERSE OF THE COSMIC HARMONIC HYMN.

Each human being is an organization with a hierarchical level of energy, soul and physical principles that he has not learned how to manage, and when he has attempted it he has not made it with accurately and accuracy meridianly, So we have the 50% humanity's sunk in the misfortune as a result of this, and 45 confused and only survive for imitation, but not for creativity.

When somebody purchase a music system or a machine, they give it to you with a book, catalog or guides, for their perfect handling. If you have the machine and you don't possess the catalog, be sure is that you manipulate badly the apparatus. The organic machinery is much more complex and the man doesn't possess the catalog, for this reason the most absurd violations are made, we have several examples:

Not to allow rest of the digestive systems (something is taken to the mouth every three hours) , intersects and the hair is tinted, it consumes water after eating hot food, eats meat, it depilates the legs, takes a bath after a day of work and heat of the body, sleeps in the day (with the sun up), it is taken out the brows, un dye its skin, consumes alcohol and drugs, it is made surgical interventions (liposuction) , smokes, Etc. More complicated it is to cut the trumpets and to be extracted the womb, or it is made the vasectomy, and a thousand actions more that indicate the ignorance of the living temple.

The Bible that is the center of our faith, decrees: "Not he/she will enter in the congregation of Jehovah who find mangled (Injured) their genital organs (Deuteronomy Cap. 23 verse 1). The Apostle Paul manifests the synthesis of all this when he tells us: "Not you do know that you are temple of God, and that the spirit of God lives in you?" " If some destroys the Temple of God,

Blue Book: The Path to initiation

God it will destroy him; because the temple of God, which are you, saint is".(1a. of Corinthian Cap. 3 verses 16 and 17)

The surprising thing is that people that say to look for to God and that they want to flow with the celestial worlds, they make or they carry out most of the actions mentioned previously, and the worst thing is that they believe that they do good and that they please God. The mind is plethoric of errors but nobody wants to recognize them. Result of all this: Crimes, kidnappings, abortions, hunger, misery, wars, fratricides, the churches negotiating with the altars, terrorism, marriages of homosexual and lesbians, necrophilia, unknown illnesses, Etc. Etc.,

The cruel thing is that not only it is attempting against the body, but against the external nature. The layer of Ozone is almost completely destroyed and the blame goes to the aerosols, ignoring the magnitude in that these products harm the layer of Ozone is ridiculous in comparison with which produces the exteriorization of the sexual **energy**, the seminal **Waters**, are highly volatile and they are the cause causorum of the atmospheric problem and warming of the planet. If we make an analysis of the quantity of wasted energy it is more of what we suppose, the humanity's 40% is active sexually and in periodic form, that is to say that in a city of 350.000 inhabitants the approximate exteriorization is of 800.000 c.c. daily of sexual energy, the reader already can make calculations at level of Colombia and of the Terra Globe, they will be quantities of zeros that will have to add to this figure and no longer in cubic centimeters but in tons.

However ask a scientist on this and he will laugh sarcastically at these statements, because each one defends the lust and the fornication to their way.

With this book we look to mark the rule so that you begin in the way to the soul evolution, and we are sure that you will make it, because in the same form as the person begins in the bad habits of the tobacco, alcohol, Etc., likewise it can begin in these ultrascientific studies. We know that it will be a little difficult but if you possess will and decision, you will achieve it. You are a being in power, keep in mind that as well as a drop of water possesses all the genetic and theocráticos principles of the whole océán, likewise you

Blue Book: The Path to initiation

possess all the qualities and the genetic code of the Universe, and for logic of the Creative Fatherly on that you ignore it or you have forgotten it.

Do not wait friend reader that others find the harmony or peace of this star. You begin this great work in the search of your genesis, and will notice that if you change, it changes your family, and if the family changes, for magnetic irradiation, it changes the city, and it changes the country and automatically it changes the star earth. Begin the transformations now, don't leave it for tomorrow, because the tomorrow is possible never arrives and the biblical prayer dictates: "When the man challenges God for combat, the humanity will arrive to her end". This challenge and combat has to do with the work most perfect of God "The Man", and this it combats is done when the body is destroyed, attempting against its psychosomatic integrity.

CATECHISM

Well it is known that we all are subjected to the order lawyestic of incarnation and death. After their desencarnación, the soul projected should appear before a partial trial and of this their next incarnation depends, in the star or certain sphere, this new body is the result of what happened in the previous life, the trial keeps in mind the cabalistic order that is in connection with the numbers, the existences or incarnations in that corresponding star and that they oscillate in these moments between 100 and 107.

Another point that one keeps in mind is the earthly or organic weight that obviously has to do with the weight of the physical body. We guide those that don't eat to live, but rather they live to eat. Resulting in bodies with obesity and overloaded and others that on the contrary are devoted on diet, to tolerate hunger and until contracting diverse pathologies; almost similar to the alcoholics and to the drug addicts. We are guiding them that the body is the **Living Temple**, where the essential thing is the organic balance, kilos plus or kilos minus bring you lawyestic conflicts. The third factor that one keeps in mind is the precise measures of the **Living Temple** these they should be respected and preserved, Orientation for the Physical-bodybuilders or others that don't like its body, its stature, Etc., and they are

Blue Book: The Path to initiation

devoted to carry out exercises with such of looking for the body that supposedly should have. Each part of the body forms scales or cameras of the living body, which cannot be altered.

GENEZIGK:

Keeping in mind the last life, the law order in concatenation with the Golden **Sphere or Theokratical Regency of Origin**, sends the soul with the organization that will embody. if all this *flowing* with this Soul, they embody it, that is to say, **Angels of Life**, they connect the soul that will embody to the head of the fecundating zoosperm and it is as well as the **meditation begins** in the maternal uterus; the principle cosmic hidrogénik take it in prayer (3) that obviously is sexual (9) for this lawyístic reason it remains in deep **meditation** for (3 X 90) days, later on abandons the maternal habitation and it begins its human external life, with a certain vibratory energy cabalistically given: 33,07 , which should take like impulse until achieving the vibratory hierarchy : **49.12.**

This vibratory level ascends or it descends depending on people's actions. The crying, the hysteria and all state that it takes you to the depression make you energetically involution.

Whereas that our origin is universal, we were brought for beings of light or **Angels of Life**, we take a body and we will return this physical three-dimensional world. It is clear that don't have autopsychic projection (awareness), it is the image of *God* who guides us to this world called earth.

The **IMAGE OF GOD** remains in the star or constellation of our origin and we know it as **GREAT PRESENCE**, it is also known as **INTERIOR TEACHER** or **DIVINE SOUL**. Antagonistically with Divine Soul, it is also developed the capital sin or **SELF-CENTEREDNESS**, which serves as encouragement of our Dark or **SUBJECTIVE soul**. We already know that the capital sins are: The laziness, The envy, the Greed, the Hate, the Vengeance, The anger, the Lust, Etc. That is to say that we possess a **DIVINE SOUL AND A DISASTROUS SOUL**; we are thus the neuter part among these two Souls,

Blue Book: The Path to initiation

of our activities depends that one of the two Souls is developed. Some have developed to their Divine Soul, and today they are recognized as: Hipócrates, Galeno, Eliphas Levy, Huiracocha, Etc. , but others have decided to develop their Dark Soul as: Hitler, Marx, Darwin, Michel Smiely, Anton Lavey, Etc.

In all ways the word of God says: - will Be cold or hot, because the lukewarm ones will vomit them from my mouth” (biblical order) it has already been guided that the only mind should be projected to the creator, he/she should only think of The, if it is that he/she yearns the liberation; you will only liberate yourselves for means of the devotion and its seven steps.

To use another aspect, it is to feed to the interior duality, you need to look for your origin, only it belongs to you do it, remember that if you don't know of where you come neither you will know for where you have to go. The origin is same as the beginning and the principle is the absolute Protocosmik, there is your **Genesis**, but when we look into ourselves, when we meditate in the cosmogénesis, automatically arises the akashik questions : What existed before inhaling their first breath? The regent of this solar world? And still this world called Earth, The Rig veda of the antiquity responds this way: “Not something existed, neither anything existed. The radiant sky didn't exist neither the celestial immense vault extended to the skies existed. What did cover everything ~? What did it cover ~? What did it hide it ~? Was the unfathomable aforss of the waters ~?. Not the death existed, but anything was immortal, the limit didn't exist between the day and the night, only the ONE breathed inanimate and for itself, because any other one that HE has never existed. It reigned in the darkness and all principle was veiled in the deep darkness of the ocean without light. The germ until then place settled in the cover of the night makes sprout a nature of fervid heat. Who does know the secret ~? Who unveiled it ~? Of where, of where this diverse creation has arisen ~? The same God came later to the existence. Who does know of where that great creation came ~?. Well that your will has created it, well that it was silent, the most high seer in those but high worlds know it... or maybe neither even the he knows it. Contemplating the eternity, before was put the first **foundations** to the earth you were, and when the underground flame breaks your prison and devour the form, you will still be you, like you were, without suffering any change , even when the time doesn't exist, Oh infinite

Blue Book: The Path to initiation

intelligence , divine eternity ~!. Allow me to be integrated to you to live eternally in you and to achieve this way the final objective, the reason of being of my existence, to arrive to the Creative Father as origin of all that it exists”.

Friend reader, to look for God or our great presence, it is truly the stateliness yearned for the Universe, who conquers their *magic presence*, it flows equally for the whole humanity. As the Sun shines to the beggar and to the wealthy person, to the black one and the white, Etc., those that flows with their Divine Soul transforms him into the acolyte of the creation.

Who is magnified it loses the figure because he has been integrated with the figures or universal forms. Those that are able to know their Celestial Soul, lives illuminated as *imitatus* of the Earth and his illumination from the Sun, but the Sun is eclipsed when the waters fall to the earth (it indexes to the ejaculation). When somebody lives bended and it flows with their spiritual soul, the ties are automatically dissolved.

If you go into your Celestial Soul and you want to see to God, you only have to unite to yourself because you are their likeness. If you achieve Divine Souls *blessings*, you will be the same as the water, this although it is dirty, it never adheres to the dirtiness. Although you observe it dark you leave it in rest, you will already see that the dirty, the disastrous part will leave toward the bottom and her transparent will flow above everything.

They are countless marvels that oscillate around the *adept or initiate*. But you will understand, Oh children **of the Gnus** that you came to the world free of ties and even naked, this will make you understand that you are free, that possess a free thinking and obviously a freedom to act; but you are an imitatus of the Earth, therefore you should give fruits, these they will be venusines or Saturnian; but you will give them, have present that the **Harvester** will come to your world Earth and **it will reap** your fields, God willing they are not deserted and defoliated, because the **Harvester** will announce your trial with severity; already some chose pleasant fruits to the palate and other poisonous fruits, whichever it is your election, have present

Blue Book: The Path to initiation

that a wisely elaborated poison transforms into Medicine and an erroneously dosed Medicine has put an end to the life of many.

A person that has ethical and moral principles with a *spiritual projection* can conquer the absolute one, obviously this is a little difficult in these times, due to the contamination of the conscience that has taken the star Earth to relate it with a basically infernal world where reigns the materialism and the falsehood. It seems that we live in a world of dreams and dreams, many wanted to wake up in this chaos that has invaded our terrestrial sphere, but to wake up, it is necessary to turn radically the page of our existence, it becomes urgent to understand the diverse circumstances of the life, to observe the duality very attentively to locate ourselves in the third force.

A coin, for example, has a head, but it also has a tail, until there the human vision, but the spiritual conclusion is that the world of the reality, in the world of the truth, not only two images are come, that is to say, head or tails, but rather discovers the **third force**, that is to say the figure or geometric configuration of the coin, and that comes to be the circumference, square or triangle, Etc. We live in a material world because we have forgotten the principle or genetic factor and this it is **GOD**; when we forget this divine order we automatically transform into materialistic, that is to say, that in one life we have spiritual and materialistic diverse aspects, we have to find that third order and it is the mystic *order*.

To be mystic is not to be dogmatic, it is not to be fanatic, it is not about being religious. To be Mystic is to have continuity of purpose spiritual and soul. To achieve that, is the realization, configuration of our *Great Presence*.

Something that should be very clear is the transmigration of the soul and to understand the seven primary grades of development. Is the possibility that the initiate doesn't achieve in one existence the total realization and that only arrives to the grade of **Hakadik**. In a next return to the earth will continue from that point; what is not continuous it is the material life, that is to say the physical goods or economic ones they are seen in figures because they depend on the Celestial Law that is thoroughly transformative.

Blue Book: *The Path to initiation*

Not we should make treasures in the earth, but in the sky, the Divine Redeemer of the World has said it this way , *The Christ*. In this physical world if somebody begins the construction of their house and for some circumstance it doesn't finish it, there it will remain for a while, then the destruction of this will come; but in the spiritual life the grade that you achieve with your Alma will stay in full conscience of our Celestial *Father*. *The Creative Father* made the nature in one order, what represents a harmonic humanity that like it is logical, we are siblings, not only the human race but also the animals, the plants and the minerals. That the animal is in a scale different from evolution, yes, perfect, but it is not definitive; the whole creation is configured with base in three principles of cabalistic Law and Harmonic Law that synthesize in three order, these they are: LAW OF THE THREE (3), LAW OF THE SEVEN (7) and law of the twelve (12).

LAW OF THE THREE:

We our a very defined trio of: Matter, energy and soul; in each one of us it is present these three orders, we have basic three principle of realization.

Matter: Their-mission, this is to serve, mamtralize, that is to say, to capture.

Energy: To remember, to act on their *behalf*, to hear his Voice.

Spirit: To pray (Adoration, Sacrifice and order.)

What insinuates in synthesis that each principle has three subdivisions or scales, Already saw it: Matter is similar to submission, to serve and mamtralize; Energy is similar to remind HIM, to act in its sound and to hear its voice; The Spirit is similar to Pray (adoration, sacrifice and order). Let us study these points separately with their three subdivisions:

MATTER:

Submission: Achieve this state is primordial, this requires to have a wide physical independence, some they are hindered for the fact of the works, the children, the wife, social commitments, Etc. To be submissive is to apply the *Christ's* words when he said: Who won't leave their father, mother, son, siblings Etc., it is not worthy of being my pupil. To be submissive to the

Blue Book: The Path to initiation

Father is to be ready to flow with him, without having present something that hinders him in their projection, to be totally independent, to only serve the *Creator*.

Serve: When we speak of serving we want to be clear, we don't speak of conditional service but of **Cerv-io** (cervical Vertebrae or habitations of **Tertium Organs**), regrettably in a materialistic world a **Be vicious is developed**, that is to say, a subjective order because it is demonstrated that at the moment it is thought with interest toward something direct or indirectly; should never be made an act if one waits in change something, if they hired you to carry out a work depending on the money, this should be done in the qualitative same form with or without money, and more when it is about something spiritual.

We have quantities of religious groups that are about getting the public's attention, they make pamphlet, radial propagandas, T.V. and more; in which offer the salvation, the sanación and other, ignoring that *the Celestial Father should be served unconditionally*, and HE will decide in the considerable time the recompense type.

“Mamtralize: in the origin was the verb and the verb with God, and the verb was God” (John gospel). Mamtralize represents the Verb, the letters, the words, to the prayers; because the letter is *Father*, the word it is *the Son* and the phrase or prayer is *The Holy Spirit*. The Verb has lost ninety percent (90%) of its essence, today for today we have a low language, anti-Christic, totally destructive. The language that we listen to in children is disastrous, indecorous. When a boy utters one of that fateful prayers, the father or mother they loose a sarcastic laughter, followed for a justification: “Those children of now they are born liberated”. The parliamentary suppositions, representatives of Verbs are the first in expressing prayers with subliminal messages.

In the antiquity, when a family father ordered to lend money, he sent only his son with the power of the word, that is to say the power of the verb. Nowadays to get that borrowed money one has to appeal, although he/she is

Blue Book: The Path to initiation

our best friend who will lend us money, to “Letters”, promises or written oaths, and many other systems.

It is also known that the paths of the antiquity dominated the nature with the power of the verb, any ferocious animal was paralyzed or detainee with only listen the imperious and sublime voice of the one attacked. It becomes necessary to make clarifications, since the same mouth that today well-says, is the same one that today bad-says; it is the same mouth that consumes foods blessed in the *Creator's name*, it is the same mouth that liquor enter and for the one that the fatidic cigarette is aspired with the mortal nicotine tar and other Drugs, and many more.

Friend reader, is important to make clarifications and knows in what place we are. In the antiquity, the guttural sound was processed, it is ancient, any sound that you find here in these moments, it is the same sound that will be listened in all the Stars in which that same sound is emitted. Let us clarify this: In the antiquity, as well as the animals communicate, as the plants they communicate, for sounds, the human beings communicate for sounds, that was their sublime language “When the civilization entered, there the problem began”, previously the word cassette didn't exist, Telephone Etc., those they are sounds that one has come adapting to the current verb of our days, this means this es where there is involution of our language, because today per today there is but of eighty thousand words that we manage in Spanish, the human necessity has gone increasing day for day, for these words, in fact prepared words that removing them, you will find subliminal messages. It is important to understand the principle of the verbal fasts, we will see those treaties later on.

We have fallen in a gamma of disastrous customs due to that distance that one has with the Creative *Father*, when somebody studies for Lawyer, he/she lives thinking of it, it passes this way with those that study Medicine, Etc. The merchant lives thinking as how will go in the sales, the footballer then will think how to play well in the courts, he dreams of the ball and everybody is as well as each who lives materially in the world.

The true spiritualist doesn't accustom to enter the temple only when there is ecclesiastical meeting or twice a week, the suitable initiate makes that the day surrenders at three per minute, that is to say that lives the 72 hours of

Blue Book: The Path to initiation

the day, as for our daily projection, all that it does the it does it with **Allah's harmonic fluency**, each step and each action they go directed for his *Great Presence*, for his image completely powerful, we are not guiding a factory of fanatic but of authentic applicants to the conscious glorification.

ENERGY:

To work in His name

Name: We consider that this is a neuralgic point , is what we see in these times the image of the artificiality that has been developed in the different ideas or religious systems, with which is sought to use the *Omnipotent Creator's sound*, in all the actions, be already unbecoming or illustrious, is it that is used to put *God* or to use its sound to carry out a project **with spirit of lucre** .Who orders the religious leaders or who give them the power of initiating others in all the ways?. They are being carried out campaigns, crossed in the celestial *Father's sound*, inclusive it is requested favors in the *Christ's sound*, tossing him loads when he/she doesn't give up something in change.

SPIRIT:

To pray:

Divine Kabir of Galilee, *Jesus The Christ*, prayed the whole night in a coordinate or mount, requesting the *Father* the illumination, for this way choose to his **disciples; it is** not that it spent the whole night in a mechanical spoken prayer, because the prayer is individual, it is internal, it is a total fluency with our *intimate Being*, that is to say, with that spiritual part; just as it is guided in Matthew, Chap.6 Verses 6-7 "*But you, when you pray, enter in your room, (Body) and closed the door, (external Senses) pray to your father who is in secretly; and your father that's in the secret thing, will reward you in public*" and *praying don't use vain repetitions, as the heathens that think that for his wordiness they will be heard*" (see chapter of The Prayer)

Adoration:

As for the reverent position of the body, we should not be physical imitatus, the reverence is internal, physically we can place ourselves of knees or on foot. Although the lotus position is fundamental, but if your handicapped to

Blue Book: The Path to initiation

adopt this position, don't do it; it is not **necessary to force the body extremely**. The sacred writings narrate the case of a man full with leprosy, the one which he kneeled or it inclined his face to the earth so that the *Christ* healed it, that which was granted to him (Lucas Chap. 5 verses 12-13). The highest prayer that the *Redeemer of the world* guided us, he has seven (7) petitions and its called OUR **FATHER**, to be prayed it requires a fundamental verb, nothing of disastrous words. One will only this way be able to acquire the fluency or spiritual communication.

Sacrifice (Sacred-occupation):

Called also: sacred occupation. The initiate should stay in a sacrifice level, which requires having the don or capacity of discerning. It is possible that the spiritualist distributes money among the drug addicts, case that is very common, because one doesn't know in what will invest those people that money, because if they use it to buy drug, that is it most sure, they harm indirectly to who she gave the money, is here where the capacity of discerning enters, it is to give to drink to the thirsty one, food to the hungry one, dressing to the nude; that is sacrifice. When we are eating somebody it arrives and as a rule we say: "Come closer ". That invitation should be sincere and honest; he should feel the invitation. When we have said to somebody does Come closer, have you said it in mechanical form?, Have many invited me in equal it forms and when asking them why?, they respond: " I make it for habit", we mean that this is to make it with some conscience, because our real words should be suitable.

The true Sacrifice consists on sharing with our fellow men the gifts that arrive to us for grace, it is to abolish or transform the "Law of the funnel" that is selfish and cruel.

Order: This is the purpose of the existence, to achieve the priestly order. A true Secretary of **Jehovah**; the eminent **Paracelsus** in relationship to priests and doctors says: "The true priest, the same as the doctor, it is ordered for heaven's sake", neither the schools or universities can create priests or doctors, they can give him a cardboard or title and to make that somebody that is not priest or doctor appears as if it , they can give him/her permission to assist the public, but never r give him/her the power to bless or to heal. It

Blue Book: The Path to initiation

is that in the antiquity all priest was medical and vice versa, they were true followers to the Spirituality and in the Medicine. The venerable Teacher **Zigk Gnanak** says: *There are “doctors that have conquered the spiritual realization through the medicine, like there are others that in fact have been condemned exercising this profession that is not a profession but an order”.* Today per today any person guided for her imagination ends up being priest or doctor, but she makes it for economic goods, this is demonstrated.

When somebody is devoted to sell medicine, the pharmacist, what looks for is to sell, that is to say, he has an economic system. In the antiquity those that were devoted to sell plants. Obviously of pasteurization, they made it because they wanted to cooperate to dissolve partly, the human pain, because they saw in that joint the occasion of alleviating the sick persons.

Does the current economist, wonder will be more profitable, to sell medicines or to sell provisions and goods?.The Greek had for principle that the first son of the family should be devoted to the spirituality, was the one in charge of bringing the religious formations to the house, was the one in charge of blessing the food if the father lacked in the table.

As first measure to found a religious group or church, he/she should have the authorization to make it and this is completely spiritual, this permission is gotten for SOUL unveiledment. We see in the streets, Center Medical “Physician” or suddenly Laboratory “Hippocrates”, they can also place Laboratory “BRAHAMA”, Laboratory “RAFAEL” or “URIEL”,even “Jesus Christ”, “Vishnu” Etc. To use these sounds means that the quality of the product and the watchword of the medications should be without spirit of lucre, because they take the sound of a being, that when it was embodied in the Earth made it without spirit of lucre, then this is very important when it is about seeking to establish a medical clinic.

To hear HIS voice

Voice: Es that is not about a physical voice but of the conscious intuition, (not of hallucination that like it is logical it operates the Law of the likeness here, the Sanskrit ones called it Spiritual clairvoyance) it is obtained after possessing a complete purification of the **body**, of the **energy and Soul**.

Blue Book: The Path to initiation

Purification of the body: In the purification at level of the body, it is recommended to purify the digestive roads with a natural laxative, continued for **fast (ayugnus)** (Helps the being Gnus, that is to say, to the Father). This indicates that at night takes a purificator the and the following day it doesn't consummate food to do a good work.

Purification of the energy: The energy is purified that is to say for its configuration, that is the Magnetic Aura, the vortexes that possesses each living organism, the energy it is the principle that will give you that spiritual fluency and this it can become purified taking a bath with plants , we will already be guiding later on this.

Purification of the soul: To heighten the soul, to PRAY. from unmemorable times the beings of light have descended essentially to the terrestrial sphere from **Katzy until Dharmarajás Shamádik** and more there the **Seraphs, Kabires, Logoses**, Etc. They have always guided the sublime action of praying, and it is that the prayer is the food of our *Great Presence*, it is vital Prana of all the latent forces in our interior and it is bread vivified for the initiate, it maintains it inside the sublime order of the spirit and it takes it to superior plans of the soul.

If the physical or organic part feeds up to three (3) times apart from those that have bad habits; you should also try to maintain the energy part, with psychophysics exercises, Runes, lamaseries or Mamtralizing. It is reasonable that you develop the *Spiritual Evolutionary Principle* for means of the Prayer. In this form we will be maintaining the three (3) factors that constitute us: MATTER, ENERGY AND SOUL. How is it possible that the humanity in her majority only worries about the physical foods of matter and neglects the other two (2) parts?. There is a reason here, of the day for day, they are developed more pathologies or illnesses.

The spiritual part should not be neglected because at the end, this it is the one that counts; the physical part disintegrates, the energy transforms, the soul stays for the centuries, when we pray (not mechanically) we fuse the **Microcosms man** with the **Macrocosms God**, but the prayer should not be expressed mechanically, it loses this way mystic true sense and it doesn't transcend of this third dimension. The prayer has a principle to elevate our

Blue Book: *The Path to initiation*

spirit and to become favorable to the view of the superior worlds. The unification is given through the prayer, because it also evolves, it preserves, it provides food to the soul and the body, it flows and it redounds with the energy and the essential thing, it maintains us in Harmony with *the Creative Father*. The prayer shows their fruits when its done in the neuter vibratory levels (States Alpha: Nine, seven, five, three), when somebody is upset it maintains a state alpha above of thirteen (13), when it is sleeping it achieves the level nine (9), to descend of there, it is already a conscious work through the relaxation that we will explain in a next chapter.

When we are relaxed, practically we don't feel the body and although it is sleeping it doesn't mean that it is relaxed, it is very possible that the fatigue drives you to the dream, but tensed; you do the prayer after a total relaxation and when your psyche is free of prejudice or problems and without waiting something in change; this antagonize with the common thing in the humanity that only prays when has a problem, and in this conflict state it is difficult to penetrate to that **Theokratic or Celestial world**.

Further than of the fifth (5) dimension, the prayer should be constant, only we will be able this way to think with more clarity and flow with noble prayers. This trio of matter, energy and soul, have fundamentals their basic and independent projections. The material parte, well we know that it corresponds to the physic body and this logically is to protect it, but not to confuse it with the vanity or the fantasy, neither to end up taking care of the physical goods more that our same body of organic configuration, for example, a friend told me "was in the city and she had to go for a dangerous place, I returned myself because I was wearing some gold necklace"; obviously if has not taken the necklace she would have gone to the dangerous place, this class of stories happens to a great multitude of people that believe that it is worth more the material part (things) than the *Temple of Living God*.(it scares to even think of those extreme sports)

The energy should be organized, be preserved; they should be exercises done. To moderate this principle and not to end up imitating the sportsmen (professionals) that sweat up to two liters to demonstrate that they sweat the T-shirt and that they do it for the team, the energy spreads to disvirtuate in

Blue Book: The Path to initiation

different forms, but exactly it is given most often or intensity when wasting the Sexual **Waters** that are the patrimony of our *Great Spiritual presence*.

Of these three (3) parts the fundamental one is the Soul spiritual function, because the matter or physical body disintegrates after the death, and the energy transforms, but the soul is immortal. Have conscience of this or not, the soul will follow its transformation process until being located. This situation depends on each who, if we want that our soul evolves, she will give us the illumination to do it, but if it doesn't interest us, it also flows with that determination, because the *Great Presence* that represents *God*, it respects the **free will**.

When Shinovik went to our Teacher told him: "Guru, I have come to request an orientation, because of it depends it my continuity in the path"; Arjuna responded him: "My duty is to explain him, but the determination will take it you". This is the sacred work of the initiate, to explain, to give the body of the Doctrine and each one you take your own path.

All Theory is the same, one cannot say that that he is teaching the path of Good, and that this other emblem the path of Wrong, because the color of the teachings will really give it to him who one that receives it, and it is of keeping in mind that a King can be a beggar the day that wants, but the beggar cannot be a King when wanting it.

Each person brings a genetic code, and that tendency will show up before the humanity, equally it forms as the dog that once born it is taken to a solitary island where other dogs don't exist, when this it is developed he will bark, he has not seen it or heard it, that is to say, he will have the same attitudes in any part where it is because he doesn't have to learn it, he already comes with him, is innate.

The human being possesses an internal message, is similar to this situation, but most doesn't know it and you travels for roads and mistaken paths; some study a profession and they don't exercise it, but rather they are devoted to other things, others enter to the University and the 3 or 4 semesters change the projections, they pass to another range of studies or another profession.

Blue Book: *The Path to initiation*

All this indicates that we are lost and that it is required to know why we come to this physical world or terrestrial sphere, each person should know which are her internal projections, to know that road to continue or for where to begin, regrettably up to now only we have a quantity of imitators. Without realizing that we have fallen in the custom of imitating what we see. When somebody marries and a couple conforms, she is devoted to buy all that sees in her neighbors, few times she stops to think in what she is what really needs to live.

We are looking for to *God* because our grandparents indicated this way it, for example: Let us imagine that a ship that crosses the ocean shipwrecks, an aged Lord is able to save the life of two children of scarce 2 years, and they finish in a solitary island, there they grow, they pass 2,4, 10 years Etc. , and later on the Lord that saved them the life dies; the children can already survive on the animals and plants. When these children are 20 years an old a question it will arise: Who they will follow?, Does something beyond exist ? Who will they look spiritually? Logical, they were project where their natural instinct indicates them.

Returning to our civilization, each church wants to win the public's attention, suddenly see a multitude and one doesn't differ if it is an evangelist campaign or politics (Both promise), and the dangerous thing is this: In form of a coercion that they all belong to their organization, when one speaks of coercion, it is not always a direct coercion, it can be indirect, with threats of losing the soul, and other more that speaks of a divine fury.

The Hindu philosophy teaches the preaching of the gospel in an unconditional way, in general the individual illumination, action is pursued that is gotten with orientations, without pressure on the part of the guru or guide.

The spirituality and their road:

The world of the spirit or superspirituales levels, they are for those that after having meditated, they decide to practice the high spirituality and as a result, they obtain the illumination; but when somebody without more experiences

Blue Book: The Path to initiation

than what has read, guides the path, we can take ourselves years following him/her, but the fruits will be few, and it is not question of pessimism, but rather the results have them visible: If you friend reader puts the finger in the fire, logical is that he burns, but if you become fire, he will be able to enter and to remain in the fire without suffering any damage ; of equal it forms to remain in the superior plans of the *soul it is necessary that we become Souls*, here it operates the **Law of likenesses**.

It is important to recapture the point of the Prayer, because the prayer, really capacitates us and it cooperates to our transformation in Soul beings and this way to be able to penetrate in the super dimensions worlds.

EXPERIMENTAL PSYCHOLOGY

**“Made me keeper
Of vineyards and my vineyard did
Not keep”**

Every human being comes to the earth with a purpose, and only him it corresponds to investigate this objective, and as logical it is accompanied with the vocation that should develop.

In the moment he discovers these principles, automatically will experience kind of a **Shamady** or sublime state in their life, what will give him an impulse to offer a better service to their fellow men, if not discovered these states in the life, the daily actions of life are to be lived with routine, become monotonous and without respect to life, the consequences will show up. Who have discovered these aspects, that logically are related with our *Magic Presence*, they have transformed into musical elements, that is to say like a zither which allows that the heart emits its harmonic waves that have its origin in our *Magic Presence*. The spiritual force that we know as *Celestial Soul*, we can say that it is humanized to complete their mission in the earth. Each human being has his very singular intellect that many not even suspect that they possess it, and others avoid to discover it. We see daily the problem of the imitation, children that want to imitate their father or singers

Blue Book: The Path to initiation

that imitate others; they are never given the opportunity to discover who are they, in fact, they prefer to live in the shade of the mock ones.

These orientations owe to be taught to the children so that they understand the urgency auto explore internally. Never teach the boy the imitation, it should not even be baptized with the father's name or of the mother, this habit creates direct dependence from the son to the father, cutting the free will, the free think and the free act; quantities of cases of children that finish committing suicide when their parents perish.

In most of the homes it is guided to the children the conquest of the success, to arrive to the victory, to arrive very high Etc. The education always goes for the winning, they are never taught to lose, ignoring that to win and to lose is the poles of the **SELF-CENTEREDNESS**. When somebody does a business and it loses, the world is finished for him, the sadness is reflected in its face, it doesn't analyze the experience that has just won. In our apartment I have had experiences with people that pretend to be friends, of others that seems to be interested in continuing in this doctrine and suddenly they steal some element or money, in a while we are able to find out, that makes it is to analyze the cost of the experience and like one says, to cancel him/her the registration to that person.

We lost!, No!, we win the experience of knowing a human being more. A brother of the group told us "Guru, I had a spiritual experience", this sentence is common in the religious different schools and it is that the materialism that one lives in the humanity is terrible; **The real thing**, is that we are the spiritual bodies that we have human experiences in occasions, we are not human people with spiritual experiences, this should be understand. Let us play a short but important point:

The Ambition:

This egocentric factor maintains the common of the humanity in dislocated state, it is difficult to find somebody that doesn't ambition, the male ambitions a good wife, and when has children ambitions for them a good spouse, it ambitions a car, a house, Etc. The sportsmen ambition to arrive in the first place, in short, all these ambitions correspond to the daily life, the curious and worrying thing is that when somebody is made active member of a church or religious institution, then it ambitions the sanctification and if it is an

Blue Book: The Path to initiation

occult school, its ambitions, mystic powers or abilities, Etc. A thing is the objective projection, the Soul purpose and another very different the ambition.

Anturian Maximum prays: "That to acquire any thing in the life, it is necessary to give up the ambition toward this same thing" it is not about giving up the projection, but to the interest. The **Acirfa** axiom also says: "The happiness is like a butterfly that when we pursue her it is always beyond our reach, but if we are calm it can settle on us". This is relatively easy of understanding, what requires is to possess a creative imagination, let us remember that the creative mind, orchestrates the dance for the Universe. Only through the good actions with our fellow men, we conquer what our Being requires, contrary to the ambition that is based on the insecurity or in the fear. Obviously our **Great Presence** is the source of all the human activities, and only to her we owe what we deserve.

It is vital the development of the **Discernment**, analyze the mother's nature functions and observed that the Earth doesn't make an effort to rotate? Do the birds maybe make an effort to fly? The stars to shine? Do the fish maybe make an effort to swim? The plants to grow. All these actions are given in natural and simple form, without concerns or efforts and even without ambition. In the same way the nature offers us the fluency and the victory, what happens is that we place to the situation in the egocentric part, and as a result it is a complete fiasco.

The day in that a flower makes an effort in opening up automatically she will wither. With this we are not reaffirming the laziness, the apathy or inertia, the real key consists on doing the required action, that is to say to connecting it with our *Spiritual Being*, then in natural and spontaneous form will be done, as the Sun shines will crystallize the project, because the Sun neither makes an effort to shine. Who have understood these orientations, without traveling, they know places; without doing, they realize; without looking they see, and without moving the lips they speak.

Avoiding the free flow of the nature represents a loss of energy very lamentable. Those that live off the what they will say and that they feel very important, those people that feel very vital; in that attitude they spend the

Blue Book: *The Path to initiation*

energy flow, if we analyze each action, this energy that wears out sustaining such an importance, you can invert the connection of the objective and our Real Being.

To flow with the nature is to accept the spontaneous form. How the dogs walk? How do the rains come? The concepts and all circumstance in general, including that circumstance that is occasional to the human beings, with this it indicates that the present flows with the nature and trying to transform it is to spend energy unsuccessfully, the present is the synthesis of the past. "Don't try to live in agreement with life, because it go away from you and never try intoning a song, let that herself is sung, or have not seen that the humble hiccup arrives for itself?" "Are you maybe able to provoke a hiccup?. The present is organized and linked with all the actions of the Universe, and then to try of transforming the present is to fight against the same Universe, everything is a perfect engagement in the life. A single cell of the human body carries out around seven million functions per minute, and all the cells operate geared, what means that if an only one of these stops, pathologically speaking, this tiny but vital link contaminates the neighboring cells, what depending on the magnitude, a Cancer unravels. Of equal it forms, our function like microcosmic beings, it flows with the harmony of the microcosms and this to in turn with the Macrocosms, that which indicates that if we stop to try transforming the present, that detention can be fatal, also depending on the magnitude of the failed.

In synthesis, we can affirm that the present is also the summary of all the activities that we carry out in the past, and depending of like we channel the present activities, will be projected this way our future.

Concerning the reflection on the present, an anecdote happened in Adrinsa, India, Dupaky Zing, observed through the window of the golden temple of Punjab, a fight between two gentlemen that it is developed quickly, one of the two takes a dagger and it introduces it in the body of the unhappy one, the one which disincarnates at once; the murderer escapes, to Zing, he doesn't give him time of reacting, everything passed in question of seconds, many minutes didn't pass when goes for the place a walker, dressed with a Carmelite tunic, this flexions the body to extract the mortal dagger of the lying body in the earth, when he does it, he listens a voice that screams to

Blue Book: The Path to initiation

him: Hold there murderer!, that man of Carmelite vestment, was condemned and hanged. When Dupaky found out the police determination, it arose him a query: Where the is the Divine justice? That innocent man only wanted to extract the dagger of the body, he is condemned!. Subsequently he went where Edigia, the supreme commander of the temple and told him: "I retire of the golden temple, my faith in God, has caught a cold". And he do it this way it, he took a cadreza, that is to say handbag species, and you went to walk without fixed direction, the whole day it took on the way, in hours of the afternoon it sighted a ranch to which came closer to request some water, had an old man in that property, which didn't have water in the house in the moment, but it pointed out him about two hundred meters where he could find it. Dupaky went to the place, he found the lake and when he prepared to take the beautiful liquid, an extravagant scent arrived until him, it looked for the origin of that scent, and he found a small earth pile, he didn't take the water, he returned running where the old man was ,so that he explained to him the event, he narrated him that previous days he was taking water in that same place, when two gentlemen fought strongly, one hurted the other one and killed him. The murderer escape from the town, and because he could not make a blaze to burn it, he buried him in that place. Who was the murderer? Zing asked, I don't know it! The old man responded, I can only describe it to you, he had a Carmelite tunic. Before this explanation Dupaky said: "You ended up vivifying my faith in God" why? The old man asked, because that man condemned was hanged in fact for criminal. Now, it is you who increase my faith finished the old man saying.

Really, friend reader, the Law operates from the past to the present and from the present to the future.

The location in the life is cardinal, it is vital, when we dislike somebody , it is not in the person, but in ourselves. In our feel towards the humanity, it is precisely here where we should make emphasis and to consider to all the problems like opportunities of overcoming and evolution. Logically to accept this it is necessary to have responsibility; when we are responsible we don't accuse the other the actions that happen to us, if we behave as oaks before the tempests of the life, in question of seconds we will be demolished, but if we adopt the attitude of the liana, they will be able to pass for our side

Blue Book: The Path to initiation

hurricanes, and they won't harm us, that is to say, if we accept the circumstances as they are.

For what reason spend energies in the past, if they belong to history, or in the future, if at last it is an entire enigma. What we should take advantage is the present, since it represents a gift of the nature toward us; she tells us: I brought you this present; to project or to organize the future unconditionally is another thing. To organize our future is easy and there are many the keys that we can use for it, but all are synthesized in the following prayer: **“Do make presently with the other ones, like you want that they make with you in the future”**, to give is the fundamental idea, to organize our future, What to give?, not necessarily has to be money, it can be to offer attention, a prayer, a blessing or a smile. Quantities of things are to give, and they don't cost, on the contrary they stimulate the one that receives them. All these actions or orientations will have bigger forcefulness if we relate them with our *Great Presence* or at least if one keeps it in mind. The action of thinking of our *Great Presence* can be gradual and we can relate it with a flower, a look of a child, a setting of the sun, the twinkling of the stars, Etc. There in all these actions, the direct vision of our *Magic Presence* is; at the same time these actions serve as thermometer to measure our soul states, if a person is not able to admire a setting of the sun, the flight of an eagle, the growth of a plant, her internal grade is elementary.

The Guru **Zigk Gnanak** guides: Relax your body, absolute distension, and when you are in sublime state of concentration, visualize the kingdom of the nature, our Omnipotent Father's creative capacity. To see an animal, a plant, the water and his most perfect and big work of the Universe: The Human being. Analyze him carefully, this creation capacity, and you will see that your body loses temper; you can finish crying, you can finish happy, you can finish with fear, Etc. But if these actions, these visions are not able to flow in your interior. You can be totally sure your Soul capacity is elementary.

As the fluency with your **Greater presence** it is developed, goes disappearing the fear, the ambition and the desires and desire of fame Etc., But to achieve the development of that fluency? One of the keys is the verbal fast or search of the silence; the urgency of practicing the silence, is not question of being in silence half hour, the true silence begins in the solar

Blue Book: The Path to initiation

hours (6:00 a.m.) and it can be prolonged during hours, days, weeks; it is as well as the voice of the silence appears, and this it is related with our *Great Presence*, it is necessary to clarify that when we practice the silence, we should not carry out activities that require energy loss, so much psychic, as physical. We can begin the search of the silence with a daily hour, and to go increasing until achieving a lot of time, we can also make it in the free days. **“Be silent and you will know that I am GOD”**, prays in the sacred writings.

All practice requires of discipline, perseverance, it will arrived the moment in that you will feel with weakness, unable to continue, because there the mathematical essential point that we require for this continuity of purposes, is because it is really necessary to be mystic, and to be mystic is to have continuity of purposes, your mind will bring you doubt images, of conflicts, images that will look for in the past, will project the future so that you decay; but the path is already initiate, and your *Great Presence* waits eagerly to that the spiritual agreement that you made before the Law, is effective and it will follow effective per years until you complete it, and then, you will be free in the face of the truth.

The Soul conquest is difficult, but not impossible, already many achieved it and we are sure that you will also achieve it: **Rama, Hermes, Buddha, Vishnu, Krisna**, all these big teachers reached the high spirituality why not reach it us? The keys are now within our reach, it is necessary to give a positive overturn to your life. We can say that starting from this moment in that you are reading these lines your life it has changed, you will remember that your life is evolutionary, transformative day for day, for you don't get up of your bed with laziness, with apathy, but rather on the contrary, you will give that jump from the bed to the floor, with your harmonic mind you will give thanks to the Creative Father for a new day, for a new dawn, for this new sun that will allow to expand toward ourselves, you will take a bath body essentially, there the positive advance begins although in human form, but the human part is the living manifestation on our internal Self.

GENEZIGOLOGIA: Some groups that profess the idea that later on and very soon all will live in complete harmony, in peace, and everything will be ok , it won't exist the war, the envy , neither anger.

Blue Book: The Path to initiation

We consider that this is a memory gleam belonging to the past and projected to the future. As it is known, the earth sprouted of Deuterocosmos and the same as a child, didn't walk at once, but rather he crawled, it was unstable, it was required to stabilize it and for it, was important the human life, the first race came **Protónik or Protoplasmic**, but with them was no stabilization, neither with the second race, the **Hyperborean one**. With the come of the third race, called **Lemuria**, they were visible beings with a visible body , physical Material, and was here where the Division of the sexes came, starting from this race, the men are born as men and the women like women, in the previous races their inhabitants were hermaphrodite sacred beings, they possessed the two sexes, and the population entirely came of the Seventh to the first dimension. It indicates that they first inhabited **Akash** and therefore they were not visible to the physics eye . We are in the fifth Aryan race and therefore we flow with the third dimension of the nature.

Each race receives the auspices of the Theocratic regents of this solar system of **Ors** (for us it is the Milky Way). The first Race was commanded for the Archangel Gabriel, the second for Rafael, the third for Uriel, the fourth for Michael and the present for Samael. If we analyze the psychological characteristics of each Star, we find that the Moon, Mercury and Venus, they are harmonic stars, the Sun is a balancing star, but Mars Jupiter and Saturn is just the opposite, Mars symbolizes the Force, the war and these effluvioms arrive to the human being those which not well channeled they generate conflicts.

With the Division of the sexes, the human race it is activated in him the **coxis electric field** , (to stabilize it or to attract him in the earth) it woke up the capital sin and with it the formation of the mind. It is of understanding that the angelical race (and people that still in these day are spiritual) has **brain and imagination**, common people and currents have **mind and thought**, the imagination corresponds to the soul and the thought to the ego.

The man has features of when was hermaphrodite (breasts) and the woman phallus (Clitoris). The mind day for day creates the bad habits, the memories, the customs, and to this they call ego. 99% of the impressions that we receive from the external world passes to the **tertium organs** (cerebellum) and they are not channeled to the brain but to the mind

Blue Book: The Path to initiation

(thought), and it is for this reason that most of the human actions are disvirtuate or egocentric.

It is impossible to enumerate each one of the capital sins, the mind has created so many that many people don't emit at least two good actions a day, but the important thing in the way to the psychological transformation, is that the mind cannot integrate them, each bad habit or psychological me it acts independent of the other one, and this facilitates to discover them. When the man is devoted to analyze them, to discover them, he meets with subtle bad habits that are using him. But the serious of this matter is that many don't feel sinful and feel like a saint and perfect (it is another ego) it is victim of failure, others live tossing the blame other ones in connection with what occurs to them, you visit a jail and will find that ninety percent of the prisoners feels innocent, nobody is considered guilty. In connection with this, the Bible, as great letter of God for the men, mentions the case of the publican and the Pharisee, it says: "Two men ascended to the temple to pray, one Pharisee and the other publican, the Pharisee prayed to himself this way: Lord I give you thanks because I am not as the other men, adulterers, thieves, Etc. as this publican, I fast twice a week, and I give tithe of all that I win. The publican not wanting to lift the eyes to the sky, said: Lord., you favorable to me, that I am a sinner. Truly I tell you that the publican descended justified to its house before the other one, because anyone that is exalted is humiliated and the one that humbles will be ennobled. (Lucas Chap. 18).

In general the human being lives fascinated for the fleeting things, and he passes the time with the desires of fame, of obtaining titles, medals, rewards, trophies, Etc. He/she wants to appear in Television, the press, radio and he/she stays in life with these false objectives. For the common of the humanity, the psychological transformation is something secondary and that they can begin it tomorrow because the first is to get money.

Continually it is commanding a different capital sin, it is for this reason that somebody a thing says now and tomorrow he says another. The capital sins masquerade with the vestment of the spiritual one, the bad habit of the hate masquerades of love, the laziness of will, the lust of chastity, the vengeance of the pardon, the anger of patience and each capital sin uses this way

Blue Book: The Path to initiation

different centers for its manifestation, in this form we have that the sin of the lust can use the brain and the student is believed poet and he makes verses for a woman, but when it uses the heart he makes him feel love and falls (goes down, why not up?) in love, later on uses the sexual area and transforms it into a vicious and sadist one. The lust is really the tomb of the love, the death of the soul.

The humanity lives psychologically dislocated, we find that in a party not all are cheerful, there are sad people, but there is also people that laugh to beating jaw in a funeral.

The essence of our presence in the earth is the eradication or transformation of our capital defects, since it is this range of bad habits those that don't allow our True **being's free manifestation**. When the sin of the anger takes possession of the physic body and prepares to consummate an unpleasant action, the **Being** emits a sign to impede it, but that sign that leaves of the center (of the interior) made the periphery it should cross the whole bundle of sins, depending on the intensity of the sins, these they can remove the force of the message or such a grade that it simple doesn't arrive to the periphery and in consequence the unhappy one makes any violation. But cases have been seen in that the Being's message arrives with magnitude and what we know as regret (before making the action) takes place.

Not the fluency should be sought with our celestial soul in state of imperfection, because any Sacred received message can distort it or to distort it the capital sin. **What we should make is to take off the imperfect thing and our being's laconic manifestations will appear this way**. This is similar hello that make the engravers, they say: There is "that take away to the figure what he has more than enough of marble" and if it is "wooden they say: It is necessary to remove to the figure the garbage that covers it", that it is what we require to make, to remove the psychological garbage that is eclipsing our Being.

The student should have a psychological center of balanced, not to allow that the circumstances deviate or diminish the vibratorial order. The Sacred Book RIG VEDA teaches us: **"Not I am more because they praise me, neither less because they vituperate me"**.

Blue Book: *The Path to initiation*

Every bad habit inhabits the etheric area of a certain organ, we have this way that the Hate inhabits the etheric part of the heart, the lust in the etheric part of the reproductive apparatus, the laziness in the nervous system, to the greed in the stomach, Etc. Etc. The ego like energy doesn't die, for this reason we speak of transforming, and it feeds of what consumes the physical body, it is logical that if we feed him with animal cadavers, the bad habits are proliferated, because the man is: In soul what thinks (it imagines) and in body what it eats.

It is urgent to begin the work of the egocentric breakup; the feeding is the initial key, in few months you will be able isolate yourself of the meats and to enter in the era of the vegetarianism. Without egocentric transformation it is impossible our being's incarnation, and without nutritious transformation the Ego doesn't transform.

The ego is too astute, he hides to deceive the initiate and to make him/her believe that it doesn't exist, but the great reality is that behind the fume of the incense hides the crime. Behind the beautiful squares hides the crime. There is really a lot of virtue in the evil ones, but there is also a lot of wickedness in the virtuosos. The bad habit masquerades of saint, of apostle, of martyr, of priest and it officiates even in the sacred altars of the temples.

THE PRAYER

We have guided that the prayer should not be made in form mechanics, because it loses the mystic real sense; something that you friend reader should have very clear: It is exactly what exists in this world called third dimension; but there this the fourth dimension that is a neuter world, the world in the forms, the world of the imaginations; but we can say it exists the fifth, sixth and seventh dimension. Not we ignore that two superior dimensions exist. Then here we will locate these seven dimensions.

The first and second dimension, have to do with low dimensions or areas of the nature. The fourth dimension is an impartial world, but the three (3) sublime dimensions exists that are the fifth ,the sixth and the seventh; there it

Blue Book: The Path to initiation

is where the spiritual beings that you seek are, to invoke them requires of a petition and make it arrive to these sublime beings in those super dimensions.

The prayer has as virtue, to elevate our spirit to that dimensional world. We have said that the prayer unifies, it evolves, it preserves and it is the one that gives the basic food to our *Great presence*, but to arrive to these dimensions you should be in considerable waves or spiritual cycles, these we will study them in the next chapter to guide these projections well.

The prayer should be constant, permanent, this means that continually or when is walking goes also praying, it doesn't mean the spiritual automatism because you can doctrine the mind, its subconscious one, so that this stays in a constant harmony of prayer. To contribute with the spiritual search, we will structure in this chapter the seven (7) basic prayers, one for every day of the week.

The order is: **Moon, Mercury, Venus, Sun, Mars, Jupiter and Saturn**; this it is the exact order of the stars in connection with this world called earth, we mean then that the first day of the week it is governed for the Star Moon and it is Sunday, and the last day that is Saturday, it is governed for Saturn; we clarify: The day it really begins from the dark to the clear, it begins with the lunar (night) regency and it finishes with the solar (Fall of the sun) regency. All the actions of the universe, are determined from the less (-) ones to it but (+), because there is our *Creative Father's victory*. Then, for example, the spiritual day Monday(Moon-day, in Spanish Lunes- Luna) that is the first day of the week it begins exactly on Saturday at 6p.m o'clock. and it finishes on Sunday, also in hours of the afternoon, when the spiritual regency of Mercury begins, that is to say that during the day current Monday it governs mercury that is the second star.

The current astrologer's guide that the moon governs on Monday, mars on Tuesday and so forth; this it is the Gregorian calendar but it is completely wrong. The old Sanskrit's, the Greek and some other leaders knew the order of distance of the stars in connection with the King Sun that is the same of our days, what happens it is that Gregorio XIII, transformed the calendar, and the current astrologers are continued guided for this. Each star influences on the Kingdom of the nature and they govern a specific day of

Blue Book: The Path to initiation

the week, for this reason to the Moon detected its effluvia gets to the earth the days Monday and Mercury on Wednesdays, to Venus on Fridays, in the sun Sundays, to Mars on Tuesdays, to Jupiter on Thursdays and to Saturn on Saturdays, that is to say that every day of the week they baptized him with the sound of the star in action, then the prayers, here they will be specified, beginning on day Sunday that is the first day of the week.

Preferable it is that we make these prayers in a place where the four basic elements of the nature are: earth, water, fire, air. Some accustom to make an altar in their houses and that is fundamental, but if doesn't have those elements in the hand, you can do the prayer because we are also fundamental forces of this same nature. It is recommended to make different petitions and subsequently the prayer of the day, is fundamental to do it twice per day, one in the morning and another in the night. Let us see that order of prayers then, this can be supplemented with an order of practice relatively short, that is to say: *Our Father*, subsequently a prayer for the humanity, a personal prayer and later on the prayer of the day.

Our Father we know that it contains seven (7) fundamental petitions, structured in oneself pattern guided for our redeemer(Christ).

The following prayer is adaptive for every day of the week, there is a space in which the sound of the regent of the day is pronounced; here we will use the sound or name of Archangel MICHAEL, but you will use, we repeat, the sound or the regent's of the day name, the prayer says this way:

For intersection of the archangel Michael, makes us the Lord worthy of being inflamed in the fire of a perfect charity, ámen.

For intersection of the archangel Michael, give us the Lord forces to abandon the way to sin and to walk for the way to the Christian perfection, amen.

For intersection of the archangel Michael, the Lord infuses in our hearts the spirit of true and sincere obedience, ámen.

For intersection of the archangel Michael, give us the Lord the grace to dominate our senses and to correct our passions, ámen.

Blue Book: The Path to initiation

For intersection of the archangel Michael, deign the Lord to protect our souls against the traps and negative temptations, ámen.

For intersection of the archangel Michael, the Lord that don't allow we yield to temptation, but you liberate us of all wrong, ámen.

For intersection of the archangel Michael, grant us the Lord the don of the perseverance, in the faith and in the good works, to end up acquiring the glory of the paradise, ámen.

For intersection of the arkandel Michael, deign the Lord that we are kept for them and to behave to our very dear father's eternal glory.

Ámen, ámen, ámen.

The following prayer is Cosmic, it is recited or he/she prays every day of the week and he/she says this way:

Lord for those that suffer, Lord for those that cry, Lord for the orphan children that are in the misery, for those that don't love you, for those that don't adore you, for those that live sad, for those that pray never, pity Lord, pity.

Hallelu ha, hallelu ha, hallelu ha. (It is pronounced Hallelujah)

*Lord for the beggars and for the sinners, for the rich ones without soul that have and they don't give, for the bad Christian , for the farmers, for the oppressed ones and for the oppressors, pity Lord, pity, pity Lord.
Hallelu ha, hallelu ha, hallelu ha.*

Lord for the sick persons, Lord for the beggars, for those that are in the darkness of the ignorance, for those that anything has, neither bread, neither home, neither shelter. pity Lord, pity, pity Lord.

Hallelu ha, hallelu ha, hallelu ha.

Blue Book: The Path to initiation

Pity for the invalids, pity for the old men, for the sad homes where the love is not, for those that don't believe in You, for those that are pagan, for those that cry, for all the humans, pity Lord, pity Lord, pity Lord.

Hallelu ha, hallelu ha, hallelu ha.

It is recommended to have to the hand, a glass with water making the whole ritual. Later on, when concluding, consume the consecrated water, because it will stimulate you totally vital Soul principles.

The prayers for every day of the week are the following ones:

THE SUPERIOR MEDITATION

**“The wind and the waves, goes
Always in favor of
Who knows to manage them”**

The meditation it is in the bottom, very interesting. All spiritualists should practice it, because this system allows us to flow with all the dimensions of the nature. When we say this we refer to all in general, that is to say, the first second and third dimensions and naturally to the superior dimensions.

Many applicants or practitioners of the meditation, only spread to project their imagination to the superior dimensions as the fourth, sixth dimension and until there. We want that us, those that practice the sacred esoterism, be aware that the first and second dimensions are fundamental in our spiritual realization. It exists a misrepresentation of the values and suitable projections of the meditation: Some believe that to meditate is to sit down sluggishly on a seat, others believe that to meditate is to sleep a good while, but for the honor that possesses the truth, we should clarify that whenever somebody is in meditation, it flows with beings of any dimensional order and as a result brings messages, that is to say that the meditator becomes a omnidimensional channel

It would be absurd to say that somebody meditates and don't penetrate more there of their own personality, they are required seven steps basically to reach the maximum expression of the dimensional planes. Which are these steps? Let us see: **1) step:** It is the disposition of the body, **2) Step:** The asana, **3) Step:** The relaxation, **4) Step:** The concentration, **5) Step:** The meditation, **6) Step:** Ecstasy, **7) Step:** Retrospect

We will analyze one for one:

What is the disposition? This means that to carry out this practice, total understanding of her should be possessed. To do it without spirit of metaphysician lucre. We should be clear in this that we have to understand a practice before doing it, this is vital for the success of this. Me personally, before making a practice I analyze it in the superior planes, in what is in my mind, supraconscious or my unconscious mind, for later be able to analyze and to practice it. This also implies or it is related with the disposition of the

Blue Book: The Path to initiation

body, that we are organized, that we are harmonized, that we have not caught, to say this way it, rages or anger that day, in short be totally fluently, if it is that truly we seek to reach the illumination through the meditation.

For all practice it is fundamental to relax the whole body that is to say not only to relax the physical body, but also the internal states of psychic order. In the physical part we have near 18 organs that are connected to the relaxation: Feet, calf, knees, thighs, waist, abdomen, pectoral, back, column, arms, shoulders, neck, maxillary, the nose, the eyes, the hairy leather and the brain. Subsequently relax the psychic configuration that are the areas of theocratic manifestation, that is to say, the seven (7) areas related with the seven (7) elements of the nature and their Soul regents . That upward order makes it with the element Earth that governs from the feet to the knees, in this area we request to the regent, that is to say to **the Gnomes and the Pygmy** that purify us the living temple, making emphasis to the area corresponding to the element earth. We ascend then to the theocratic order of the water, represented in us from the knees to the sexual area, in this area governs the God **Varuna** that is God of the Water. Then we Ascend to the theocratic order of the fire whose area corresponds from the sex to the Heart, its regent is **Agni**, and to say this way it, his descendants, the Salamanders of the fire. It follows the upward order with **Silfos**, spiritual beings of the air whose area corresponds from the heart until the brow its regent is **Paralta**. Later on the **Pungtas continues, spiritual** beings of the Ether, their area goes from the brow to the crown.

Friend reader, the earth is known it possesses areas that surround with the atmosphere, ionosphere, the stratosphere, Etc., we that are an imitatus of the creation, that is to say are similar to earth, we also possess an atmosphere, ionosphere, stratosphere. Only that it receives the spiritual name of **Magnetic Aura in us**. It is here where **AKASH is, with Akashi**, its regent, and an order septenary we have, the intercommunicated synthesis and we refer to the elementary order of **PRANA**, that is to say that the synthesis or septenary order has it in the system endocrine, living manifestation the regent **Pragnus of that** is the seventh element that is to say **Prana**.

When the meditator arrives to this relaxation point, its body practically doesn't feel, that is to say that don't conceive to its organism like an organic

Blue Book: The Path to initiation

mass. Obviously we all know that the brain stays constantly emitting waves, vibrations and rays in cycles, which oscillate in the common of the humanity between ten and eighteen psychic cycles per second, these waves are developed in connection with the impressions of the external world that arrive to the brain through Tertium Organs, this means third organ or vortex, located in the cerebellum.

What is pursued with the organic and psychic relaxation, is to diminish the seven types of waves or psychic rays gradually. Commonly the humanity that day for day lives desperate and full with psychological conflicts, stays in the level **Mega**, flowing to more than 13 cycles per second. As the initiate or the person that starts the relaxation, the calm and the security felt is made flowing in the state **Gamma, that is to say**, 11 cycles per second. The relaxation follows its evolution and the level **enters the Thets** that is the state of the ordinary dream and it maintains us to 9 cycles per second, that is to say that, when a person sleeps, she also stays in this state that corresponds to the physical part, well-known as the organic part. Starting from this level we enter to flow with the scales of the energy, in the well-known state as **Beta**, and it corresponds to 7 cycles per second. Each scale has bigger concentration and projection. The success of the meditation is in the continuous fluency in each order. Subsequently we find the escalate **Delta that** represents five cycles per second, from now on, it already corresponds to the spiritual part or to the soul, referring to the waves **Alpha** that represent 3 cycles for second and the Father's rays is the **Ultra**, living image Creator, in this state that we consider is the biggest grade and heighten of the meditation. Here it is where is the nirvana or the ecstasy of which the oriental's speak. All this is related definitively with the relaxation, of this, the victory of all occult practice depends. When arriving to the energy part there is a total separation of the physical world, something of this three-dimensional world is not perceived.

All the sacred books have been written by leaders and teachers that stayed in a Alpha stae. For this reason the Bible cannot be read in states of common fluency, that is to say in states gamma and states mega. If it is sought to study the Bible we have to synchronize ourselves with the writer's psychic states. For this reason the proliferation of Churches exists, myths, dogmas, around the Bible, because each who with its psychic different state

Blue Book: The Path to initiation

studies it and interprets in its form. Not it is advisable to study the Bible or another sacred book to more of eleven (11) psychic cycles per second, because will mostly **distort** the sacred writing and the misrepresentation of the teaching comes. There are those accustomed to read the Bible after working the whole day, they seek this way unveiled it to the whole humanity, with a state of impressive stress. This is as trying to repair a motor or an electronic apparatus without possessing an orientation plan. When assuming the maker's mental level, he understands with accuracy the circuits and for obvious reasons, he finds the damage. Only when we arrive at the writer's psychic level we can understand their book.

In states of psychic hyperactivity, it is impossible to communicate with beings of other dimensions, only when we arrive to seven (7) psychic cycles per second, we can flow with soul beings and celestial hierarchies. This state demands that the meditator maintains deep distension. The true athletes of the meditation enter to the world **alpha** and the **ultra world**, to be able to sustain dialogues with ineffable beings.

When you enter in prayer, the whole relaxed organism should be less than 9 cycles per second. Following these steps when arriving to the state of physical relaxation and etheric, it is required to relax the emission fields and reception, these they are the Solar Plexus and the gland **Antia** that is known as the Pineal Gland. The Solar Plexus relaxes himself with the mamtric sound **Wuuuu**, **this** sound is intoned mentally. The Pineal gland flows with the sound **Wiiii**, **they** are two relaxation sounds: The sound Wu that corresponds to the solar plexus and the sound Wii that corresponds to the Pineal Gland, like issuing center.

A point that we have considered the key to reach a maximum harmony, but that everything in the psychic world, is the intonation of the mental sound **Ahimsa**, this word that means **non violence**, being constantly intoned and in connection with the breathing is formidable, To the moment to inhale intones **Ahimmm** and at the time of exhaling intone the sound **Ssssha**. It can be made permanently but the best moments for these exercises, it is in the dawn, at nights. If we go in a bus and doesn't have anything to do, Ahimsa can practice, if we go walking it can also be practiced. This is made in automatic form, that is to say that we don't have to go pronouncing sounds

Blue Book: The Path to initiation

unnecessarily down the street or confusing people, no, we make it in a form in a discreet form, without anybody notices of it.

Not there is time predetermined in the meditation, since the time in other dimensions is very relative. It can happen that we think or that we believe that twenty 20 Minutes have passed and they really spent two at three hours, hence it is very relative. When we go into, living those worlds that we have verified the depth in this practice, when returning, we repeat , three hours have passed, like in other times we believe to have entered in fluency for three hours and only they had passed thirty minutes.

In the moment to enter in the Prayer, the cycles should be in the heighten that one can, otherwise it is impossible that beings of light capture a sign or psychic wave. This means that if we make a petition in more of twelve cycles per second, we don't achieve the essential thing or the contact that we are pursuing. It can happen, then that seeking to enter in meditation to but of eleven (11) cycles per second, if the contact is achieved its not directly with the soul beings that we seek, but rather the contact would be with outlying beings that are more out the distance of the Divine Central Sun, obviously represented for White Fraternity.

Continuing with the steps: **The Asana**. What is the Asana? The Asana is exactly the position of the body. Referring obviously to the physical body that has diverse forms remaining per hours. 33 Asanas or positions of the body exist, although Hata Yoga works in projection with 84 Asanas. The 33 Asanas that we make mention, are more exact for the practice of the meditation. The important thing is that the brain is in address with the spinal marrow. A real Asana is the one who permits us stay in that position during three hours approximately. The Asanas more common are: The position of Lotus, Semilotus and half lotus, in these positions the hands rest in the thighs and the index fingers and thumb they are played forming a hoop. Who drive automobiles or railcars, they can drive uniting the fingers that we mention, since these they are terminal nervous of the sexual area and of the brain, and when being in pressure or rub they vivify the senses and the mental states are clarified. The old ones carried out the meditation with these united fingers to maintain bigger memory of it. Today you can use this technique or system for further assimilation, also including the language that is a psychonervous structure and their terminals, that is to say the tip of the

Blue Book: The Path to initiation

tongue has a terminal or flow psychonervous that it allows us to bring memories itself, this terminal is lift it until what we know as the sky of the mouth.

It can also be done the lie down meditation, either with the legs and arms separate or with the united feet and the separate arms. Another Asana is with the back to the floor and the feet hit the wall, that is to say half body is vertical and half body it is horizontal. It can be practiced lying with the extended feet, being the feet together and the arms hit to the body, with the palms of the hands up, leaving of the previous position, they are picked up the feet a little, being the plants of the feet on the mat or floor, while the hands are placed from behind of the head. Another is with the legs in the previous position, we place ourselves of the right side with the left hand above the leg left in angle, and the palm of the right hand is to support the head like a pad.

Anyone of these positions can be useful in the meditation, if in twenty minutes or a little more, a part of the body is nimble, have present that should be in treatment, the same thing if it feels pain in the articulations.

To get a good meditation, the applicant owes to maintain or to remain in a state of acceptable health, this is important for the meditator, because any arthritic, dental pain, Etc, is enough to impede the depth of this field.

The Concentration.

Each step in the meditation is of vital importance. In the perfection of each step days can be used, even weeks. The important thing if you seek to reach the meditation, not to place a goal. Let us say that in a month of the practice, already you're meditating, it is not possible. Since in the practice even to learn how to relax yourself, you can take about two or three months, in the practice of the concentration, it can take up to six months. Everything depends in the Impulse or way as you are practicing, the yearning, the basic will that has put to reach the meditation. Of that it is really depends the victory and the conquest of these seven steps. In the Asana, for example, if you doesn't restrain the whole position of the body or if the applicant is of those that try to meditate and they constantly move, is impossible the

Blue Book: The Path to initiation

fluency; for this reason we should dedicate to each step a considerable time until dominating him.

The concentration is vital because in the meditation they unveil messages in images and fraises, if perfect concentration is not possessed we cannot receive it. The reason is very logical, since the Universal Fraternity is not able to unveil it to the meditator when knowing ahead of time that he can distort the fraise or message. One of the ways more simple to perfect the concentration its the following one: To have pencil and paper in a table, to get an image or figure that has never seen previously, you can use to begin, a key of padlock, deeply relaxed, observe for 30 seconds the figure, separate it and close your lids for one to two minutes and subsequently open them, repeat this action for three (3) times and at the end you separate the image that you had chosen and with the creative imagination that you possess already of this figure, it is about making a drawing more perfect possible, perfect this practice, always with different figures. The perfection of the concentration will be given when with a single time that you have seen the figure in thirty seconds; you can already draw it in its perfection.

Of equal you can use a unknown melody or a musical theme, the same as the figure, the music listens to it once, and you are in the first time about retaining verses or parts of the melody, to the third time that you listen to it, put away the recorder and you are copying the letter of the musical theme that you have chosen faithfully.

Requesting the help of somebody that can read you a hundred (100) words of a book, of those hundred words that he read you already should, with the method explained in the examples of the figure and the melody, you can retain more than fifty (50%) percent.

All this is really required, because when entering to vibrate with the alpha waves , and in contact with a dimensional being, this will give you a develación, either by graphic, in sound or even will give you a fraise that you should bring in suitable form to this physical world. When you have dominated all these points, that is to say to have a good concentration, we can already aspire to carry out the complete meditation.

Blue Book: The Path to initiation

Offering a daily bathroom, the toilet is of vital importance, even if an environmental essence a perfumed essence is used. With more reason we can use that essence and to spread us a little in the body or the tunic that we use. Not use strong colors to meditate, it is necessary to use clear colors, the same thing the color of the room in which will meditate, should be colored with clear colors. It is pursued that garments don't exist hanging, that many people are not entering in the place where you will meditate. This practice is recommended to carry out it to the same hour and the same place and not to carry out it fed up with foods. You should never practiced the meditation before three hours like minimum of having eaten, with the full stomach it is not advisable this practice.

Meditation:

Is that state in that we are outside of this physical three-dimensional world, and we enter, we can say to a fourth dimension. To a parallel world to this, that is to meditate. But there the **ecstasy** that is the seeing or contact with the dimensional being that we have chosen or it has contacted us.

The retrospection:

Consist in that after meditating, when we open the lids, when we already return to this physical world, we make the introspection, to know what we meditate, in what places we were, and what we were doing during the time of the meditation.

We have guided that for us to remember well, the sounds **A** and **E**, **they** are sounds that we listen already in a child of months, they are sounds momentous of the soul and they allow us the memory of what we have just meditated, they are the sounds **AE** and **GAE**

The meditation it is really a basic food, extremely important for all esoterist, it is the real road through which you can achieve the psychological transformation, we are speaking of the breakup of the capital sin or defect of psychological type.

Blue Book: The Path to initiation

Only through the meditation it is that one can study the laziness, the envy, the lust, the anger, Etc., in all the manifestation levels. Explaining will already be later on or deepening more this topic.

Next we will make a synthesis on the practice of the meditation, annexing in the seven points, the factor **Reflection**.

The suitable meditator is one that can become independent of the self-centeredness like a true esoterist (Esotéric=Thing inside the man. Exoteric = The secret thing outside of the man).

A great difference exists among these two currents, the esoterism looks for the awakening or location with practical related with its psychic or organic same systems, he makes it through sonorización or mamtralización of sounds, overwhelming sounds that it is able to play the key note of a certain magnetic field. The exoterist looks for outside of him, the form of waking up its psychic abilities, uses the seed of the caldron macerated in drinkable alcohol or rum for example, he takes this preparation to exercise the clairvoyance, similar to that they made the God of the antiquity equally Dionisio or Bacchus who sought to reach the divinities for means of the wine and the tobacco, they accustom some groups in Colombia to use in infusion the called plant **Yagué**, to reach contacts with forces or entities. Meanwhile that the esoterist awake the clairvoyance mamtralizando the sound **I (iiiiii)**, placing the body in position of squatting.

The meditation is the path that allows to investigate all these queries that are pointed out as big mysteries and enigmas until the moment; among these queries we have: Who are we? Where did we come from ? where do we go? Which is the purpose of our existence? Where friend reader was you a hundred years ago, and where will you be in a hundred years?, these they are questions that are unveil by means of the superior meditation.

Many prayers, pictures and images allow us to enter in the world of the meditation, but many pictures don't have their logical explanation, some can date behind of centuries, and we only have left a query, the one which, through the meditation it is very possible to transcend and to go more further than that picture. In 1997 invited went to San Rafael, in Magdalena's (Colombia) Department, walking in the surroundings of that town, I found

Blue Book: The Path to initiation

stones with a weight of more than five hundred kilos, small stones and big stones form an oval of about eight kilometers, it intrigued me, not so much for the form, but for the constitution of the stones, they are made of sea elements, snails, oysters and marine different elements. The curious thing is that the sea is 280 Kms distant of San Rafael. I left this place and in the dawn I was able to carry out a meditation, for that which I used a piece of this stone, that is to say the Zen method, and I carried out the experiment, today we know that there was an antediluvian civilization that inhabited this area of the Magdalena. Thanks to the meditation I have investigated a great number of enigmas like the triangle of the Bermuda , Atlantis and others. But there are groups of people that advise not to practice meditation, because as we are in a continuous of movements era, that is to say the Era of Aquarius. It is very certain the Age of Aquarius is a Re-evolutionary time, but it is not against the meditation, meditate allows us to isolate from this physical world, but it is not necessary to practice meditation like a form of escape of the problems or ailments of this three-dimensional world, this would be as taking a sedative pill.

In each meditation practice it is possible to investigate an objective, they exist the elementary meditation which is similar to the reflection, in the superior meditation we enter in contact with forces and intelligences of superior order depending on the grade or psychic state called Mega (Million) that we relate with 13 cycles per second, it is a state of agitation, despair or impatience and it is related in fact with the neurosis or hysteria, in that state it is impossible the soul illumination , is not possible the illumination of our **real Being**, since the Being flows with harmonic (patience, love, peace) cycles and these only vibrate in a state of three (3) cycles per second (Alpha and Ultra). It is logical that to arrive to a state Alpha it requires going for states Gamma, Beta, Teths, Delta and other psychic states.

The relaxation is what allows the harmony of these cycles and it is of understanding that a person in deep dream is in a Teths state, that is to say 9 cycles per second. As an image is worth more than a thousand words, we will save those words with the following graph:

MEGA

13 cycles

Blue Book: The Path to initiation

GAMMA	11 cycles
TETHS	9 cycles
BETHA	7 cycles
DELTA	5 cycles
ALPHA	3 cycles
ULTRA	1 cycle.

If somebody doesn't know how to meditate, and decides to begin in the practice, at the beginning it won't aspire to arrive to a Alpha or Ultra state, it is possible that only it arrives to a state Gamma, but, little by little, in their continuity in this majestic practice and of relaxation, it will allow him to harmonize their psychic state, the practices of the meditation goes bound to the constant work on the bad habit or capital sin, have present friend reader that the Ego, is manifested when the body is tensed, when it emits its cycles to more than ten per second, this means that it is not advisable to practice the Superior Meditation, when the Capital Sin possesses full domain on the practitioner, because it has happened that the superior intelligences trust him a message, but it is distorted by the ego, in this form he gives it to the humanity.

It is then logical that depends of the purification of the senses, the omnidimensional appreciation The reflection is different, because in this contact is not looked for with superior intelligences, but the location of the body (Asana) and the mental stillness, the reflection is the initial stage to reach the meditation and it is very common this practice or meditation type,

Blue Book: The Path to initiation

seven meditation types exist and they are related with the seven rays of the creation, it means that each initiate vibrates with a meditation type, through which is more easy the canalization of their messages. We say their messages, because each human being possesses great quantity of messages in his akashik registrations or cosmic ark, and this is only possible when the initiate is able to diminish his psychic cycles and it is able to contact these messages.

We aspire to that each Zigk student, practice the deep meditation; when saying Zigk student, we are we referring to each person, since the ray Zigk is an energy that has descended to the seven Kingdoms of the nature, it was impregnated in them, action that happened in the theocratic regency of Libra, year 27 of aquarium (1988). All that are able to channel this ray, which is related directly with the Kingdom mineral, metallic, vegetalum. To a vegetarian it is more easy to understand, this doctrine body. To the carnivores it is they more complex because to channel the teaching with the mind (ego = Thought). The vegetable feeding allows to channel with the brain (Ser hebrus = Imagination).

Among the diverse meditation types we have: Zen, Shamádika, Nirvánika, Genérikum, Yoga, the meditation Zigk, depending on their ray should begin this way the practices, but we can begin with the elementary meditation, because it is organized for a person that has never used this type of practice. If you, friend reader has never meditated, follow these instructions sincerely:

1. Wear a dress or tunic of one piece, as much as possible that it is non costured, that is to say a mantel and that is not tight.
2. Destine an unique place to meditate, in the room should not have garments hanging, neither extravagant scents, it is advisable to purify it with incense, but don't do it in the moment of meditating, make it before, like three hours earlyier, so that the fume doesn't affect this way the breathing and disconcentrate you. Every hour is good to meditate, especially of 1a.m. at 6a.m.
3. Dont practice with the full stomach, have present that the digestion has a minimum duration as of three hours, what maintains in tension the body because is working in the metabolic process, allowing the ego so is manifested in this practice, the dinner should be slight.
4. Get a Safú or cushion of meditating, are not advisable the seats that have angle, if the initiate is a little sick , use a rocking chair (Without angle). The

Blue Book: *The Path to initiation*

Safú has the measures that it possesses our waist approximately between 33 and 42 centimeters of diameter, for 12 centimeters of altitude, it should be made totally of cotton. Seven steps are fundamental for this practice.

This, as all occult practice, it should be made when their essence and purpose have been understood, never for imitation, a very important factor is the health. The initiate should disintoxicate the organism and to vitalize as minimum the sanguine, digestive and nervous systems. The infections in the skin (Rash) or any other agitated symptom can injure the practice. The initiate should take a bath daily and to be changed clothes, if it suffers of arthritis it should be treated, since the position of the body in meditation doesn't have time, it can be one hour, like it can be whole days in meditation (a Brahmin). The disposition should be total, it should not exist commitments neither psychic interferences, avoid the maximum to see television, since this creates images or effigies that are recorded in the subconscious and they influence later on in the practice.

Asana: It represents the position of the body, according to Hindustanis, 84 different positions that are related with the rotational order of the Star Uranus exist. An Asana is not any posture, it is an occult position, through which are organized the lymphatic plexuses around the Solar Plexus and they allow to remain per hours in that position, we won't use those 84 positions, with those that we guide in this book are enough.

Before the Asana they should be carried out distension exercises previous, the therapeutic technique of Shiatsu (Presupuncture), allows us a better fluency, but if don't know this technique, practice the following exercise: On foot, parallel hands with the body, inhale to the moment that goes raising the hands toward the sides, slowly uniting them in front of the pectoral maintaining the breathing, remain in this position sustaining the air, to exhale it takes the left foot forward and the hands made their initial position. Repeat this action alternating with the right knee, repeat this exercise for three times with each knee.

On foot, barefoot, intertwine the fingers of the hands up, the thumbs should be touching, take the left foot forward, support him in the left lateral part, trying that the plant of the foot is a point toward inside, rest the whole weight

Blue Book: *The Path to initiation*

of the body on that foot, the right foot should be touching the floor with only the fat finger, this psychophysical exercise is carried out alternating with the breathing, it is inhaled when will take the step and it is retained when leans on the weight of the body in the corresponding foot, later on exhales to take the next step. This walk is circular and it is made in the sense contrary of the pointers of the clock, with the inclined view and directed to two meters of distance of its feet. The distance to travel should be minimum of 22 meters. At the end of the journey you will go straightening the feet, in such a way that the last three meters walk ordinary.

Another exercise consists on being standing, to place the hands above the head, with the hands up, to inhale, to get up the left foot from behind as if the heel was to touch the gluteus, hit softly the floor with the tip or base of the fingers while you retain the air, exhales and repeat the same exercise with the right foot. In each alternation take a step, it is an Zen psychophysics exercise that is carried out walking. Anyone of these exercises is carried out before entering in meditation.

The organs announced previously are of importance in the relaxation, it is necessary to dedicate to each organ like minimum 30 seconds, like complement to conquer the relaxation; On your feet, weighing the arms to him but high, now tense them with all their forces sustaining the air, now distension them and allow them to fall for their own weight, as if it was about sleeves of shirts, weighing the left knee to the highest that you can, inhale and tense strongly, then loose it and leave it that falls for their own weight.

Place to three meters high any hanging object, go to bed and look at the object fixedly and after two or three minutes gets up to the maximum speed that their body allows, give a jump and touch that object, be lying again and repeat it three or four times.

Have present that is in the meditation where you will enter in contact with other forces and this depends on the relaxation, since in this it is where we will diminish the psychic cycles of states mega to ultra.

The concentration is a neuralgic point that is related with the domain of the mind and the discipline of the senses. It is necessary to learn to concentrates

Blue Book: *The Path to initiation*

otherwise on an objective point it will distort the practice of the meditation, for it one has to educate the smell, the taste, the tact, the audition, the view, Etc.

To develop the sense of the smell it uses twelve odoriferous essences, number them it relates each scent with a number, and this can make it in a friend's company or of another student. Already close the lids and in the table the essences numbered, request to the collaborator that gives to smell one to one the essences and in disordered form, at once you go numbering the essence that had just smelled. We should guess right as minimum seven and to go progressing until identifying them all (twelve).

For the audition we request to someone that reads us an unknown paragraph of a hundred words. We should be in a *safú* or armchair, relaxed, let us listen the words for the first time, retaining most of these words, past three minutes, request to the assistant that repeats us the paragraph, in this occasion we will corroborate and memorize well, in total are three times, then use a paper and pencil and write what you were able to capture that as minimum it should retain 50 words, if it retains less you are not under conditions of practicing the superior meditation, but you can arrive until the concentration, when you have dominated her fully, you will already be in condition of taking the following step. Also you can practice with the letter of an unknown song.

For the taste you will make the same practice as that with the essences, only that is with twelve flavors in this occasion (strawberry, Mint, Grapes, Etc.)

For the Sense of the tact, use elements or different surfaces, stones, woods, leaf, Etc, you will come in the same way like with the essences.

For the concentration it is advisable to enter in a room where there is only light of the flame of a candle, which should be to a meter of your face, look at the flame fixedly for three minutes, subsequently place the hands in form of concave, like it will load water with them, cover both eyes totally, you will notice that the form of the flame should be reflected in its mental screen, while later it disappears, what indicates that you look at the flame again you will make it for 4 to 5 daily times.

Blue Book: The Path to initiation

All these exercises should be practiced daily, as well as we carry out other activities, we should discipline ourselves in the development of these practices, let us take out time to relax us and to concentrate and mainly for the domain of the Asanas. When we speak of the relaxation, we should clarify that we should make it to each instant, example, if you go in a bus, or if he waits somebody, practice the relaxation because of this the victory of the meditation depends in great way.

We want to emphasize that the reflection is the hall of the meditation; it is possible that in a meditation practice we only arrive until this stage and it is here where you should intone the mamtric sounds that serve us as bridge to arrive to the deep meditation. Among these sounds we have, Shiva, Sésamo, Vishnú, Panclara, AUM, TAUS, Etc., but it is of understanding that each who it possesses a sound or internal own or singular constant. These they are intoned lengthening each vowel, accentuating from consonant to vowel.

The meditation is the final magistical stage of the experience, it is the trip that we make through the time. The total disconnection of this physical three-dimensional world. The Hindustanis called it **Shamady** and furthermore theres the experimental Ecstasy, areas where the maximum happiness is experienced, because the ego doesn't exist. The meditation doesn't have time, many Hindus practice for whole days. We can begin the first days and in oneself position for half hour, but in less than six months you will be able to practice 2 hours.

Later on comes the retrospect that consists on locating all that lived internally, from bringing to the physical world the essence of the spiritual or soul experience. Before opening the lids it intones as soft mamtrams and calmly the sound AE GAE or the sound ANTIA, you will intone it for three minutes, for that it is not necessary to raise the voice, somebody that is to three meters, would not listen to us. This allows clarifying the experience. These sounds can also be used after the night dream.

The meditation is the key that allows us to connect us to our magic presence and it is the one that allowed the biblical writers to write for us. And it is

Blue Book: *The Path to initiation*

through the meditation like one can understand the Bible or any sacred other book. Not seek to understand the sacred writings while this in states psychic mega or gamma, state of tension or agitation, because it is impossible to understand them.

The meditation is the daily food of the initiate, and it is the practical form to reach the illumination in this road toward the final liberation.

All the Great initiate that registers the history of the primitive esoterism they have practiced the superior meditation, and in our days from the childhood until the senility can practice it. Among other benefits found in the meditation the following to:

- .Equilibrate the life
- .Transforms the falters
- .Foments the energy
- .Illuminates the Soul
- The personality acquires a good image
- .Proportions value and trust
- .Permits the transformation of the self-centeredness
- .Impedes cheating and being cheated
- .Drives away the neurosis and the hysteria
- . Maintains us in peace and in communication with God
- .Reestablishes the health
- .Permit us to take the exact determination
- .Rejuvenates
- .Don of discerning

We wait, friend reader that you take this chapter of the meditation like product of the real experience and practice of the meditation, not like one more theory on her. What the Author narrates in this chapter like in all the book, it has been verified for dozens of people that have put in practice without hesitating .

THE STATES OF THE SOUL

“Word of silver is advice of the Teacher, and word of gold is the one Who it looks for it and it continues.”

As it is known we are a very organized trio of: Matter, energy and soul, our matter is conformed by nine organic systems, those which at the same time are related with this same organization. We have nine systems:

Circulatory	Breathing	Bony
Digestive	Endocrine	Diuretic
Muscular	Nervous	Lymphatic

The three systems that are to the left are totally physical, those of the center are energetic and those of the right are of the soul. The physic organs are those in charge directly of our physic organization, while the energeticals are those in charge of generating the vibratory principle and that the possibilities of our soul evolution are in the final systems, since the diuretic system (Genital-Urinal-sexuality) generates the hydrogenic order required, which is channeled finally for the lymphatic plexuses (Pequet cistern, plexus celiac plexus, solar Plexus) depositing them in our medulla or akashik register that uses the celestial Law in the partial trial.

As in the like in the physic part diverse systems exist and in the energetic seven vibratory grades exist, our SOUL part configured by The microcosmic White fraternity to which belongs: **The Being Gnus, Spirit(English people calls it Holy Ghost), Monadic Spark, the Hydrogenic Essence, Etc.** The soul that today we possess is called Human Soul and we were sent to this world earth by our **Divine SOUL** in the superior worlds of the matter, in the superior plans of the soul it is where is the **Great Universal, Absolute blaze or Creative Father**. To which we call Jehovah, Allah, multiple names according to the culture. That is our origin, there in the golden sphere golden resides the **Divine Soul**, who in fluency with the Celestial Law sends to the earth their human soul, that is to say, YOU friend reader, to prepare through the hydrogenic order (genetic waters) which are the margin (support stone) for the development or auto exploration of the human and divine wisdom.

Blue Book: The Path to initiation

We are in this physical world like direct representation of the material part that constitutes the trio (Matter, energy and soul) what indicates that it is necessary to us the spiritual principle or image of God because, to image of God we were made, obviously meanwhile we don't have Divine Soul in us, we are Soulless, and as consequence our actions are more human than spiritual, that is to say, self-centered or sinful.

The Divine Soul **is bound** to the physical body through **Zuluagplasmatic cord**, in us resides the Human Soul that is bounded or connected to the physical body through **Protoplasmic cord**. The Divine Soul and the human soul fluency produce the vibratory principle which can become positive or negative, only at the end to be neuter.

The human organism stays in state of health or state of diverse pathologies, the same as the energy oscillates in seven scales or levels, these are 18, 21, 24, 27, 30, 33 and 36. In these levels stays our vibratory rhythm, like we already said receives impressions of the Soul part, and the physical organism, it is the neuter part, any Soul or physical action influences it in the vibratory ascent or descent.

In the Soul part they are different grades or scales that are represented in grades before the celestial Law, these grades they depend singly on the human soul, and they move from the first to the seventh in the following form:

1) **BACHTAR**: It is the first soul grade, a fallen soul, in evolution or in involution. From the Universal Blaze or sphere gilded in fluency or in accord with the Divine Law, the Creative *Father* separates of the Blaze a little flame, constituted as Divine Soul, which dwells in a Star or Planetary Sphere to which will represent, that flame sends to the earth or even, another planet, a 33% of the values that constitute it in 100% manifestation or spirituality, but that 33% doesn't arrive directly to earth should enter by a regencial portal, one of the seven principles of this solar system, and it is where the ray of the Human Soul is determined, it is clear then that we all come as bachtar in the first incarnation and we enter initially by the theocratic regency of the moon.

Blue Book: The Path to initiation

2) **KATZY**: It is the second Soul grade, when beginning the incarnations the lawyistic order, in company of the angels of life they embody the soul in seven incarnations continued by the portal :

Lunar-Moon, it is impregnated of the **Psychological ray**, they continue seven incarnations more by the portal of

Mercury that corresponds to the Ray of the **Medicine**, and continues that regencial process,

Venus: that it is the ray of **Love**,

Sun: that it is the ray of **Cosmic wisdom**,

Mars: That it is the ray of the **Force**,

Jupiter: Ray of **Justice**

Saturn that is the ray of the Mystic Transformation (**Death** of EGO)

Starting from the incarnation 49 that it has gone by all the rays, and it has been impregnated in all the psychic levels the rays are conjugated, depending on the Law of Karma; when Human Soul as entity that has a **mission** to complete and that it is **not** in fact to have children, to have car or to marrie. This climbs at spiritual levels and you goes for the paths of the divinity, that expression is enough to arrive to this grade of Katzy.

3) **KUDZY**: Third grade of the soul or spiritual.

A person that carries out unbecoming actions, after their disincarnating, the lawyistic principle sends him to take a new body, but in the planetary portals, for where should enter, has to have rejection, what projects to the angels of life to look for another portal and it has happened that there is a rejection of the seven continuous stars, for not giving entrance to earth, but the universal agreement universal reunites the seven portals and all together embody the projected soul, that is to say; they divide the load among all, this soul belongs to the **Septenary Ray**.

The sphere of Kudzy is organized by souls that have understood their presence in this world and that they have transformed their actions positively, so much in chastity as humanitarianly, these actions are transmitted to Divine Soul to through the Zuluagplasmic cord.

Blue Book: The Path to initiation

4) **GURWARK:** Fourth grade of Soul progression.

Not only they belong to the septenary ray the sinful ones, but also those souls that require from the regencial competition of our solar system that they require to flow with the seven principles or basic planetary vocations, to this height of the Soul grades, are where it is impregnated the color or Auric tonality. Gurwark has to go by seven colors, levels in the following order: **Gray, blue, green, red, white, yellow, golden Gurwark.** When arriving to Golden Gurwark he receives the initialization of Hakadik.

5) **HAKADIK:** Fifth scale before the Law, in this state the lawyistic subdivisions exist. The minor initiations and the mayor initiations. The hakadiks when arriving to the seventh soul scale they transform into a **Mahatma**, and in this grade ascends to the Mayor principles or Mayor mysteries. All this depends on the hydrogenik order that the human soul gives in these actions or these scales.

6) **MASTER:** Sixth Lawyistic order. To achieve the Master grade the Divine Soul has traveled all the grades and creates a spiritual stability. The Divine Soul remains together to the matter by the Zuluagplasmatic cord. In the last grade the human soul Egocenterlly can continue and make descend or involutionate its soul and this can be conscious or unconsciously. It is conscious when by a system the person discovers an inferior grade and knowingly of that inferior grade makes unbecoming actions. It is unconscious when the person is born with this grade that conquest in previous lives, but that in this existence ignores it or denies it. In these cases and of common agreement with the Law the Divine Soul is able to block the morbid or subjective fluids that arrive to her and ace to avoid her fall. In this scale of the Masters Soul crosses for the solar and lunar initiations. The lunar ones correspond to the sound of the Master heart. And the solar initiations belong to the sound larynx that is to say the divine verb that is **Maestro.**

7) **DHARMARAJA:** Seventh soul order . This is the final stage of all spiritualist, **The Crown of Life**, the true mission that we all should complete. Is in fact to conquer this stage to which you arrives to earth, by the way of Sanctification in a overwhelming form, or by the way of the sexual alchemy.

Blue Book: The Path to initiation

Praise to those souls that have arrived to Dharmaraja by both paths since allows them the two scales: Shamdik Dharmaraja and Akashik Dharmaraja. Shamdik is product of the sanctification and Akashik of the Wisdom. Only the Sexual **Alchemy**, allows to embody the Hydrogenik **Principle** required to penetrate the **Akashik Registrations of the nature** and to reach the Wisdom, this is important because the sanctification and the wisdom should go balanced, since an ignorant saint cannot cooperate completely to the humanity. Neither a wise tramp can be exemplary. Independently of the spiritual state in that is the initiate it should not confuse the **modus vivendi** with the spirituality. The economic part should be organized, not mixing the two cases. **All spiritualist should have her profession or occupation to earned a living legally**, a Mayor grade Mayor comprehension of this part. For nobody it is a secret or ignores that a lot of people enters to preach the gospel for economic convenience . The idea is that all spiritualist has an art and can contribute to its own institution although he/she is the director.

Although Dharmaraja is the crown of life, it doesn't mean that other grades don't exist, other grades exist, the Hypersublime grades exist like : **Angels, Archangels, Principalities, Virtues, Imperiums, Dominances, Thrones, Cherubs, Seraphs, Vajratawas, Logos and Kabires**. In other senses the econtramos with other names like they are: **Elojim, Bienechin, Hasbienin, Aralim, ophanim, they can be Khados or Hakados**, in all ways they are hypersublimes grades to those which a Shamadik Dharmaraja can aspire to embody.

These are the grades (hypersublime) that embody consciously in this physical world, only the souls belonging to these grades they can choose the country, home and time in that will embody. This is something that we cannot make those that belong to the previous grades, since we return to the earth only in unconscious form and mainly to a karmic process and of course to evolve and to wake up the conscience.

The Divine Soul is our glorious part *is **our Living image of God***, for this reason the urgency of embodying it, while it is not with us is like the apostle Saint Paul said we are adoptive "Children of God".

Blue Book: The Path to initiation

The teachings that today I transcribe is obtained through the **adventment** of our **Magic Presence: Zigk Gnanak. An Adventment** is the partial or radical incarnation of our great presence which is announced by unveils (or revelation), as for our experience, the first messages were received by internal encounters, which are given during the hours of ordinary sleep. In the tenth hour is able to discern the auric or magnetic field of our sacred presence, we see IT in the space three meters approximately of our human psyche, of that blue green color AURA, the answers that this being requests come, subsequently in an act of sublime discharge he is integrated to the space. In some occasions, depending on certain cosmic meridiagnus, it guides me on deeply spiritual messages that should give to the humanity.

Later on, I communicate to the members of the metaphysic group that we re guiding, we meet to adjust a date and in the next internal encounter with the Guru, it is accepted by the group. The day of the adventment, I get ready psychologically and at nutritious level, we enter the sacred place, they are carried out prayers and songs at the time that I begin my psychic process which begins with the physical and mental relaxation, the final stage of this process it is to intone the individual sound, that is to say, the father's **name**, the name or singular **unpronounceable mamtrams**, which opens the coordinate or channel, through which is given slowly, I observe in the space the unmistakable **Christic Light** of our Magical Presence. If there are group determinations I introduce it to my Internal Master, the guru goes into in this physic body, while this human soul moves to another dimensional order, to receive instructions, either at personal singular level or it for later orientations to the group.

In few occasions the Soul fusion has been given, that is to say divine Soul and human soul, only in these cases I make conscience otherwise of all that happens in the adventment, it is necessary to wait that all that happened in this third dimension passes to the second dimension and arrive at first dimension and then it takes in its return when going for the third dimension, again, in search of the seventh dimension or genesis world, there I witness the scenes again and it is when I find out what has happened directly. As illustration we see that it is exactly what has happened in an adventment.

Blue Book: The Path to initiation

In this part the testimony of a brother that explains clearly what happens in the adventment:

Before beginning I want to clarify that an adventment is NOT spiritism neither channeling nor canalization. The advent of a celestial Soul it is a blessing for the body, if we took the vital signs (heart Frequency, arterial pressure) a state of absolute harmony it would be noticed, with the values that we would say those in medicine more basic or elementary, it is noticed a state of immense relaxation and nonpareil calm. The movements of a incarnated Master is like TAI-CHI style slow, leisurely, with grace, all movement has their its meaning. It is impacting to see how a Guru you kneels before You with only pronouncing your internal sound, indicating the respect for all human soul that has their Great Presence waiting for, nonpareil humility with benevolence patience listens the concerns of the people and with universal knowledge answers, amazing everything who listens, the presence of the ego is not detected in any form, in short it is the living example of **Christ, Budda, Krishna** before you.

“One of the queries more common that gravitates in our existence; it is that of how to communicate conveniently with God. Amid countless realities, little or big of life: labor activities, studies, projects, happiness, hopes, sadness, Etc. Everything transforms into occasion to listen the voice of God, although it belongs to sages to know how to interpret their language, until ending up understanding that making of our life a prayer, we can find that stable communication with the Creator. I meditate then in the Danish thinker's wisdom Kierkegaard whose conviction was of a great magnitude, he says: *“The prayer establishes a true relation, where it is not God who listens what is requested, but the praying man who listens what God wants, when its prayer is permanent”*. It is in the constant action of internal vision as is discovered the presence of God, in that microcosms man that it constitutes our being's creation.

Universal Zigmism, is that revitalizing and sublime force that latent in all living creature, which not drives us only to the conquest of that permanent communication with the creator, but toward our total unification with HIM, for means of the integrate-action of our human soul and our celestial soul.

Blue Book: *The Path to initiation*

For these apocalyptic times , for those that are passing the inhabitants of the terrestrial sphere, in which is guided the humanity toward the search of a way to Peace, of Light and Love that it drives us toward the reencounter with our interior essence or Divine Soul; the Zigk order, gives rules for the total ericcion of our life by a spiritual path, through the venerable Guru Zigk Gnanak who for the Creator's benevolence and before the urgency of sending salvation messages to us, its children, has sent a celestial messenger, source of universal wisdom who as balm of peace, it alleviates our anguish or uncertainties; gives you precise keys to leave that unproductive muteness that drives us to the darkness, to the abyss in a radical form. In the constant practice of these rules we will project our being toward the spiritual true realization, that which constitutes the real purpose of our existence.

One of the reasons more powerful that induce me to share these lines with you friendly readers of this highly spiritual wonderful edition. It is my deep feeling with regard to the experiences so transformatives in my existence that I have lived from the year 1992, moment in which entered to be active part of this glorious Warriors of the World Salvation “COSMIC ORDER ZIGK” , that sharing with the Guru Zigk Gnanak, filling with Light and Peace, the path to those who had the opportunity to feel its presence amid us for divine grace, people of different professions, housewives, students, journalists, scientist and investigators of the cosmic wisdom and esoteric of different places of the terrestrial sphere, we become unified in only one feel towards this being, to listen and to capture with all our physic and intern senses , the messages that of heaven to earth descended with HIM, in each one of the advenments we are always able to verify that in its expressions it was latent the Creator's Sacred Verb, the highest expression of the divine spheres from the universe through the asana or different runic positions varied according to the didactic given, according to the different celestial forces that were descending to collaborate to the crystallizations of the actions done.

They are countless the overwhelming manifestations of the eminent Guru Zigk Gnanak, through which we are able to really feel that his actions are celestial, since in our human and three-dimensional state, we cannot carry

Blue Book: The Path to initiation

out, for example, the **transformation of the water in pragnus**, since is a work of high spirituality in the one which the elements more subtle of the nature, coming from hypersublimes regions, such as Akash, Pragnus and the Ether, for means of the energetic and spiritual force of the guru Gnanak, integrated the logos or regent to which has been made the specific petition of cooperating to the pranic precipitation, more the masterful action of the elementary ones of the nature and the salamanders of the fire. This whole wonderful concatenation accompanied by prayers and chants of the people show up, they unify in the solemn instant in that the teacher requests the empress (priestess): "Cut a flower" and later on with their language runic and with the soft pronounciation of Mamtrams and celestial invocations, the forces descend to the altar of the Gurwark or temple , in which are carried out the actions of Adventment of this glorious being.

The teacher later on requests the empress: " aquas order", that which indicates, to pour waters in the present chalice in the altar; then the chalice is taken to the highest and it is where is carried out the action of crystallization of a subtle and intangible substance, sacred liquid, which helps us in our physic, energetic and spiritual evolution, since we have had the glorious opportunity to receive the Merkurian pragnus to recover the health, Venus pragnus to strengthen in the love and will, Martian pragnus to receive the force of the logos Samael and of the Justice to balance our internal scales, Etc.

Later on the people, overflowing of faith and jubilee, with reverence for that sublime instant, we carry out an action of thanks to the Guru Zigk Gnanak.

Another of the actions that have left indelible print in my being and in the psyche of all the present, I dare to affirm, given the resonance that I have felt in the Zigk people, is the transformation of the vegetable reignus in mineral (Gold and Silver) what is denominated **AURUM and PLACTUM**, which are mineral that possess a vibratory high level, which people that take it get, they can carry out healing actions through them and with the due precaution of not making infractions before the Celestial Law, since there are people whose illness is karmic. The Aurum and Plactum are vital element of aurica and energetic proteccion; who possess them, are people to which the Guru has given them some specific orientations to carry it in a conveniently form .

Blue Book: The Path to initiation

This glorious transformation action carried out by the Guru is, for my feel, worthy of standing out, since the Master requests a plant (the plant is almost always solar, that is to say in ray form) and he requests the empress a sharp object, and taking one of the rays of the plant or one of his leaves, divides it in form several so leisurely (Since their moviciertos or movements are in THAI CHI form), short pieces in specific forms, for example pyramidal form or simulating the leaves of the trees, and later to the realization of runes and invocations to the celestial forces, poses his hands on the vegetable figures and with the whole imperium that is conferred to him by the Universal White Fraternity and the Theocratic Regency of Acirfa, deposits each vegetable piece in a white cloth, moment in which the people carries out prayers to request the transformation of these elementary in mineral. We observe as the teacher takes slowly in one of their hands the sword and the raisin for the septenary fire that is lit in the Sacred Altar then carries out some Asanas and in reverence action kneels in the presence of divine beings or forces that have descended for the realization of this wonderful happening. Then he poses the sword on the cloth and he carries out the delivery to each requesting brother of this action; the vegetable already became Aurum for the empresses (women) and in Plactum for the Emperors (Men).

The people kneels before the majestic of this instant and we give an action of thanks to the Creative Father to allow us to be worthy of receiving in our habitation the presence of a Divine being that in each one of his adventments to the earth gives us the Universal wisdom that the humanity requires so much.

Each encounter with the Teacher is every time more transformative. In the different circumstances that we find in life, The orientation and help that we require , the guru has help each one of us to find our own answers.

To share a case of a healing to a sister that is for me, something specifically impacting, since never bean seen something of such a magnitude, at a healing level.

One of the sisters of our Order, was suffering of stones in the gallbladder, this caused anguish and pain was sent to the hospital, where they recommended her surgery of urgency, in the face of the impossibility of conservative treatment (Drugs) since were very big said the medics or

Blue Book: The Path to initiation

doctors . This sister solicit the guru Zigk Gnanak, his sacred mediation before the teachers of the universal medicine, so that the health returns to its being, for means of on a intervention at etheric level of the affected organ.

Before the application of this sister and with the due permission of the celestial powers and of the mercurian regency of the Logos RAFAEL, the Guru received the imperium to act. It had to be a mercurian day (Monday), the Zigk people, congregated around the Guru and the sister in treatment, we request in our prayers that if it was worthy of receiving the healing that the celestial law permits it, and that the Power and the Celestial Grace arrive to its being through the Presence of our Celestial messenger's Zigk Gnanak. (its clear that all masters o gurus are messengers of the heavens, all master have to get permission of the law before any action)

The Guru requests to the sister to lye with her sacred vestments in the formasol (Sacred Structure similar to a platform, elaborated in natural material, fluidly vibratory and located in one of the sides of the Temple with various purpose one is the etheric interventions). Once lied in the formasol, the guru goes toward her accompanied by the empress, to who requests in different moment of the ritual, flowers, natural fire and sacred oil.

The Guru supported in the cane, walks in the temple until arriving to the place where Formasol is, he gives the empress the cane and he requests her the oil, with which impregnates the sister in specific places of its body, at the same time that he carries out some Mercurian Divine invocations. Then it submerges a flower in the water and impregnated petals with water, sprinkles the sister in the whole abdomen . The natural fire remains in ignition over the head of the sister who is in deep relaxation. The people remains silent and in reverent attitude full with faith and thrills, they contribute to this action.

The teacher with their hands posed to but or about 21 cms of height on the body of the sister, he carried out movements of inside and out, in extraccion signal , and taking a flower in their hands, the turn it on the area where is the gallbladder of the sister, and posing the flower in that place, then rising it up requesting the empress a transparent chalice with water, and when posing

Blue Book: The Path to initiation

the flower on its border, we saw clearly descend a stone that of the flower you submerge in the water of glass.

In repeated occasions, realized the action with another different flower and was able to extract of the body of the sister another similar stone to the previous one and submerging it in another chalice with water.

Later on, the Guru ascends to the Altar and goes to the people giving the didactic of the healing of this sister in which explained to us how the celestial Soul of our treated sister, sent delegations or forces through the Guru for **the Stone extraccion**, but at the same time they showed up forces that don't allow the total extraction from her through the guru, but rather is the same Sister who in a singular work had to carried out this expulsion action and then it should convert them to powder for her total recuperation. In satisfactory form, we went observing how our sister recovered her health, thanks to the majestic action of our spiritual guide coming from Acirfa.

The same as these experiences, dear friends of the BLUE BOOK, many have been given, and of such a big forcefulness that the explication escapes to our understanding.

The Divine essence Zigk Gnanak, is in these moments in a partial retirement of the terrestrial atmosphere, is carrying out a missional work in Surugoto (Star belonging to another solar system different to ours), We are an order expanding its wisdom to the whole humanity, so that you friend reader whose heart inhabits the FAITH in the Creative Father and the hope for a better world. So that in not very distant day you can to sit down in front of the Guru and to listen the wisdom from mouth to ears and live true celestial **prodigies**". (**AND ALTHOUGH YOU DON'T BELIEVE IT, ITS FREE**)

All that we have narrated corresponds to the sacred or soul world, but it should be known that not only Divine Soul exists, because everything is dual in the Universe and this indicates that also has a subjective soul totally egocentris or selfcentered. It represents our Divine souls shade, it is us, as human souls the neuter part that determines with the actions, the evolution of these two souls, in the same form as Divine Soul climbs grades before the Celestial Law, the Subjective Soul also has grades in the infradimensionales

Blue Book: The Path to initiation

worlds, these grades depend exclusively on the actions of the human soul, that is to say, **YOU** kind reader.

And everything concludes in their incarnation, what the **Kabir Jesus the Christ** said before this situation is the definition of the human soul, he says: "Be cold or hot, the lukewarm vomited will be", while the human soul doesn't determine its fluency, it remains in the state of lukewarm. If we analyze the Teacher's words consciously, Jesus the Christ, we will arrive to the conclusion that the important thing is the definition or soul location, not projected to coerce somebody, it is not coercible the soul search of the positive or negative pole, since the human free will is respected by the Creative Father, many Souls they have cooperated directly with its mission and they have achieved the location in the positive pole, of these souls we have: **Buddha**; his human soul Siddartha Gautama, **Huiracocha**: and his human soul Arnoldo Krumm Heller. We have to **Aureole Paracelsus** and his human soul Felipe Teofrasto Bombasto of Hohenheim, of equal forms we have Eliphaz **Levi** and its human soul Joseph Luis Constanz, **Samael Aun Weor** and its human soul Victor Manuel Gomez.

All these divine souls have achieved their spiritual erection. However also has existed dark souls that have embodied in the earth, among them we have Marx, Lenin, Hitler, Smiely, Etc.

If we study the sacred writings we find something interesting, it says in Revelation 2:17 *He that hath an ear , let him hear what the Spirit saith unto the churches ; To him that overcometh will I give to eat of the hidden manna , and will give him a white stone , and in the stone a new name written , which no man knoweth saving he that receiveth it.* As exemplary pattern has the **Teacher Jesus**, the one which incarnated the **Christ**, many confuse **Jesus** with the **Christ**, and this is an error, Christ is really an universal force that latent in all living organism, in all living being, Christ is a multiple unit and perfect that furthermore of all the personality and of the individuality. Christ is the Solar Logos in living representation of the Sun, for this reason the Mayan, the Inca, the Aztecs, the Egyptians and others, adored the sun because they see the father Christ in it. Christ is, in synthesis, that seed of which speaks to us the: Galatians 3:16 *Now to Abraham and his seed were the promises made. He saith not , And to seeds , as of many ; but as of one, And to thy seed , which is Christ .* Jesus is a

Blue Book: The Path to initiation

human being, the most prodigious being that really transcended those human states and conquest the total integration with the Christ”.

Friendly reader finally we tell you, in your hands, in your mind, in your heart, in your hydrogenik function, is to erect your great presence or to feed to your disastrous part, it is important that you carry out a very deep reflection on every aspect and define your spiritual life. Don't continue to be a lukewarm in the face of the life, it is important the define, the brother cosmonaut already says it: “He/she chooses the path of the initiation, the one on the way to the right, or the one on the way to the left, however have present that both they are integrated at the end”, **that my brother reader is the White Fraternity** naked reality before the aching humanity.

The difference between god and demon is in grades, not in the essence, Bachtar doesn't necessarily represent a demon embodied in the earth, we should understand that each living creature, while it remains in the laziness, the lust, the anger, Etc. It is subjective, that is to say, it is an elementary bachtar. Our location in this world rests in the transformation of the capital sin, and this is not another thing that to transform the Hate in love, the lust in chastity, the laziness in will, the anger in patience, the vengeance in forgiveness, Etc., the ego is not matter, therefore you cannot kill it, the ego is energy and it can transform.

The soul grades are developed before the Law depending on the hydrogen that Human Soul provides to Divine Soul. A student cannot practice sexual hydrogenization with any woman, so that this sublime action can be, it is required a psychosomatic affinity, but it is not the mind who can determine when or with who to carry out it. Students or aspiring esoteric are known that propose to women this type of practice that is not another thing than a plot of the ego, of the lust to cheat them, result of this, a complete fiasco. The lust has different forms of showing and makes it in diverse organ areas. The lust uses the brain and transforms the person into a poet, when it uses the heart makes him/her feel “love”, and when it uses the sex makes havoc against the morals.

Blue Book: The Path to initiation

The hydrogenization should be guided by a guru or spiritual teacher. It is indicated that seven hydrogen types exist and are related with each one of the magnetic fields that go from the coxis to the brain. They're located as:

Electric Hydrogen	S	3,01
Sexual Hydrogen	M	7,01
Solar Hydrogen	U	3,01
Pranic Hydrogen	A	3,01
Chrístic Hydrogen	O	7,01
Mámtrico Hydrogen	E	3,01
Brahámic Hydrogen	I	<u>7,01</u>

HIDROGENIK SYNTHESIS 33,07

En relation with the development and sublimation of the waters of life, is as its conquered the spiritual realization. A great difference exists between hydrogenization and sexual Alkimia. The first is within reach of the human being with a considerable level of discipline. Alkimia is only for celestial souls, for this reason whenever one makes mention the alkimia it is in relation with Gurus or Divine Souls .

These practices should be directed by a being that had lived the sublime process of the division of the internal waters.

Each one of the human beings that inhabit this world came to fulfill the fundamental mission of being integrated to their Magic Presence. John the Baptist went ahead the path preparing it for the Christ. In a same way it corresponds to us to prepare the path for the Christ's incarnation in conscience. Our Great presence should take active and visible part of the universal fraternity. This can allegorize it with a person that works in a company for minimum wage but he wants to be active partner of the company, the managers demand him certain quantity of money (Values), this makes him to move to another place (he comes off the blaze) in search of that required. If he achieves it, will be part integral of the company.

Our great presence should present values represented in the soul, and sanctification represented in the spirit, this allows it to flow in the

Blue Book: The Path to initiation

ultradimensional world. For this reason he should show up an organized trio of matter, energetic and psychic level. It should be clear that the flame or our soul doesn't embody directly in the human state, the superior hierarchies are organized in seven scales: **Mineral, metalikum, vegetalum, animosus, anibienes, hominal and celestial**, in this cycle of manifestations, the soul evolves and it descends as elementary, it is developed as magnitude or nymph, it arrives to the vegetable state as Devas, to the animal state as an anima and in the human race it is a soul, it is in this state that achieves the full development to the celestial world.

These scales are unavoidable, we all go through all the Kingdoms of nature, waiting the moment to possess the happiness of having a physic and theocratic body, this indicates us that we should give the physic body the value that it has. This does not means that the absurd Darwin theories makes part of ours, our **Essence** has traveled by all the Kingdoms of the nature, but to pass from a plant to an animal, or of an animal to another body we should die. Darwin deviated the orientation that received from his internal teacher, because he affirms that a fish jumping above the waters learned how to fly and stayed radically in the air turning in a bird.

Based on the Law of the 3 as sacred mathematics, they assign to the human soul 108 bodies for their final evolution. Some achieved it in the existence 25, others in the 50, Etc. Jesus Christ genealogy, narrated in Matthew Chap. 1 states that from Abraham until David lived 14 generations, and from David until the deportation to Babylon until their birth, 14 more so that in their entirety incarnated in 42 bodies with a prodigious preparation able to support to a lawyistic God inside.

It is logical that to come to earth, the angels of life have in count the meridian cosmic and astrologic determined, for in the instant in that unites the sperm with the ovule, begins the human life, it indicates that we are not of the sign zodiacal in which we are born but in which are conceived (In the majority check nine months back).

In the first bodies that the Law gave (ten thousand years ago) the egocentric action was null, but through the years, the mind has gone creating them and till today continues creating them, transforming to this star into a world of sufferings, these bad habits or aberrations form the dark soul that is tied by

Blue Book: The Path to initiation

the infraplasmatic cord, as like we have a Divine Soul also we have a dark soul and it was created by the human **mind**.

Each one of the soul grades are related with the seven elements, the seven dimensions and with the cosmos.

Bachtar	1 Dimension	Earth	Tritocosmos
Katzy	2 Dimension	Water	Microcosms
Kutchy	3 Dimension	Fire	Mesocosmos
Gurwark	4 Dimension	Air	Deuterocosmos
Hakadik	5 Dimension	Ether	Macrocosms
Master	6 Dimension	Akash	Ayocosmos
Dharmaraja	7 Dimension	Prana	Protocosmos

In this majestic journey, when the initiate arrives to the grade of Dharmaraja it corresponds to him the unveiling of the seven petals of the lotus flower, to descend to the tritocosmos world (descended to the hells and...) to purify the egocentric scums that remains in the mind of its Arhat, these infradimensional chambers is the dense shade of what is known as the heavens and like one knows, it is not the sky that we see above us, but supradimensionales areas of absolute happiness. This oven of the nature has different scales or chambers and its conscience journey makes it the Celestial Soul in the grade of Dharmaraja. It is very different when the angels of death leads to the crematory oven the human soul for purification, because pure came to the earth and pure must return to the universal blaze, with wisdom con(**with**)-**science** or such which like it left.

To the crematory oven or hell (its really infernos or inferior region) is taken depending on the magnitude of the errors or violations made when breaking the 48 spiritual laws that govern this physic plane, among these laws we have: **KARMA, DHARMA, KATANCY, BALANCE, EMPATHY, TRANSMIGRATION, ENTROPY, CIRCLE , EVOLUTION, DUALITY, KABALA, LIFE, INTEGRATION, INVOLUTION, TRANSMUTATION, RECURRENCE, CENTRIFUGES, DEATH, WEIGHT, HOMOGENIC, PRESERVATION, MEASURES, PENDULUM, NOMADIC, CENTRIPETAL, MOVEMENT, PERSEVERANCE, GRAVITATION, COMPENSATION, TO GIVE, TO RECEIVE, TO SHARE, RECIPROCATES, Etc.**

Blue Book: *The Path to initiation*

These irrefutable and eternal Laws are those that constitute the formation of the life and they should be kept, breaking it brings their complex consequences and knowing them or not the man is the same because the ignorance of a Law doesn't invalidate it, neither can we make the error of denying that ignored for what we know.

Each one of the twelve stars that form this solar system (Moon, Mercury, Venus, Sun, Mars, Humagnolia, Jupiter, Saturn, Uranus, Neptune, Pluto and the Earth) has their registration in the infradimensional chambers and each Law has relation with a star and its vocation.

In general, universal Dharmarajas when they finish their mission in this physical plan, they are isolated to be located in other dimensions of the superior order, some, as the spiritual author of this book, took his physical body glorified to his regency of origin, which is today a luminous body. Those Who are able to be liberated or to be realized in this star belonging to the chamber 13 in a scale of 24 (The stars belonging to the scale 24 are highly subjective) and that a star is considered dense in sins, they achieve a dialectic high grade because to more sins it is more difficult the realization, and in the stars where the sin is minimum it is relatively more easy the realization.

We want you to remember reader that you are not a body that possesses a soul but rather you are a soul that possesses a body, or laboratory (gestum laborat) for your liberation, and we say liberation, because we are prisoners or locked in this star, hence take care of your physical body and provide food for human being, not corps for vultures.

Of you depends that your celestial soul achieves its mission in this world, begin now the internal preparation, for your Christ's second coming in essence and in solar substance. Of you depends that you descend to the infradimensional registrations or that they take you as prisoner to be purified.

If in truthfulness, your intention is walk for the paths of the Real Christianity, the eminent Guru Zigk Gnanak can help you from the supradimensional worlds of the theocratic regency of Acirfa.

MEDICAL SYSTEMS

**“Who is happy with
Little things, opens the doors to
Greater things”.**

From the moment in that the humanity infringed the Laws of the nature, her nature or organism also suffered this lamentable action, affecting the three principles that constitute us. We know that we are organized in: Matter, Energy and Soul. The matter is our organism, the energy it is the energetic impulse and our soul the theocratic order . When the terrestrial sphere was organized and you began the life in the different Kingdoms, the earth was protected by its Magnetic **Aura** known as the ozone layer . From the moment in that you began the **waste of the sexual energy**, the evaporation of this high volatile force is destroying this wonderful energetic field ; the one which impedes that entered the earth the viruses or pathologies and negative things from other primitive stars , with those that we today live.

Of different regions of the space they are arriving to the earth the different types of illnesses or diverse pathologies and before this considerable situation the humanity is defenseless , but the most lamentable part is that many ignore this cruel reality and others combat these serious investigations. In all ways the humanity searches laboriously the form of creating doctors or medics, and these at the same time invent formulas that change as the fashions. Big quantities of medic systems exist, innovations everywhere, all sick person looks for the form of being treated visiting the diverse systems and although they are dozens, they depend, either of the matter, of the energy or of the soul.

Blue Book: The Path to initiation

What is a medic or Doctor?

In the antiquity the medic was a true priest of the medicine, priest of the health, practiced the true therapy; this comes from the word **Terapeia** that means attendance, treatment or medical healing, because it was believed that the illness as punishment of God and the priest of the health like the representative of God in earth to heal. Anybody who cures an illness is a medic, but the true medic should be ordered for heaven's sake, since is the *Creative Father* who gives the medical wisdom and only gives it to who possesses this medicinal vocation. Today for today anyone that wants to be a medic gets to be one, something that in its origin was by vocation. What should be clear is that NO institution, either materialistic, religious or government, etc.; can create medics, what they can do is give people diplomas and to make that somebody that is not medic appears as if it was, they can give permission to treat, even to kill, but never give the don of healing, because this ability is for people that have that divine vocation. When the medicinal vocation is latent in the interior feels the impulse of helping the humanity unconditionally. This means that the Hippocratic oath, Hannemanian or Christic should be completed. This means that if the patient visits a medic, this for eternal law towards the health, is forced to assist him and to contribute to that the unhappy one recovers the health. The cases of abandonment to the patient for lack of money are quantities; we have arrived to the case of commercialization with the health, the humanity's sacred health. Today this being a business for the other part of humanity's. The patient is treated depending of their economic capacities, today per today anyone organizes a pharmacy, with the single objective of **making money** and they admit that it is the same to organize a store or a pharmacy. That humanitarian principle has disappeared, also you can listened in High Schools people questioning: What gives more money, the medicine or engineering, Etc. the humanity should makes conscience of studying the medicine to offer help to her fellow men.

All the systems medics treat the illnesses in their field. We have already said that we are a trio of Matter, Energy and Alma.

Blue Book: The Path to initiation

In the material part we have to the allopath, the naturism and the botanical. These three principles believe that the patient gets sick for affection of a certain organ.

In the energetic part is the homoeopath, the acupuncture, the bioenergetics. These believe that when the organism is sick it is because there is a lowering of the energy in certain organ, or the non fluency of the meridian chi of the organism.

On the other hand is the medicine spiritualistic or religious dogmatic that considers that when the body is sick it is for the capital sin. Since when we give loose rein to the Ego, this feeds so much of our body that reduces it to a bed.

All the systems medics are respectable; we don't seek to combat them, since they complete a mission in these times of pathologies. But we should guide is that some systems are more aggressive than others. When by any means or circumstances the body is disharmonized, use the most spiritual method possible, never allow that they place you injections, these destroy the lymphatic plexuses, etheric plexuses very vital for your spiritual evolution. Avoid to the maximum a surgery and even less if they have to take out liquid of the spinal medulla and /or bony medulla. This liquid is the one that preserves the Akashik registrations or wisdom chambers that are located in your bony system. This liquid is supremely vital to conserve what we know as memory.

Another problem that shows up in the sick person is to **avoid** for all possible means the **blood transfusion**. Is it of understanding that all the banks of blood, only keeps in mind the biological factor of the blood, but they forget the egocentric part and spiritual part of the donor and understand that the Karma or genetic factor flow and reflows through the blood, does this indicate that if to you kind reader, has it taken a life relatively well, can accept a homosexual's blood or of an insane paranoiac? This psychological aspect should be kept in mind because otherwise the patient's psychology can change unfavorably.

Blue Book: The Path to initiation

The medications more favorable are those that are taken directly out of the plants, this should be made with high spirituality, not to split the branches, because the quantity of sap or chlorophyll that it is used are little or big, what is required to motivate to the body is really a tiny bit to activate our organism and to return the health, Those people that use plants for their healing or the one of other, they should have some spiritual compassion towards the plants, that are really living beings the same as us, therefore, in a plant, it is not the quantity of leaves those that will be treated, they can be one or two leaves , and these they should intersect. In the countries or hot areas only can intersect or cut in hours of the morning, that is to say that the plants should intersect in temperature below than 25 grades centigrade's, this is important because in hot sun, like one says, it withers or has tendency to alter the spiritual order of the elementary that inhabit the plants. As much as possible not to use chemical preservative , it is required to take it in fresh state.

They have been in great quantity the cases of improvement and healing that have registered through the energetic part stimulating the energy index. The acupuncturists demonstrated the effectiveness of this convenient science . Lately it has in fact decayed for the problematic of the illness AIDS that with the same needles the acupuncturists seek to do the different sessions and this can really be dangerous or problematic for the patient. The patient that flows with the acupuncture should demand in each session new needles, this is important for not risking the health with these transferable illnesses. Other have checked the effectiveness of the energetic action, have taken refuge directly in the shiatsu and the chiropractic. Since the problem here is not of needles, because only it is used the hands, the digits to reactivate the meridians that are obstructing the energetic states. The only impasse in this technique is the psychological or mental preparation of the professing ones, because in this practice to measure the meridians is required of few garments or dresses in the patient and to press directly on the skin. Many complaints have arrived of professing of this science shiatsu, chiropractic, Etc. Since when observing semi-nude the patients, they don't resist the sexual impulse and have registered very delicate abuses against the patient's morals.

Blue Book: The Path to initiation

The science that represents the energy is unquestionably is the **Homoeopath**, this word **Homos** comes from the word: that it means similar and **Phatos**: illness. Homeopaths faces the illnesses with infinitesimal dose, very little, droppers from 30 to 60 c.c, these medications are elaborated basically of the vegetable Kingdom, contrary to the naturists, the homoeopath only uses developed drops that are not related directly with the **Plant-organ** in itself, but with the configuration of both that is energy in ultimate instance. If not being for the quantity of chatterers that without academic and medical formation, they have adopted the title of homeopaths, this will really be the humanity's fundamental science, but the mayor of the current professionals, dose the patient and they recommend pharmaceuticals medications , exclusive of the allopaths.

What is really the illness? We picked up different contributions or concepts on this question:

- 1 - Some say that it is a reactional modality in which multiple agents intervene in a terrain more or less favorable.
- 2 - Others say that it is always a very defined entity similar to itself and attributable to a specific cause .
- 3 - Others mention that the illness should be considered trough of some objective symptoms measurable.
- 4 - Another concept of illness is the modification of the fellow's habitual behavior that makes him sick and lives it his way.
- 5 - Another concept is that the illness only can be known for means of the study inside the subjective symptom that give it a peculiar coloration.

Speaking of the homeopathy the concept is: The illness doesn't exist as illness, only sick people. Contradictions? Possibly. The sick person has really been considered or qualified in different forms. The sick person is somebody that is entitled by nature to his health, Is he person that maybe has a certain pathology ? Or maybe somebody that is bad? or like some of the allopaths say the number of a bed? Is a sick person maybe a kidney, a stomach or a bladder?, or is like sarcastically some say, is a singular being completely different to another, that possesses the health or is it somebody that nervously wait the sentence of the medicine, or is the economic solution of some medics?, Or the science solution and advance of the medicine?

Blue Book: The Path to initiation

On the other hand we are fully convinced that the **only one causing the multiples illnesses is the same patient**, this is easy to understand if we study, for example, the type of life, the quantity stress factors that daily shows up and how the patient manages them. It is fundamental the alimentation, is known that a great percentage of our illnesses has digestive origin, by what we consume, either chemists, sausages, preservatives, synthetical things, for this reason we recommend to the maximum natural foods or products.

They exist many factors that affect our health, among them it plays a very important role our attitude toward the same life, if we have a positive attitude our auto healing system is harmless and maintain us a permanent balance. While if we are pessimistic (hypochondriacs) it tends to decay and we will be easy prey for cancer, infections and others.

It is necessary to understand that many illnesses hits individuals so that they learn something of that situation and evolve spiritually, that is to say, makes part of their karma and therefore the medics wont be able to eradicate it until it has completed its mission.

We know that all the beings are entitled to life, only who gives right to the life is entitled to remove it. The current medicine has gone digging its own tomb. The practice of the euthanasia and the euthanasia are pathetic sample of the disrespect to life. The laws that approved the euthanasia pray that the same patient should sign the agreement of clinic exoneration and petition of death like last will. Not it is necessary to be wise as to understand that in all sick people, their mental capacities and don of discerning diminishes until in 70%, and more in an illness like the encephalopathy, or another cerebral illness. A sick person in this state if it signs an agreement it is not of free will, or it is neither is aware of his determinations, but the medic it arrives to such an extreme grade that he is considered the owner of the life of the sick persons in the hospital.

How did wake up the sick person of the bed thirteen? How is progressing the patient of prostate cancer? Did some patient died in the previous night?, If the patient of the bed eight has the money ready, says good prepare him for the operation!; these they are fraises that we listen of directors of

Blue Book: The Path to initiation

hospitals and centers of health. The human beings they are called solely patient, they don't say: How did Mr. Antonio, or Mrs. Carmen, it is treated as a business the patient. And it is not only in the allopathy, but also in the botanicals and naturists that take advantage of the humanity's solicitude to remove considerable quantities of money.

Not it is possible that a botanic charges (25% of minimum wage) pesos for a treatment, when it doesn't invest more than 5% in medications or plants.

Why in these times the medics don't exhibit their oath?, be alopaths, homeopaths or naturists. The answer is clear, in the diverse oaths codes prays the preservation of life above the money. If the medics felt the yearning to serve the humanity the cease of activities won't exist in the hospitals and centers of health. The pathologies are developed permanently, the apparition of strange illnesses, has the science in check mate, and it becomes necessary to revalue the ancient systems, very effective therapeutics and that the scientist like the humanity's "guides" abolished and they rejected, considered them unethical and unpractical.

The scientist believed that with the apparition of an entire summary biochemical medicine was to solved the problem of the human pain once and for all, but the reality is other, and this has made that as much the humanity as some medics have returned to the medicinal ancient systems as the naturism, Etc., The chromic hydrotherapy is demonstrating from the Medieval their effectiveness and healing power. It consists on channeling Tatwas and especially Tatwa Tejas (Fusion of Prana with the Ultraviolet rays of the Sun) to a colored recipient of a certain color and with drinkable water exposed for three hours in the sun.

It treats the Hydrotherapy to the illnesses of the digestive system with sunny water in a flask of green color, the alteration of anyone of the nine systems with sunny water in flask of blue color, and the inadequacies with sunny water in flask of red color, in such a way that when it is required to increase of a certain organ the red color it is used, and when requires to diminish it the blue color it is used. In these times if you take hydrotherapy should not drink cold water, consume 120 c.c. of medicinal water every three hours. In the cases of obesity the sunny water is used in flask of black color, the black

Blue Book: The Path to initiation

color channels greater index of Tatwa (heat) for this reason the old therapists they recommended for the convalescent and patient with avitaminosis, the milk of a black cow .

The sunny water in black flask activates the sweat glandules and it compresses the sebaceous glandules. We all know that the dresses of black color are hot. Paracelsus, expert of all this, guided to consume sunny water in yellow flask for the spiritual balance. This same action is practiced for Disciples of the Dragon order in China to embody the seven theophanic dragons , related with each Star of the Solar System, each star a different color.

ZigNanda in connection with Tatwas, like solar principle, values the mission of the bird called vulture whose consign is to purify the terrestrial sphere, transforming the rottenness.

So that this bird can carry out this work, should remain per hours in the sun and with her black color to condense the solar energy (Tatwa Tejas) and in this form to increase her defenses or immunologic system flagrantly. The vulture can consume any type of putrid flesh without caring about the illness that put to death the animal and it is not contaminated.

Its fully demonstrated that if a lazy or slow person, consumes meat of a male goat or deer etc, the motor center is developed or if on the contrary if she is a hyperactive person when consuming meat of turtle her motor functions diminish. Not we seek in way that with these orientations to foment the meat consumption, because to work they should be prepared therapeutically and in minimum dose, besides meat consumptions is not part of us.

We mention these examples to conclude that if the scientist lent greater importance to the vulture, will be a fundamental option to eradicate the AIDS that is in fact an immunologic alteration.

At the end of the previous Century, the talasotherapy appears trough Rene Quinton (Talaso = Sea) it consists on using the seawater in its diverse applications, either external, oral use or subcutaneous, this bound to the marine climatotherapy has given formidable results. From the antiquity it is known that to take 200 c.c. of seawater in a fast, act like a laxative.

Blue Book: The Path to initiation

For the years of 1890, Midasshy, a medic biologist of Sobibor (Germany) revolution the field of the bipolar medicine and specially patient medicine with avitaminosis problems, sterile, impotent, Etc. His formulas consist in kind of a serum, 60% of marine water and 40% of honey bees; subject it to a fusion process or agitation it stops then to expose in the sun for six hours.

The osmotherapy, brought again to the humanity by the eminent Master HUIRACOCHA (Arnoldo Krum Heller), German medic that unveild the virtues of the odoriferous essence and of the flowers for the cure of psychosomatic illnesses. Each person is identified with a different perfume depending on the state of health. You friend reader, do the experiment with some essences, invite five people and smell the same essence, of the five and write the appreciations and notice that a scent seems pleasant to some and detestable to others. The atlantes used this technique in their medicines. The hypochondriac patient is treated efficiently with this method. Any one knows that some essence purifies a place, also can do it with clothes, like incense.

The twelve histolic salts of HUSLER, they exist with base of seawater, to treat illnesses with marine water, the water should be summarized to a miles of the bank and the possible biggest depth. It is curious, the twelve salts are in power, in the human urine, and for these times is very in fashion to ingest 20 to 30 c.c. of urine each morning for the treatment of a numberless of illnesses, among other the diabetes.

All these methods will be a complete fiasco if a convenient diagnostic system doesn't exist, since of the diagnosis depend the treatment.

GROMILCA, an American scientist, is the inventor of the homotheraphy and he affirms that it has cured patients with a blood that invented with base in the marine (Serum) water affirms categorically that to a patient it can be extracted until 80% of the blood and being replaced for this invention that is not another thing that artificial blood. We recapture this topic to guide that in any moment the marine water possesses the Spiritual (karmic) qualities, the index hierarchy for order of the creation is completely different from the seawater to that of the human blood, the level of the seawater is of three (3)

Blue Book: The Path to initiation

levels and that of the human being is of eighteen (18) levels. Where if it gears perfectly it is the mineral or vegetable kingdom, of being made this transfusion type the Martian (blood) hierarchy it is replaced by an order more dense. In oral administration doesn't offer risk for the intelligent metabolic process of the organism.

The talasotherapist brought to the physical world the spiritual axiom mentioned for our redeemer when he told us "You are the salt of the earth" and taking this to the organic field finds that most of our endocrine segregations is salted (Urine, saliva, nasal snot, Etc.) and who eat meat preserves them with salt and it is that the salt makes part of the same life.

We wont conclude this chapter without before guide that each human being should have position before the illnesses, they arrive as much to the materialist as to the spiritualist, and so when this happens we should have a vision of what to do before the case.

Religious' circumstances have been seen that they get sick and they don't do something to be treated by the fact of being religious and they believe that this is enough to be healed. Many have died or they have allowed dying their relatives without moving a finger, because they have so called faith in God.

Certain day a brother commented in relation with a healing lake that was built by the orientations of the greater brothers: "If any day my body gets sick , put me in the lake and don't make thing different to this", that it is a radical determination that indicates us a position toward this circumstance . Others esoteric students they have the position that if they get sick they go direct to the hospital and if it is necessary to make them transfusion and surgery they accept it and finished the matter.

This logically doesn't make part ours orientations, but it is important to possess a considerable level of comprehension at level of the teachings. A friend that belongs to the Kingdom of the Witnesses of Jehovah commented me: "We before a transfusion prefer the death before to place strange blood, because it is better to die in the arms of Lord that to live three or five years outside of the law. "

Blue Book: *The Path to initiation*

Also is known the case of a brother that visited an esoteric center in company of his wife, and seem that was very interested in the spiritual perfection. In certain occasion the wife got sick and died, this brother didn't visit the centers again, and even got rid of the books, position and comprehension it is what is required.

Exists a without numbers of customs that have passed from parents to children and each one accepts them without making a constructive analysis.

In some regions they accustom to put to the babies in hammocks rocking chairs to sleep them, they rock them or they swing for more than 20 minutes until the kid falls asleep, but they don't analyze that if an adult rocks himself in the hammocks or in the entertainment parks, in five or ten minutes get sick or dizzy, with more reason a child gets dizzy to the point that finishes sleeping. This is not favorable, as neither it is favorable the habit of eating meat, bequeathed for our grandparents, this is not analyzed. Humanity consumes meat without making an analysis of the symptomatic consequences. If we guide ourselves by the experience of nature, the things they worked better.

The dog, the wolf, the Tiger, the Cat and rest carnivorous animals have the sharp and pointed teeth because are designed to rip the meats and their digestive roads are short, allowing the fast evacuation. The cow or the horse possesses flat teeth, because they are design to crush the grains and vegetables. This tooth type possesses it the human being in its majority (molars and premolars). The human organism is not design for the consumption of meats, our digestive roads are much larger, the meat before finishing their journey is fermented (bacteria in large intestine), and this fermentation brings pathologic consequences, not only at organic level but at psychic level to.

In the vegetable Kingdom we find all the elements that the organism requires to be processed, and that we synthesize: in Lecithin, phosphor and Calcium.

There are persons that accustom to visit mediums with medicinal ends, among those entities the most common is Joseph Gregorio Hernandez,

Blue Book: The Path to initiation

many patients have had serious spiritual problems since the entity that embodies tends to affect those who converse with it. First for the violation of the biblical principle, and second for the ectoplasmatic irradiation. An esoterist has to consider never visit these places, we should guide that a stellar (Divine) Soul cannot embody in two different bodies as it does the supposed spirit of that Sir. There is in the Atlantic coast more than fifty Mediums of this spirit or entity and the curious thing is that who visit these places are trying with the same spirit and it doesn't recognize him , and more dangerous when somebody permit that forces or infradimensional beings to enter its living temple. **It should be clear that the only being that can flow harmoniously with our body it is our CELESTIAL SOUL** and it vivifies the body it doesn't destroy it. Who carry out these practices will finish with the nervous system destroyed, because the entity relies on the cerebral cells and the ectoplasm of the spleen.

THE ALIMENTATION

**That your medicine be your food
and your food your medicine.**

It is clear that the psychological activities depend on the alimentation, the capital sin works depending on the type of food that is given to the physic body. Those people that consume meats are under more complex conditions that who feed of harmonic vegetables.

The organic constitution of the human beings is not capable for the consumption of meats, so much for your teeth, as digestive viscera are completely different to those of the animal carnivorous.

It is very clear that the meats alter and they degenerate your genetic code distorting your chambers or akashik registrations. In fact you need to transform your alimentation, it is clear that this is made in gradual form.

The alimentation not only makes mention to the common ones, but to the seven foods in general that you allow to your psychosomatic constitution to manifest, these are: THE Love (Fast), dream, the Impressions, the Music, the Breathing, Exercises and the Common Ones.

Each one of these foods is related with a soul grade and with a dimension, with an order of the nature or creation and with an element. The vibrations oscillate with these foods, as example we have that the common foods are related with the first dimension, with the bachtharic world, Etc.

The alimentation of the dreams is the one that allows the action of the vital body, but, it is necessary to understand that let him be able to channel, we should relax the physic body completely, if not making it, it usually happens that at dawn you are still tired, with a good relaxation, only with three hours of rest are enough, it is not the quantity of hours those that are required to rest but the technique used.

Blue Book: The Path to initiation

The impressions that constantly arrive to you, depending of where you are and the activities that realize, they can arrive at 500 per hours, which are captured by the external senses and they pass to the tertium organs (Center of the cerebellum). Well it is known that the mind is egocentric and it codes the impressions in good or bad, going to the speed of the light for the introit of the brain, already coded, they cause results or unfavorable reactions if the ego qualifies them as bad or favorable.

The reality is that experimental Psychologist's techniques allows to channel the impressions from the tertium to the brain , which generates the imagination, the one that at the same time it is creative and it belongs to the soul. But the common humanity's allow being the mind the one that codes the impressions and this generates the egocentric thought, giving negative effects as a result, even deaths (people's Cases that have died when receiving news).

The music is a fundamental element, regrettably today a suitable music doesn't exist, the constellational souls have not embodied to instruct again the authentical music and we have only a imitation of the music of the stars. The real only music is developed in a musical single note. The music similar to the alimentation should not combine drastically. This musical note goes from the passive thing to the intense thing and maintaining a vibrant harmony.

When it is used more than one instrument it tends to distort and in these day more, since its been invented a without number of instruments geneartors of disastrous sounds (noises). The music that comes closer to the truth is the classical, and like it is logic, it is preferable to listen classical music before any other one.

Of equal form it should be assimilate the food of the respiration. The energetic capacity of the lungs in an adult is of 4.5 liters and at the present time the common humanity retains 2.8 liters and below, that is to say that is using less than half of the cavity. The respiration practices should become daily and preferable in the dawn and in pleasant places, free of impurities. The following practice is vital for the development of the lung cavity and assimilation of this food.

Blue Book: *The Path to initiation*

Stand up, look to the front, hands in front of the pectoral, semi united... To inhale at the time that the hands extend to side and side and up, semi-uniting in the superior part, with this action you lift the right foot towards the front. Retain the air and exhale carrying out the same to the inverse side, that is to say that the hands should be in the initial position carry out another action again, the same thing the foot but now is the left, the feet are alternated in each inhalation.

The alimentation through the exercises is required, but we should guide its of moderate realization and conscience. "To Sweat the T-shirt" is the favorite fraise of the sportsmen. The Greater brothers have guided to sprout the perspiration in equivalent same cubic centimeters to the temperature of the region where it is inhabited. For the Atlantic Coast for example, the students of this sacred doctrine should sweat up to 35 cc., this measure covers not only the students of the path, but the whole humanity. To sprout more of the indicated quantity is to attempt against the living temple.

The common foods that is more complex, are those more pursued by the humanity. The diverse psychological states that the current humanity lives, is a result in its majority of the disastrous nutritious habit. The typical that the common humanity's carries out is: To get up, takes a tea or coffee, to 7:30 a.m. has breakfast, to 10:00 a.m. eats up something, to 1:00 P.M. eats lunch, to 3:30 P.M. eats some thing, and to 6:00 P.M. It has dinner, and at 10 o'clock: P.M. eats something, that is to say always stays eating, ignoring that the gastric mucous (stomach) requires rest among a meal and other, but the humanity since dawn until goes to the bed is eating.

DISINCARNATION

Put your heart in all the
Words, but don't put
All the words in your
Heart"

By death is understood like the ceasing of all the organic activities, each living being brings certain sums of values, these are: **organic and spiritual**. The magnitude of life is given in relation with the chronology or year lived. Obviously everything depends on the daily expenses that has the person, the substance of more hierarchy that the human being possesses it is not exactly the blood, but the **sexual Energy**, these values preserve in better state the physical body, the energy and the soul; its fully demonstrated that a person that wastes the sexual energy daily, lives in conflict with his health and his features turns like a cadaver, the preservation of the energy is necessary for the stability of this Star. Of equal way the spiritual faith is indispensable to conserve the peace and interior love that is lacking so much in this terrestrial sphere.

We are a human organization to which we have called physic body , in this great habitation inhabits the theocratic region that is conformed by:

1 - Human Soul

2-Hydrogenik Essence

3- Monadic Spark

4- The Being Gnus

5-Spirit

6-Guardian

7- Internal Father and Mother

In the instant in that was terminated the cycle of life, the Being Gnus radically separates from the body and moves to the **Lawyístic Celestial order**, there they delegate **Angels of Death** which come closer to the body and cut with the scythe the **Protoplasmic cord** that unites the theocratic order to the physic body ; the human soul, the personality and the physic body go to the tomb (In occident), the spiritual forces ascend guided by the angels of death to sustain the trial before the Celestial Law. Those Who

Blue Book: The Path to initiation

have seen Angeles of Death in form clairvoyant, describe them as skeletons with a scythe in their hands, with this scythe they cut the electromagnetic flow that unites to the body with Soul. Before the Partial Trial all the spiritual forces appear excepting the Human Soul. To the cemetery three principles go: the matter that is physic body , the energy that is the personality and the Human Soul, and it is this last one that can be made feel in this physical world in certain circumstances, it is here of where come a lot of stories, related with appearances, Etc. Those psycho-human appearances are analogs to those that I refer in continuation:

Felix, a friend merchant that sells products in the towns that are beside the river Magdalena, certain day, he told us that went like always did some sales and when he finished went by foot to another landlord that was close, some friends they offered alcoholic drink, and he stayed with them drinking: “was already dark when I decided to return, in the road somebody came in contrary sense like searching for him, Felix is avoiding it ,but it was already near this character, then he speaks to him saying: “Good afternoon, I request a great favor, as you are going to the town and I cannot return, tell to Mrs. Estebana that is my sister, that I owe to Mrs. Monika , a money of laundry and that if she can do me the favor of paying her, see you later and thank you”, Felix went was a little drunk like one says, went to bed, the following morning remembered the event, look fro Estebana and narrated all that happened. Estebanacried before the astonishment, when Felix narrated her the history, already calmed, explained the reason of her crying and it is that the person that ask for the favor (her brother), was buried two years ago and they went to the laundry woman and indeed, the deceased has bean owing that money.

After of subjecting this history to an Ultra-Psychic investigation we end up concluding that the narration is truth. The human beings we have the tendency to materialize us extremely and this materialism is given in different forms; some cling to a woman, others to the money, jewels, or diverse elements, those that accustom to bury the money, when dying influence ectoplasmatically in the area of the funeral or tomb.

To be able to write these lines I investigated one of the appearances in which contacted one of the owners of the garments, these garments obviously had a vital sense, they were a treasure for dead one , who in the

Blue Book: The Path to initiation

last century had hidden them, this garment for the disincarnated possesses an immense value, but for us in these days, it was something less than significant.

When the mediums makes their invocations to the deceased, three principles can go to their call, it can be the human soul or it can even be the spirit, but I specify that it is in almost all the cases the self-centeredness or personality. When embodying in this physic world we have a certain quantity of psychic values in the instant in that for A or B we run out of psychic values, the **Being Gnus** is isolated of the body, brings the angels of death and these are those that come to cut that spiritual cord that determines the final disincarnation. Those people that have been able to revive cadavers, are because in fact this cord is intact, that is to say, the Angeles of Death have not cut it and while Angeles of death doesn't cut the cord it is possible the resurrection of this physic body, the death obviously is definitive when the cord has been cut. No master or guru can do anything. Subsequently we have said: They ascend with the angels of death, plus the five forces: **The Hydrogenik Essence, Monadic Spark, Spirit, Guardian, and the Internal Parents**. In this physic world or Three-dimensional Plane of Longitude, Altitude and Latitude is Human Soul that's stays, to ascend when it can take his **bony medulla that** is the **ETHERIC** factor and it is where they are recorded all the actions that we carry out in the life, it is exactly in the multitude of caverns or Internal Chambers of the bone where is all our engineer or genetic code which should be taken to the sixth dimension, Theophanic and Lawyistic world and for the trial that determines the future of the disincarnated.

In our western world we have the absurd idea of burying the deceased. This non only brings disease problems that we say, it harms the disincarnated since the medulla is slow in its disaggregation for about 30 years and it is then returned to the Theophanic world that is where is carried out the Trial. In the psychic investigations that we have made to the metaphysic students, we have found that between incarnation and incarnation they happen in a range of 50 years, thing that doesn't happen in the oriental's because when incinerating the cadaver they ascend almost in parallel form, the medulla and the spiritual forces of the disincarnated and this is favorable because after the trial is determined with a lot of readiness that being's future incarnation.

Blue Book: The Path to initiation

The personality is energetic and is related with the memory, with the photographs, the gravestone, the flowers, the tombs, Etc. The personality stays by means of the cries of the aching ones.

All this indicates that if the deceased's body is incinerated the personality vanishes. Obviously it delays time but it is a lot more fast than when the body is buried. A question arises: what happens with the capital sin or ego, the egocentric factor: Laziness, anger, greed, hate, lust, Etc.? After the death it ascends by psychic projection in search of the absolute thing, but the Universe has irrefutable Laws and only it can arrive until the **Threshold** of the fifth dimension, and remains there until after the partial Trial, the angels of life for divine order leads the human soul and the other spiritual forces, they unite it to the head of a fecundating Zoosperm and is given to the disincarnated **another opportunity** to live in the earth, but to arrive to this third dimension, has to descend, to say it in some way, of the sixth to the fifth dimension and of the fifth to the fourth dimension, in the **threshold** of the fifth dimension again the psychological Me or sin capital or **EGO** adheres to to fuse with this force again and it embodies in the earth, for that reason the child in the womb, maintains I live the egocentric factor. The conception is not given for chance or by chance, everything lives in a causal world and the Conception organized is, directed by **Angeles of Destination** and these to embody us, they keep in mind many aspects among them the zodiacal sign, all this indicates that we do not belonged to the zodiacal sign in that one is born but in which one **is conceived**, for this reason the **abortion** it is not only a **CRIME** before the human laws but essentially before the **Law of the Almighty**. Synthesizing can affirm that the death is a body change, like daily we change ourselves the clothes, the soul is changing body, obviously that the new life depends on the actions of the previous life, like this reader future life depends on which is living in these moments.

Karma, Dharma: This Law means Cause and Effect, or Action and Consequence. You harvest what you seed, if you sow lightnings will harvests tempests, this is logic, if in this life John lives with Joana, but John is a drunkard and bad husband, hits his wife, Etc. In the next life the papers are inverted, corresponding to John the Joana rol, that is clear. In the year 1989 group of esoterist took some magazines to the clinic and in them was a photo of a Siamese brothers, wanted to have my concept on the case, I

Blue Book: The Path to initiation

investigated the phenomena, after the practice find out that these Siamese in the previous life, were dedicated to implant plants: to unite sour orange with sweet orange, this is exemplary and we guide to all that seeks to correct the nature: going to pay the consequence, that way operates the Law of the Karma.

Spiritual Psychology: We are a Soul that possesses a body, not a body that possesses a soul. When analyzing the nature, we discover that the animals are born with all their principles, a horse, a cow, a bird, Etc. But in the human race is not given, we are a soul coming from a specific angle of the Universe of that source of universal conscience, pure source that possesses all the principles of the stars, and although we don't see it, she looks for the form of constantly showing.

“In Genesis was not existence but neither nonexistence, only exists the energy but this no manifested, the being breathed however dint hace breathing”

Rig Veda

Each human being is energy source in power, day by day we notice the disrespect to life and itself, they are diverse the forms of disrespect itself. But regrettably it is that disrespect has become like something important or necessary in life. Pathetic case has it in some journalists that disrespecting its life prefers to cover the news: When they cut the life to an applicant to the Presidency of Colombia, there was a photographer that captured the images, when suddenly a bullet hit the flash of its camera in action, and amid the rattle and the machine guns of its pocket took a flash and with all tranquility changed the flash of the camera and continued the session amid the danger. This action today is applauded for those that sponsor direct or indirectly the disrespect to life. Even a prize wins this journalist by have carried out this great heroic deed. It is necessary to learn how to respect and valued thyself.

We remember clearly, in certain occasion when an unfavorable circumstance was in my life, in that time on a spiritual encounter him my Internal Master commented him and pleaded for help, after making an analysis to my problem told me: “erect seven human beings that will help you” In the

Blue Book: The Path to initiation

moment search between my friendships or siblings those seven people and I exposed them to *Guru* and immediately he told me: *Only to choose six, seven with me, Why don't you count with yourself? You are the central axis of the circumstance.* From that moment became to understand the physic, energetic and spiritual value that exists inside each living creature. In general we look for the solution of all our necessities outside, we always want that the somebody else do our work.

Closing the topic of the disincarnation should guide you essentially friend reader that for grace and benevolence today you are reading these lines. There is who accustom to invoke the deceased, on behalf of the truth we should say you: **To respect all that has died.** Don't try to investigate the deceased's life, some appeal to spiritism centers to call them and to obtain answers of some cases, of some circumstances that carried out in the life. Those disincarnated, we should say officially leaving of the chronologic pattern, starting from the moment in that is cut the protoplasmic cord to the disincarnated, the Cosmic Law designates ninety days for the partial Trial, if you invoke him and if you call him and has the spirita or medium has capacity of descending him. (Keep in mind that if thirty days have passed, for that spiritual force it is as if was immediately to the death) he has to travel by the 42 cosmic tables again or of the karmic justice, if you invokes at little time of having invoked it previously again, it is possible that you condemn him to live in the space, in the indimensional void, because the time has already been cut; for this reason so much for the disincarnated as the person, never we advised to invoke the deceased. This is definitive for our evolution and that of the disincarnated.

Clarifying then should keep in mind that the physic body of the disincarnated always should be incinerated, if you want, if you, let us say have compassion for the deceased, it should incinerate that body, since this will favor to 100% for its new body in the earth, never by equivocation you sponsor the cemeteries, they are businesses, trades that some religious institutions even have actions in these cemeteries, ignoring the damage that makes at level of pathology to the humanity, giving place to the development of a Egregor being, infradimensional or elementary, because the cemetery creates kind of a soul or etheric body very dangerous for those that visits him.

Blue Book: *The Path to initiation*

The egregor is kind of a negative force that is impregnated in the physic body of those who accustom to visit those places. The esoteric student should avoid to visit those places, since that energy is synthesis of the rotten emanations of the deceased. It's not advisable to take Childs to the Tombs or to carry them when somebody returns from a funeral.

It is obvious that if we ask a priest on this, it reproaches us and he even advises us to visit those places, to make mass to the deceased, Etc. Because is of understanding that the Church is related economically with the graveyard or by ignorance of these facts.

It is necessary to understand that when somebody dies it is because him it came the suitable moment and we have to accept that process, since nobody dies before the suitable moment. The dresses and garments of the disincarnated if it is required to use them, they should become purified for seven days to eradicate the energy impregnated in them, they should wash themselves and to be exposed for seven days to the bleakness.

Do not maintain dead people's pictures and less if they are framed, since this maintains them bundled to this world, the masses and the prayers only take encouragement and comfort to the personality and the human soul, but this action it is not mercy because it impedes the liberation of the human soul of this plane.

The critic and complex for somebody is the suicide, because it splits drastically the life and it breaks up with a cycle of Lawyistic life, the one that only the Creator is entitled. The suicide is a coward act and is not related directly with who intersects the life in one minute, many people commit suicide gradually, whereas wasting its sexual energy, whereas with its type of alimentation, or with their unbecoming actions, Etc. We should preserve the life in all the manifestations because the Celestial Law through the internal guardian watches over each action that we carry out. The actions that we make of subjective type and that not necessarily has to be remove the life to a fellow man (Although this it is the action most dangerous that exists),also the subjective actions like to kill a hen, a toad, a fly or any other animal. Each one of these creatures is representation of God and they possess certain sums of vibratory values, which we know as:

Blue Book: The Path to initiation

Minerals from 0 to 3 vibrations
Metal from 3 to 7 vibrations
Plants from 7 to 12 vibrations
Animals from 12 to 18 vibrations
Human race from 18 to 33-07 vibrations

It indicates this that to kill or to destroy these species or forms of life, the Law processes who makes it and has **to pay the vibrations** that it has destroyed, it doesn't care in what it justifies their actions, and it returns them unconsciously to pay the made actions. The Guardian mentions the negative actions and the personnel Divine Mother mention the positive actions (we can already notice the difference). Regrettably there are people that call a bad thing a good thing and they justify their work shielded in God. To mention an example of what we are guiding, we have the pathetic case of the children: the lustful couple, full with sexual passionate and desirous longings, they unite sexually intoxicated for the carnal pleasure, the pregnancy is not made wait, but to justify its passion they exclaim: Let us have all the children that God sends us! Not they say: Let us have the children that the Lust gives us. In a same way it happens when they kill or buy a chicken with the justification that is to eat.

Certain day a livestock butcher in Gaimaral Bolivar tells me: "I believe that God should take me to the sky when I die, because I am the one that feeds to the whole population". The Biblical prayer says: Do what you want but have present that of all your acts you are giving face".

People without soul or spiritual evolution are prosecuted and return unconsciously to this world, but those that are able to be liberated of the capital sins and by logic are Evolutionary souls, they don't return, but rather they are reincarnated on will and they can choose the star, nation, city, culture and home where they will embody because they make it with conscious. Cultures that accustom to take food and flowers to the deceased, even keep mourning. These customs harm the mourning, that takes a risk of their health for the black dresses, so much like for the cries and sorrows that invades them, when taking the flowers, Etc.

Blue Book: The Path to initiation

For this reason we guide that if you, friend reader, feels affection for somebody, and he or she dies, quickly disappear the belongings and photography's that he has left and the important thing is to incinerate its physic body. When somebody is liberated and it dissolves their bodies, it dissolves their human soul and he achieves a radical domain on the matter, then s, it can stay of this transcended teacher, because nothing affects him/her.

Three factors go to the cemetery, The physical Body , Human Soul and the personality and these they are totally egocentrics. These three forces depending on the psychic capacity in life, can create an ectoplasm body, kind of a hologram and to become visible in this physical world .

To my clinic came a friend to investigate and understand an event very strange of which we make a synthesis: A youth was attracted or passionate in a party for a lady. Both were attracted and began a romance that night. In hours of the dawn, the lady feels very cold and she prepared to leave for her house, the recent boyfriend gave her his jacket, promising to visit the day after in the direction that she gave him. The lover went to the direction and found that she's been dead years ago, they even gave him the direction of the tomb where body lies. Full with curiosity and mystery he went to the place and big was his surprise when encountered his jacket above the lady's tomb.

The deceased creates a psychic hologram when they are buried and their physic body are not incinerated.

NOT For **any reason** you go invoking deceased, neither use spiritualistic and less the Ouija chart, understand that the disincarnated should begin its astral process and it depends in great form of the behavior of the aching ones. We can assimilate the death like the continuation of the life in other spheres. It is logic that the deceased suffers when in the physic world to say hello to people and they don't greet back (Because they don't see him) but this you can avoid this cooperating to his liberation.

Like the body is changing clothes, the soul is changes body and it transmigrates looking for the perfection. When dead, the deceased it is

Blue Book: The Path to initiation

driven from third dimension to the fourth dimension and here is a void (Not the illuminating void) dense or black hole of which they speak or they give testimony those that have died clinically and they have returned to the life. They say that they travel by a dark tunnel, and they have returned to the life because they have not been cut the protoplasmic cord, this indimensional void or limbo, swallow the deceased and it projects them ectoplasmatically to this physical world.

THE ABORTION

For not having the humanity a, basic, precise, concise, spiritual method to prevent the conception are made different errors in life day by day. The human being lives off error in error, if we take a look to the different anticonceptive methods, we will arrive to the conclusion that all are a complete fiasco. This has taken different millions of women to the practice of the abortion. And many write, speak and guide on this topic, the abortion. And they don't give a precise key to overcome them, in this book the keys are allegoric, there is not direct and precise key and it is for that reason that you, friend reader, if you are living an experience in which has projected an abortion, the spiritual author of this book, that is not in fact a human being, is in foot to guide, to cooperate to the evolution and development of life.

Blue Book: The Path to initiation

Because if you are living this experience, write to us that will do the possible to guide you.

The anecdotes or histories that the life presents us continually should be analyzed for our evolution. They motivate us to guide our fellow men for a better living. Such it is the case of Marlens Isaac, an inhabiting youth of a county to scarce twelve kilometers of the city of Toronto (Canada), was pregnant and the medics told her that will give birth at the end of September of that year 1987. As that month only began, her husband trusted the medic report and went to the city for provisions; several impasses stopped him to return that same day. In the decline, Marlens felt a reaction of her body; they were pains to those of the childbirth. She was alone and soon understood, for that continuous intensity in the zone of the reproductive apparatus that the report medic was mistaken, and that the creature soon will come to life.

Her husband didn't arrive, it was late in the night, the moment was at doors. At eleven in the night, she decided to face the situation. Making superhuman efforts, got up went to the kitchen and immediately put to boil water, disinfects the leaf of shaving of her husband to do an **autocesarea**, since could not give birth naturally.

Marlens was in front of the moment, with the little thing that knows of first aids did the surgery to save the creature, and for her glorification at spiritual level, they were two.

In the morning when her husband returned, he doesn't believe immediately to what was witnessing, he prepared to look for the Doctor, when the doctor arrived, moved by the scene he said: "I have to congratulate Marlens, women as her, it is very difficult to find, first because at risk of her life, since a massive hemorrhage or an infeccin of the wound are possible, achived to bring to the world to these creatures, and without the benefit of the anesthesia and second, because she made it in the precise moment. This is an incredible exploit."

Friend reader, while an exceptional woman exposes its life, to save its children, other they also expose it, but to kill them.

Blue Book: The Path to initiation

Today, these words will touch many people that say to be religious, good or benevolent, but that they are either sponsoring direct or indirectly the assassination of their fellow men. In synthesis, we are speaking of the legal “**murder**” that we all know with the name of **ABORTION**.

The abortion takes in itself, the mark of the violence that affects today's world. Let us mention the fatidic day 22 January of 1963, day in that the men women and of USA, they were represented for less than a dozen of “Dignitaries of the Supreme Court”. They challenged the LAW OF THE ALMIGHTY that dictates: **NOT TO KILL**. They gave legality to the abortion, that is in fact is to kill or to murder in cold blood. From that day on in USA they have died more of 45 million of babies, more than 45 million lives, they have been quartered in the way most cruel and bloody, since every 20 seconds a baby is “Legally Miscarried”.

Human beings, killing their fellow men brutally, and the most fatal, it is that they are aided by the Law of the Men.

Those who feel in our interior the splendid calls that takes us to look for God, we have lifted the universal flag in defense of the human rights and essentially of the child.

THE HUMAN LAWS MAY LEGALIZE THE ABORTION BUT IT WILL NEVER BE LEGAL BEFORE THE CREATIVE FATHER'S LAWS.

Friend if you are reading these lines it is because neither your mother neither mine, aborted us, don't take an abortion in your conscience and if already done it, begin your work in defense of the life, so that others don't incur in the same error, since practically it is irreparable.

With your help, we will save many lives, but a single baby that dies tragically miscarried, and knowing that problem, it is too much.

Let us have present that the baby to be born is in a unfavorable situation, is naked, is little, doesn't have a name, neither has voice, only counts with its Mother to come to life and if doesn't have an adult that defends him including mom and dad, has **them all lost**. A woman that allows her son's death, is a woman without redemption, capable of any thing. This type of

Blue Book: *The Path to initiation*

women they should be made the same thing as Marlene Isaac, that is to say to be made an autocearean, but in the soul, to see if it is able to be taken out that dark Ego that loads in her subjective interior.

The intervention in this faulty aspect is urgent, since its impeding the incarnation to beings that come to complete a mission in the earth.

Diverse classes of abortions exist, to which suits to know because you can be sponsoring one of these.

Some people are declared defenders of life, it is possible that they have either sponsored direct or indirectly to this disastrous crime.

We have the so called therapeutic abortion, invented by the allopath official science, this abortion is practiced a woman that supposedly has some hormonal deficit or another pathology. Beethoven's history contradicts this behavior. This famous musician came to life to enchant many with its music, in spite of the pressure of the medics to his mother so that she aborted him, since she was paralytic and with inadequacy in the respiratory system had syphilis and its father was an alcoholic.

The evil curettage is the method or practice most abominable that exists on the face of our world earth. In this unscrupulous action, murderous Medic introduces the cureta or apparatus to extract the creature by parts. This dark action was taken to the screen with the intention or hope of a favorable change in the humanity. In this pathetic video, the moment is observed in that the apparatus enters through the uterus in the defenseless creature's search. The baby begs to the mother so that it allows him/her to be born, as her, wants to enjoy the life, but the insensitive and merciless woman doesn't listen to him/her, because in her low world, she already has resolved to knock down those dreams. He thinks, when not listening his mother's answer, decides to face the situation, its little experience in the life prevents him from thinking that his capacities are not able against that of a paranoiac monster with a sharp fatal weapon. The cureta starts his fatidic action and to the merciless work that it impacts the public. In diverse occasions the baby is able to avoid the knives and the public is moved, some women cry and they make force so that the baby survives, but then an awful scream is

Blue Book: The Path to initiation

listened at the same time in the assistants; a seal that indicates that the baby has been reached by the knives or bloody pincers.

Few people observe the screen, the mayor is petrified in their seat, because they know that this video is not a commercial tape, it is a video that doesn't take in itself the argument, it is a truthful video.

What is monstrous, is the final part of the curettage, the medic has to arm part for part, as if was a puzzle, the creature that has just murdered, this with the purpose of making sure that not stayed not even a creature's tiny piece in the heretic woman.

The curettage is not advisable in any moment; most of the women that had one practiced, has suffered ruptures of the uterus or other sequels, that leaves them suffering for the rest of its undesirable life, if she has not died as consequence of a hemorrhage or mortal infection.

The anemias are pathologies that happen later to the curettage, this it can vary depending on the state of health.

Another case of abortion and more frequent, are that of the absurd birth-control method with which the humanity counts. Such it is the case of IUD or Intra-uterine Device, which is 100% abortive. It is necessary to clarify that the woman that uses IUD, doesn't avoid the conception, she conceives, what happens is that when the creature will lodge in the maternal cradle (Endometrial), she finds it busy by the object and doesn't find the favorable environment for her implantation, therefore is expelled in the next menstruation, that is to say is aborted.

They have registered cases of babies that have been born with IUD incrustated in the body. In synthesis, the woman that uses IUD miscarries with a lot of frequency; the antagonist is that this woman can be in favor or to defend the life and by ignorance is killing monthly.

Action that deserves reflection is the call MENSTRUAL delay. This delay in the majority of the cases are not delays but pregnancies, only in the cases in that the woman has not had sexual relationships, but if there is relationship, the extreme possibility should be pregnancy . The organic insensibility in the

Blue Book: The Path to initiation

woman doesn't allow her to detect the presence of a new body inside hers, what takes her to visit a medic with the intention that prescribes a drug that makes her return the menstrual cycle.

Regrettably the official science doesn't have an apparatus or system that it allows it to detect the delay or pregnancy suitably, but a certain time after (15 days). Totally, it finishes prescribing her, maybe humanly never we are able to know if it was abortion or a delay. But of that that if we can be sure, it is that THE CREATIVE FATHER'S LAW, all the disastrous actions that we do we got to pay for it.

Method of the Rhythm is not reliable. One has the general belief that the ovule only lives during one or two days, but cases are known in those which, women were pregnant when they had relationships the last five days before the menstrual period, even medically are public some cases in which were pregnant having relationships with the menstrual period.

All this indicates that the ovule is able to remain alive several days and under conditions fertile, this without keeping in mind that the sperms (seed of the man) can remain up to 72 hours in the feminine cradle. The official science publishes that the ovule remains up to two days alive (this is an average data), because the experiments that they carry out, are in laboratories (in vitro), not in the woman reproductive apparatus (in vivo). It is logic to suppose that in the Natural **Laboratory**, that is to say, the woman, the ovule has better conditions to survive more time.

Some women have been violated, they have been gestated in the traumatizing action, and they decide to abort that creature. But what responsibility has this baby of the moral of the indirect father? The old ones guided to planificate with spermicidal in the later moment to the relation (The lemon for example) that can have abortive tendency, because if there is conception the acid can destroy the creature.

The abortion for aspiration or suction is fatal so much for the creature, like for the mother, in this system the baby is extracted by a bio aspirator. This vacuum cleaner is 29 times stronger (in aspiration) than a homemade vacuum cleaner. This like it is of being expected, it causes continuous bled,

Blue Book: The Path to initiation

since not only it extracts the creature but to internal organs, vital membranes or sensitive fabrics that sterilize the unhappy one in ultimate instance it kills.

Never the humanity bean arrived to an extreme grade of degeneration and barbarism. We live a world where the human rights, the ethic, spiritual and moral principals are in bankruptcy. Pathetic example has it in USA where a woman of any age can miscarry with the opposition of its parents, because “they aid her Laws of the State”.

In Chinese the abortion not only is allowed, but obligatory. In that pas, the couple that wants to have family only can make it a single time, and if the creature is female she can be secretly murdered in the hospital. In China, when the authorities find in the street a pregnant woman, they demand her regulation papers where she prays that is their first son.

Antagonist to this action, the allopath medicine or official medic science, possess an Hippocrates Oath, which is based on the **Preservation of the Life** , but is it that the baby aborted is not maybe a living being?. Many times when the woman undergoes the abortion by induction, the creature has been born alive and the medic in an antihuman act allows it to die.

Another aspect that has given margin to foment the abortion, is the idea of subjective type of some infra spiritual beliefs. In their internal dialogs they explain on a supposed transfer. This low action consists in kind of a psychic transfer or a creature's displacement to another imaginary womb, the idea, according to them, it is to embody the soul indicated in another mother. So that this supposedly its necessary to miscarry the creature, that which, according those mentalities, it is no longer a crime. They consider these groups to the womb like kind of a bank of which they can transfer money.

The ignorance is daring. To use the spiritual part to make crimes, it is an abominable, unbecoming actions.

The origin of the life is universal and the human being can't monopolize it because he says so.

The theophanic Philosophy, science that studies the spiritual origin of the existence, guides or teach that each human being is a **HUMAN SOUL**, of the spiritual majestic force that we know as Christ or **DIVINE SOUL** each

Blue Book: The Path to initiation

living being possesses a spiritual part, which goes climbing sublime or satanic grades , depending on us.

Each living being is constituted by three principles: Matter, energy and soul. The physic part is the result of the configuration exteriorized by the Souls fusion and the matter. Thus the Soul, the fundamental part of our life, and has a great mission to complete in the earth. Although the majority of people doesn't know of where they comes from or which is the mission that should complete.

The act of ignoring these truths doesn't invalidate it as Law, these they should be completed or manifested.

So that a Soul can be embodied they can wait years, until the moment determined for the Divine Grace to grant it a body.

This indicates that those who challenge the Law with the Abortion, will pay, apart from the havoc that leaves her in the physic body , and the energetic imbalance of which our psychic stability depends.

It is a problem to deviate the projection of a Soul that urges to evolve spiritually. If you, kind reader, has not climbed spiritually, allow, help that others may do it, since babies the same as we, have the same projections.

We have to the sexual education in the educational facilities, in those which only teaches merely the physiologic part of the sexual organs, but nothing on the spiritual figuration or energetic. On the other hand it is spoken of the **Rights of the Children**, but the antagonist it is that the same ones that have spoken of the rights of the children, agree with the legality of the abortion on Colombia or another Nation. It seems that the creature in gestation was not entitled the same rights.

It is so exact the life in gestation that who accept the principle of the zodiacal signs fundamentally, they know the old Chinese system, which are based on the Concepcion of the life to determine the corresponding sign, that is to say our sign, is not the one that governs when being born, but when the life begins and this is the conception. Who not agree with the present theory, is because agrees with the abortion.

Blue Book: The Path to initiation

Arriving to the neuralgic point of this problem, well we know that the Bible that is the center of our faith explains or gives the solution scientifically.

If the governments wanted to put an end to the alcoholism, of for sure they wont try to put an end alcohol, they will have to put an end to the cane. Of equal form, the problem of the abortion is possible to finish fix the origin, and it is in fact in the bad sexual orientation with which they count the young people. Today any couple unites sexually for mere ideas, and is logical that the results are not made wait.

If we read in the book of Leviticus (In the Bible) Chapter 15, verses 16, 17, and 18. We will find the form like Lord *JEHOVA* oriented the sons of Israel (That are at the same time us) about the sexuality, and it is that **the indiscriminate expulsion of the sexual energy** is the cause causorum of the abortion.

All those that want to cooperate to this cause his duty is guide positively on the use of the sex. The Semen is therefore the universal source and the living representation of the life, it should be revalued. The orientation given by Lord *JEHOVA*, not only avoids the abortion, but rather it is the natural and perfect method to control the conception.

Friend reader, if you are responsible for a pregnancy, don't forget that you choose that lives or that it is murdered, please allow him to live, because if you allow him to die, when you have some problem. With what face your going to pray help to God? If you are woman you don't allow yourself to be convince of your aggressive husband so that you miscarry, the direct responsibility fall on women. Have present the havoc of the organic or energetic part , and it is very possible that you become an irredent before God.

Everything in the earth has a real cause, it is not for chance that you of a pregnancy, and if it is for the economic part who writes these lines and their advisers, we are willing to cooperate so that a new being is the same as everybody, can see or to enjoy the Minerals, the Plants, the Animals, the Human same Life. That creature channels the life of the Earth, the Water, the Fire, the Air and why not of Akash, Prana, and the Ether?.

THE PRESERVATION OF THE LIFE THIS ABOVE EVERYTHING

The same nature provides samples of the Creative Father's supreme intelligence; the quick form with which a baby is developed it is incredible. Let us see by dates like the life evolves:

October 17: Comes a Human Soul and other spiritual forces to the feminine womb, to give the conception and although the mother doesn't know it, it is **already a person.**

November 2: As by art of Magic, appears the blood and the sanguine vessels, it is very tiny but latent, located in the maternal cradle, feeds of the mother's vital energies. It already measures near three millimeters.

November 9: He/she has been formed their mouth and of following everything in harmony in 24 months will to speak to their parents, to call them dad and mom.

November 18: Starting from this moment it throws their first pumping, the heart, the one which is formed by the Internal *Father's habitation.*

December 3: Their measure is of about twelve centimeters, if the mother is sensitive, feels its manifestation.

December 12: There is a total organic configuration , each regency at spiritual level has an organ or base where to live or to lodge. It has formed the brain, the lungs, the sexual organs, the heart, the sanguine torrent, the Liver, the spleen, Etc.

December 18: We can already know if it is male or female, he/she has sexual definition, it is an entire organism.

December 31: He/she has formed their senses totally (Hearing, View, Etc.)

January 7: Is formed in its human configuration, **IS THE BIGGEST MIRACLE OF THE WORLD..**

Blue Book: The Path to initiation

And from that day only it depends on the Love and spirituality of its mother's.

NEVER SPONSOR THE ABORTION; THIS IS THE VILEST CRIME.

PRO-LIFE is an institution that was created in North America in pro of the life. Many people of social different levels and beliefs have united to this noble cause. Serious investigations have made in relation with the foods and other attacks against the health.

In September of 1987, they announced that **BIENESTARINA**, is completely **STERILIZING**, reason enough to not give it to kids, since in future times, and cannot conceive its children.

Unveiled too the havoc that is causing in the organism the Purina **CHICKEN** and their eggs. Among other give you sexual impotence, homosexuality, and genetic disorder that as consequence takes place, they alter the fluency in **THE NERVOUS SYSTEM BRAIN SPINAL**.

They clarified on the use of Blue Jeans, these supremely tight pants to the body, have their real origin in controlling the demographic explosion or increase of the human population. These pants compress the reproductive feminine apparatus, causing hypertrophy in their sensitive organs, this impedes the ovule reproduction and liberate lubricity. When gestated, appeals to the cesarean that causes phobia in the subsequent childbirths.

The founder of Pro-life, in declaration to the public audience and the television, said in relation to the foundation: "Gentlemen 31 years ago is the cause for this foundation. The lady Mariany Charter, was pregnant in hard moments of her life, when her husband was informed, didn't like the idea and became a drunkard and he mistreated her physical and verbally, his husband wanted an abortion, and for this reason he didn't give her foods and her life practically impossible. The husband's relatives advised her to abort "to Save" their home. For those times the abortion was not a crime before the Law anymore and existed hospitals of "Charity" to practice it free.

Mrs. Charter challenged all and look for her only opportunity, went to her sister which understood it and advised her humanly so that the creature was born. It was born in chaotic economic circumstances, but this great woman

Blue Book: *The Path to initiation*

achieved before the opposition of many, to raise a girl product of the pregnancy. Maybe Mariany foresaw that little girl will complete a mission when growing. Today that girl has grown and is with us and I will present HER”.

All hoped that appeared the announced woman that was saved of being miscarried but nobody arrived to the scenario. Sustaining the cry of happiness that invades her could say, to conclude: “That creature that was saved of being aborted; **IS ME**”.

Exists without number of causes or factors that unravel unfortunately in the abortion, or that it places the adolescent sword against the wall. Among them we have Violation; there are women that have been gestated in a violation act, this like it is of understanding, leaves sequels, but of all psychological, in the victim, what has taken them in majority to miscarry that memory and not to have a son of a violator. Between the violation and the abortion, it is unquestionable that this last is an action more disastrous.

If we study the experimental Psychologist (Psyche=Soul, Logia=study) we find significant points that allow us to understand the reasons of why a woman live an experience of a violation.

Understanding this circumstance, the gestated baby should not be miscarried, and even more, when deepening the experimental Psychology we find that the baby comes to christify the mother.

Another factor that with it takes to the abortion it is the type of education that some parents impart their children: A conflicting education, and we refer to threatening prayers as “don’t come out pregnant because ill expulse you from home”“, If is pregnant before marrying, “we are not your parents!” or if is studying the girls fears that when being gestated, the professors expel her of the school.

Let us consider that the authentic fundamental education goes from before the conception, this allows that the didactic continuity in the pregnancy and in the infancy, allowing a true comprehension between daughter or son and parents. The education to which we make mention goes projected to the

Blue Book: The Path to initiation

preservation of life. When in our education, the respect to the life is not present, the abortion is something more that insignificant, and if a person with a grade of quite high disrespect ends up directing a country, “Legalization” of the abortion is not made wait.

The woman that has been excluded from the antiquity should meditate on her position in the life.

The man the whole time has pressed and underestimated to the woman, this by obedience or submission on the part of the woman, it has taken that she her is who destroys its body taking pills, putting IUD, being applied injections, and in most evil form to disvirtuate the temple (Body) cutting the trumpets of Fallopian for not conceiving.

Of thousand couples that tries not having children, in less than ten, the man takes care. Before similar domain, when there is a pregnancy, the man it only dictates the disastrous prayer: You make “yourself an abortion!”, and the woman prefers to obey him to maintain the “harmony” with her couple although ahead of time loses the harmony with the Creator and with it the **right to pray**, but the panorama of the preservation of the life is not completely ominous, because there are woman-females that challenging its parents, husbands, Etc., they glorify the creator allowing the gestated creature to be born. The parents or people that are responsible for girls, should offer her the enough trust so that in a stage of not wanted pregnancy, the action is shared and the development of this is allowed. **It is necessary to control the conception not the natality.**

EXTRATERRESTRIAL: PAST AND PRESENT

**“The one that plants and the one that waters,
They are both fundamental for the
Seed”**

Blue Book: The Path to initiation

For these times many write, they dialogue, they speak and more about UFOS and extraterrestrial, like only proof of it has its words and the faith of those who believe in those statements. We want to make a synthesis of our cosmic experience and we offer it to the humanity like a didactics and orientation.

In the year of 1989, I had the medical office in the street 16 with career 24 in the city of Magangué, Bolívar. In the dawn of October 18, I wakened up for some intense sounds that arrived to the habitation as the beat of metals. I incorporated, looking for a logical explication to what was happening, but not found anything. Very early I visited leaders of different churches and metaphysics schools, but was useless, with each answer I was more confused. The day 22 of the same month, returned the experience and more relaxed I was and was able to flow with the sounds or voices. I heard the expressions of those who were identified as: **Luk Splendor and Agarika Zin**. They told me that I've been chosen for a apocalyptic mission, it was strange to me because my life was as of all, didn't find it something different. In all ways these beings affirmed me come from the stellar space, exactly of the star **Wulagnu**.

They continued communicating, indirectly I told the messages to supposed leaders and they always pop with spooky answers. Those types of answers stirred up the curiosity of knowing them, that which I exposed them in a communication, without some reflection accepted, but they indicated me that had that to carry out a practices to balance my glandular system, I practiced and by the day December 28 was called by vision to the outskirts of the city. It was 8:26 minutes of the morning, when was transported to our spiritual germ called **Acirfa** (The details of all this experience appear in the Book Kosmic Kontakt). Of Acirfa we brought seeds, which were distributed among those that attended the conference that was made in January 3 1990. These beings continued communicating, they guided us on the problematic of the purification of the Planet Earth. They gave us keys of physic, energetic and spiritual evolutions. In the physical part to reestablish our health, In the energetic part to recover the vibratory level. The spiritual part to climb the Soul grades before the spiritual Law. All the orientations were given by **Psycovoice** (Species of Telepath). For those days we were directing a metaphysic group conformed by 30 people.

Blue Book: The Path to initiation

The majority believes firmly in the received information's, but like in all the groups some people that has tendency to question the messages. The last days of the year 91, they visited me three metaphysical brothers querying that wanted to hear the voices of the Greater Brothers, because in all the groups only the leader is the one that communicates. This great idea I exposed it to Luk Splendor and Agarika Zin, we were appointed to 65 kilometers to the south of the city, for diverse circumstances these Brothers could not travel, but there was a light of hope in being contacted these beings of the stellar space. In this encounter they gave the plans for the construction of the **Ark of the science** that allowed communicate with them. We build the Ark and we achieve the communication with them, not once but dozens of times and with groups of Esoterists, Metaphysics, Haraniks, Vedas, Gnostics, Catholics, Freemasons and people that never militated in groups, more of three hundred people they have lived in repeated occasions the experience off dialoguing with these beings, to share with questions and to receive direct orientations of different beings among them the supreme commandant of Constellation of **Anturia, YANG KAREY**, after of having the experience of the ark of the communication, a group of brothers requests to photograph the ships, obviously in a contact, the benevolence of these beings was made feel once more and we could photograph the Anturian ship that was commanded by **Flin Zul and Joob Manare in this occasion in a contact of seventh type...** Eleven photographs introduce to the humanity, as a faithful testimony. One month later another contact was obtained with the beings of the Final **Trial**, those called **Venzians**, these are same ones that destroyed Sodoma and Gomorra . They have guided us their presence in previous centuries and their apparition is described in our sacred books: The Bible, Koran, Talmud, Bhagavad Gita and others.

When studying the sacred writings, The Bible relates us completely unquestionable cases: And“the children of God saw the daughters of the men were beautiful and children engendered them”, this is in genesis. It is logic that to be able to engender a son, by cosmic Law or Law of God should have union of a sperm with a ovule. That indicates that these beings had a physical body, and if they had a physical body, they should inhabit a certain star.

Another definitive narration is found in Genesis, Chapter 19, verse1: “They arrived pus the two angels to Sodom at the end of the afternoon”, verse 3:

Blue Book: The Path to initiation

“Lot made them a banquet and they ate breads without yeast” (washed their feet), in the verse 10: “The males (Angels) held out the hand and they put Lot”, Verse 11: “And to the men that were outside, they hurt with blindness from the most young until the most old”, Verse 13: “All that you have take it, because we will destroy this place”, verse 24: “Jehovah made rain sulfur and fire”. This narration clarifies several points, they were angels that didn't inhabit the earth, if breads they ate and Lot washes their feet, was because he had a physical body, if they lengthened the hand and blinded the inhabitants, was because he had supernatural powers, if they said we will “destroy this place”, was because he was empowered. In synthesis came from another planet. Sodom and Gomorrah were razed of a single blow, of a gigantic explosion that in that time being of earthly origin wasn't. The scientists that have examined the place affirm that the stones were victims of an atomic explosion.

The presence of these beings that we so call extraterrestrial. Why extraterrestrial? Because anything that doesn't have origin in the earth, it is extraterrestrial. We find them in the Bible with more frequency of what the humanity's common believes, what happens is that in the Bible they don't appear as UFOs or flying Plates, but the evidences are visible in Exodus Cap. 13, verse 2: “And Jehovah went before them he went in a cloud column to guide them for the road and at night in a fire column to light them”. If we make a critical and constructive analysis, we will discover what was this fire cloud. Again is made a mention Exodus 19:9 *And the LORD said unto Moses, I come unto thee in a thick cloud*, this and the next chapter are momentous, they relate a great cosmic experience and the delivery of the ten commands, and it is not necessary to be wise to understand these chapters. The cloud in mention appears several times in the chapter 9. In this occasion the cloud remains until months above the people of Israel; which announced them the departure moment or the moment of stopping. All this passed unnoticed if we didn't analyze the configuration of the cloud.

The Creative Father established Universal, irrefutable and inviolable Laws by the divine hierarchy. Leaving undoubtedly clear that a cloud cannot remain per hours in one place, in one form. The Laws of physics demonstrate that it cannot be, and it is not possible to say: “For God everything is possible”,

Blue Book: The Path to initiation

because who makes the Laws is the one who complies them and with it to give example.

The Biblic verse of Kings 2 Chap. 2 verse 11 throw us a lot of light on these orientations. It says: "2 Kings 2:11 *And it came to pass, as they still went on, and talked, that, behold, [there appeared] a chariot of fire, and horses of fire, and parted them both asunder; and Elijah went up by a whirlwind into heaven.*". The Greater Brothers have told us that from **Pegassus** (The regency **Aladess**) was this flying apparatus that took to Elijah to a Psycosomatic Reorganization.

The Prophet's Ezekiel vision is another significant point, "The skies opened up and I saw as a wind and a storm, a cloud surrounded with the splendor of the ray and of the fire and ace the figures of alive beings appeared that human beings looked like, each one had four faces and four wings and for the sides the figure of an eagle, a bull and a lion and when they moved they emit the sound of a powerful thunder" (of many waters). It was the form more specifies that uses Ezekiel to describe extraterrestrial travelers.

The biggest siblings have confirmed us their presence in previous times. Their constant visit to this world called Planet Earth. They have spoken to each other of the *Universal Father's creative capacity*, and that they make part of that same divine and theocratic organization, of the one which in elementary form, make part us the inhabitants of the Earth. They have made us mentions; they have given us orientations on the non participation in spectacles or public spectacles, as the stadiums. They speak of other of **beings outlying (peripherals)** that they locate in the superior part of the stadiums, to absorb the subjective emanated energy of the throats of who scream, applauds or simply they sing the goal. That energy exteriorized by those that visit the stadiums, are used by these outlying beings to travel in the space. They have explained to us that the outlying beings teach to the animal race the technologist or space navigation. Of equal it forms as here in the earth the circus teaches a monkey to ride a bicycle, handling of other apparatuses. Of equal it forms the outlying beings taught to the animal race of those constellations the handling of the ships, later on those beings stole, that is to say, these ships were stolen and with them they travel through the universe with an almost human intelligence. For this reason many inhabitant beings of the Earth, have seen hairy extraterrestrial beings and with animal

Blue Book: The Path to initiation

form. They are not human beings; they are animal of other outlying constellations that visit the earth to steal food and **the water**.

It is called outlying, because it also exist the Central **Beings**. The central beings are those that are a lot more near the Creative father's Laws, that is to say belong to the central spheres of this galaxy or of another galaxy different to this. The outlying are very far from the Creator's Laws, and they are those that violate the theocratic principles.

They have explained to us that of the different constellations, Greater Brothers have sent telepathic messages to the different chambers to which belong the different stars of these and other galaxies. These chambers goes from the first to the chamber twenty-four, the **Earth** for example, belongs to the **chamber 13**. We can already make an analyses in relation with the modus vivendi of us in this world Earth.

Of different galaxies, messengers sent those messages and these they travel by the space it is possible that today or tomorrow we receive a message or arrive to our minds. A message that is emitted ten or twenty thousand years ago, but that comes traveling the universe. It is possible that we also emit spiritual signals, prayers, Etc. To the universe requesting help and that these messages are captured many after , this frequently usually happens in the spiritual institutions.

Among other teachings has given us rules to recover the Universal **Verb**, the language of gold of the ancients, like they have clarified us that our language is completely altered, There words are highly evolutionary and vertical, but the earth languages has many words they are full with messages completely destructive subliminally, words like analyses, overkill, jackass Etc. Only separate these words and we will find the disastrous part.

The presence of the Greater Brothers for these times is vital and definitive. These beings highly spiritual give us messages coming from the Universal Arks, and that they are emitted in ultra states and states alphas. Our psychic state oscillates in state mega, Etc. It is complex to understand, however we will transcribe it so that you have an idea of how are the celestial messages. Although our projection is not the search of UFOs these experiences have given us margin to talk with authority, clarity and seriousness about the flying

Blue Book: The Path to initiation

plates or **Zeles**, as they the cosmonauts call it. All leader or spiritual leader that dialogues on the topic of the beings should be under conditions of cooperating to the verification of the Greater Brothers.

They have guided us on the problematical of the cemeteries, of the jails and of the hospitals, but essentially on the psychological sphere . Among these messages we have the following ones:

FIRST MESSAGE

“Your guide is in your heart, It is your rock, your salvation, your hope.

The iron that has your opposed, will be covered the ether mortum.

In the cuprum of your right is the elixir to become purified and take it away from the shepherding of death. Get on the horse that will drive you to the reignus of the sacred sanctuarium. There you will not drink vinegar for the thirst. Open the doors of the Ark and you will found the hydra sacrus. When you were a wall, you had to cover and protect him with strong wood. Now you are a unseamy mantel, the one that will cover with fine threads. In the moment in that you comprehend this projection; you will be openly the spiritual messenger in the Earth, as of Pegassus, after of the soul isolation of the three-dimensional principle.

Do not allow that your vision sleeps; be freed like a bird from the birder that for his own good locates him in a cage, cutting the fluency of rising. Your visional order should be projected toward the future, in the past only will see the bases that the eminent guide edified to begin your mission.

And we will build our temple there, as it is written.

Your mind is favorable to sow in summer and to harvest in winter. This crop shall be given, through your heart.

It is the hour in that your serpentum, embrace the sword of cuprum and integrate those values, the arch and the lance are not necessary for them.

Ascend to the tower and will see from there, the life. Do not descend the earth is not your place; it is for you preferable the waters.

*This message was delivered by the cosmic missionary **YUNG DIFEL**.*

Immediately will give another message:

The net is not for the birds, neither will use it in the squares.

Blue Book: The Path to initiation

Your name will be inscribed in the mural entrance of the cities,
While having beings in the temple, do not occult the lights that project the
paths.

When the trees chant have present that each will be beside a river, with a
majestic flow favored by the serpentine order

When founded the sacred mount, do not precipitate to enter .

The thorns will be waiting where to take refuge.

Lay down in the morning, sleep in the midday, but wake up at dusk, only that
way when arrives the night can be in guard.

With your dynasty and imagination, observe each step, and do not make
jumps in the path, only walk do not detour neither to the right neither the left.
The past corresponds to the Law, that is the lamp, the present to the science
that is wisdom and the future to the illumination that is the fusion. Here is the
seventh mystery that in Martian regency will unveil.

The cosmonaut that sent this message is: **BATAD SHEIZ**

Of these messages we have dozens in the files of the foundation that we
have organized, and today they are continued being received and each day
they are increased because we are living complex times.

To the earth intelligences of different worlds are arriving, but we should
clarify that not all the extraterrestrial are spiritual. There are antichristic
beings that have visited the earth and that in these times they flow with
groups or people. Intelligences that only have interests in the technical
development but not the spiritual one.

Relatively it is easy to know if a contact is with spiritual beings or one with
outlying beings (antichristic), when the central beings have visited the earth,
they don't pose their ships but rather they maintain them levitating to scarce
centimeters of the terrestrial surface, they don't leave prints, because these
prints imply to destroy or to burn vegetation, something that is against the
preservation of the life in all the Kingdom.

When they contact somebody, they make it through harmonic methods that
don't alter (scare) the contacted. When it is for a transfer to another star, their

Blue Book: The Path to initiation

system is to orientate practice and preparations in the three states: physical, energetical and spiritual.

We have heard of contacts with beings that abduct people abruptly, and days after they leave them in any place. To other they have extracted them the sexual energy, either copulating with another being or for artificial means, and the Greater Brothers have guided us that there are people that have been abducted and they never return them. In Great Britain, for example, they stole wheat, and water and they left figures in the fields.

Until today there are people that refute or they deny the existence of life in other worlds. However, in the earth there are evidences, be they of life signs or witnesses of extraterrestrials in previous times.

In Colombia we have to the statues or monolithic of San Agustin, they date of the Century VII before Christ, and they are identical as much in their form as in their weight to the opposing ones in smaller Asia. This passed unnoticed if one didn't keep in mind that only starting from 1492 - Discovery of America - there is communication among other continents and ours.

The pyramids of Egypt: A transcendental culture that speaks for itself, there is not a scientific explanation on its construction.

Important and significant data are alive in this whole culture: The weight of the pyramid of Keops is of 5 millions, 955 thousand tons, here the surprising thing is that the weight of the earth is also of 5 millions, 955 thousand but in quintillion tons.

In the dark tunnels of the pyramid there are drawings clearly intact , that not only it demonstrates their preservation capacity, but rather gives a lot of light on its technology, since they are not soot rakes in the walls and that they indicate the utilization of brands, it is clear that used electric energy.

The great pyramid divides to the valley of the Nile in two exactly same parts, and is located in the centric geographic point of the planet. What are not able to explain the scientist, is how made the Egyptians to lift the pole that conform the chamber of the King to 108 meters high, they are 9 poles and their weight is of 60 tons.

Blue Book: The Path to initiation

Their height multiplied for a million, gives the exact distance of the earth to the sun.

The perimeter of the pyramid is divided in 365 scales of a meter that the Egyptians used to guide each day of the year. Between brick and brick of more than 30 tons cement of any species doesn't exist.

In the sarcophagus they are latent the MUMMIES the Egyptian prepared for 6.000 years, and the curious thing is that the scientist of these times has not found the formula to prepare a cadaver for even one month. These mummies were subjected to study and when subjecting a part from their body (Hand) to a dilution of alcohol, encounter that intact blood that springs from this hand, and gives the impression that this mummy had just died.

“The death will arrive to who perturbs the sleep of the Pharaohs”, this inscription, located in the superior part of the sarcophagus of a pharaoh was challenged by Lord Carmavron and an expedition of 22 archeologist in 1909, they violated the sarcophagus to investigate to the mummies, it happened t something strange tothem, the 22 archeologists were dying in different forms and to the 34 months after the profanation died Carmavron, and it was the last that was in that expedition. The Scientifics doesn't believe in the curse of the Pharaohs and they explain that the archeologist possibly died because in the Sarcophagus it prunes to have certain powder that poisoned them . But not all the archeologist died sick, some died in tragic form .

When they built the most “secure” ship and luxurious of the world, that is to say TITANIC, in their first trip, collapsed and 1513 passengers perished. It is curious; in that ship they took an Egyptian mummy to make experiments in Europe.

Because of the dams of Ashuan, the Scientifics decided to transfer the effigy of the Pharaoh Sephu II, but to be able to her to transfer the they had to divide it in 3000 pieces, they numbered them and they armed them in the place where today it is, the significant thing in this episode is that that effigy taken for the Egyptians in a carved single piece. Is it that the modern technology inferior to the old one?

Blue Book: *The Path to initiation*

What we look for with these orientations is that we understand that in all the actions of the Egyptians there was help of intelligences of other worlds.

Another great culture is located in the Easter Island in front of Chile; they are the giant monoliths that observe to the stellar space, as if they expected the arrival from somebody. Not there are data that demonstrate the origin of these giant monoliths, or who putted in that place.

There are really many signs in this world that have made us meditate on the visit of other intelligences.

The tracks of Nazca in Peru, they have a longitude near 40 Kmts and in that area drawings appear in the floor, the figures of a hummingbird, a Chimpanzee and a spider. There's not a mountain near, there is not a place in the earth from where it can be observed, only elevating to two thousand meters high can be seen and to analyze these figures, this indicates us that who drew them they had to rise to that height. They are many those that we coincide in that this area was as a cosmic port.

The Churches that guide our origin, and especially those of Thailand (Bangkok) their copulas is identical to that of a Zeles or space ship. In our country, the Churches have form of rockets.

The captains of the airplanes declare the fear that they feel when going by the triangle of the Bermuda (Puerto Rico, Florida and the point Bermudas) and it is logic, this mysterious triangle has disappeared airplanes and ships without finding an explication on this phenomenon. The Brothers of the space have guided that in this triangle there is a teletransporter Graff that in certain meridians or periods of time its activated.

To the Earth they have visited different types of cosmic intelligences , beings that go from winged angels, until perverse monsters that abduct human beings to improve their species.

In the case of Roswell they present the autopsy (necropsy) of a supposed extraterrestrial that the Scientifics captured when these they had an accident in the desert of New Mexico. Here is something that has passed unnoticed and it is that the alien doesn't have navel, and that is indicating that is not product of a maternal conception, but rather is the result of a genetic engineering, something kind of a clone, the one that allows that with one

Blue Book: The Path to initiation

genetic code can create beings in series and logically this action is antichristic.

For these times there's a peak or more of a despair (Fanaticism), as for the contacting of UFOs, and this is not completely positive, the search of extraterrestrial beings can take to the investigator to a fascination state and dream for many years. The fact of being transported by a ship to a star doesn't provide values to a person(Soul grades).

If for example somebody lives in a mountain, far from the civilization, when it arrives to a town or city, meets with cars and an entire technologic summary that impact and confuse him, but passes a year and indifferent becomes. This same person when being gone up to an airplane seems something extraordinary and surprising to him. In a year turns indifferent to it, If it is able to be gone up to a cosmic ship , the same sensation will live and its just another experience , his soul has not evolve living these experiences.

The UFO investigation can make part of our life, but in a balanced form and outside of the fanaticism.

The celestial ships necessarily have to show in this world, it has happened from the creation. Only with the studying the cosmogenesis we will find that when the earth was sprung from the universal womb and inhaled its introitus breath and it was under conditions of being inhabited, of the different stars they were bringing plants: Lunar, mercurians, venuses, solar, Martians, jupiterians and saturnians. Of equal it forms it happened to the animals and with the races that today inhabits this world.

From that time, crossing for the different ages narrated in the Bible and other sacred books until our days, the extraterrestrial have contributed to the development of our star, as this humanity will also contributes to the development of other primitive stars when we advances, that is to say, when we are in chambers more near the Creator (7,6,5,4 Etc.)

Synthesizing this part of the extraterrestrial life, we find that a star guided the magicians kings and conducted them to the place where the Savior was. Obviously a star cannot move away from its orbit, and the Creative Father in

Blue Book: The Path to initiation

its position like exemplary being doesn't violate the eternal established Laws as disciplinary codes. As neither the cloud that you took Jesus to its origin (Facts 1 verse 9) was a common cloud, what indicates that as much the Star as the clouds appointments in the Bible were ships. Apocalypse (Cap. 1 verse 7) it mentions: there *"is here, I comes in a cloud and all eye will see him"*.

We believe that you, friend reader, he/she should not neglect their spiritual development for the single fact of investigating the UFO phenomenon, flow with Your Great Presence that the contact of UFOs will come alone.

There is a clear idea in which thousands of people coincide: The beings with wings (winged angels) that the prophets saw (As in the case of Jacob that fought with a angel in Peniel to win the blessing) These winged beings mentioned in the Bible in repeated times, came, as the Christ declares it: "MI REIGNS IT IS NOT OF THIS WORLD".

THE SEVEN PATHS

"The esoterist can fall seven times,
But if it is really one, seven times
Gets up again"

From unmemorable times, the humanity's history registers the spiritual search. That perfection or reencounter within him, it has been mentioned and ventilated for countless spiritual guides that have embodied in this world earth, so that we understand the urgency of returning to the **Creative Father**. We can see a without number of Churches, beliefs, myths, dogmas, Etc. That they promise to take their members to the Creative Father's breast. It only takes to see the television a little or to listen the radio and all the propaganda of a religious certain institution, looking to call the humanity's attention. It is obvious that we require the presence of our spiritual behalf, but it is necessary to be realistic and serious in this search. We can allegorize that the spiritual conquest as the fairy godmother of the ancient, of the legends that after the first contact goes to the invocator in the fair moment. It is urgent that you understand and channel the presence of their spirit. Keep

Blue Book: *The Path to initiation*

in mind that the electronics is there and only it works when we discover it, but of nothing serves a electronic piano , if one doesn't know how to locate the transistors, the filters and other elements, however also is there.

In general who belong to a religious current it is because somebody indicated it and many until transform into imitators of that somebody. When that leader or representative falls, the faith of those represented gets a cold automatically.

In the micro cosmos man-woman, seven centers or chakras exist that at the same time have fluency in principles or vital bodies for our life. Among these we have the Instinctive Center, in charge of protecting the physic body, when somebody enters to a theater to witness a terror filmmaking or in other circumstances to be killed of a fright. If the instinctive body discovers that the person is suffering, it displaces to the vital center and automatically the being faints, that is to say that the fainting comes to be kind of a defense of the organism. The instinctive center is a hearth between the mental center and the astral aura. When for to a or z circumstances has to go for a certain experience and the instinctive center discovers that it will be unpleasant it uses to the nervous system to arrive the message with the objective of preparing it. All the investigations that we require can be channeled through the instinctive center, like it is logic some have the instinctive more developed that others, but in all ways all human being possesses this virtue. Those that are insensitive to the instinctive center also can develop it. Not only can they receive messages but also to project them and to use it as a potential energy to our favor. Among those things that he/she requires investigating is the line or spiritual path with which internally flow.

After making a constructive observation to the different types of beliefs, dogmas or myths, we arrive to a conclusion: Seven basic systems exist to go through to find God, these they are: The Fakir, Sanctification, Submission, the Monk, Ritualization, Yogi and Sacred Marriage.

All religious institution in the sphere Earth depends on one of the seven lines. Let us explain a little the position of these paths.

The Fakir:

Blue Book: The Path to initiation

They are based on a principle or axiom that says: "Who restrains himself, dominates the universe" and obviously the spiritual scales are inside the Universe. This famous prayer is practiced by the fakirs, achieving a physic domain. Well it is known that the fakirs practice the mummification themselves, they are buried alive during days, they enter knives, needles and other short-piercing objects and with these actions they seek to conquer the realization of the Great presence. The Fakirs **forget** that the sacred writings explain: *"Know that your body is the temple of God and that the spirit of God mores in you, if anyone destroys the Temple of God, God will destroy him, because the Temple of God, which you are, saint is"*. All the sacred writings make allusion to the preservation of our physic body, Bhagavad Gita, Talmud, Coram and fundamentally the Bible. The fakir's finishes with the lacerated body, marked, destroyed and the spiritual part in elementary grades.

Sanctification:

It is a highly sublime road, their practitioners stay for ninety percent (90%) of the day in prayer, basic prayer, continuous prayer, they are devoted to carry out works of charity, to help to the unprotected, they organize foundations, Etc. All this is very interesting from the human external point of view, but we have to remind to those that practice this doctrine that our mission in the earth goes a lot of more and is related with our hydrogenization, for further orientation, go to the chapter on the prayer and the states of the soul.

Submission:

This doctrine, it is practiced in occident but very conditioned. In the east when the Baba or Guru choose a disciple, this of that moment surrendered to the teachings or doctrine body in soul and body like one says commonly. This represents that the initiate cannot have their time, but rather it is consecrated to the Creative Father's service. In our western culture the common of humanity, they believe to practice the submission because they choose a certain time, a certain date to make prayers. The submission is to surrender in conscience to the devotional service, independent of its daily work, our culture no doesn't practice this path, partly because the earth lack

Blue Book: The Path to initiation

of suitable Masters or Gurus that can guide them in the true mission and to realize it because that it is **their-mission**.

The Monk:

The monk's synthesis is the Creator's contemplation, what is gotten through the superior meditation. The monk is isolated of the civilization, in monastery where only reigns the meditation. Among this dynasty the religious "Strong feelings flows it as of an internal key that according to he **Minyiar** or supreme commandant permits them to channel the instinctive center or Chi energy. That energy is channeled towards itself to reach the illumination. When arriving at the monastery who receives the person interested in practicing that doctrine "That should be man" is a monk with little experience. And if is interested should really receive or to embody the ages of the disciple, which are: Age introit: Three years; Acceptation: Seven years; Stability: Nine years; Consecration: Twelve years; Disciple: Fourteen years; Guru: Eighteen years and Contemplation: Twenty-two years. These stages are fundamental and who wants to arrive should have basic patience, because only till the 22 years is going to be able to be a monk. Obviously the key poses it the Guru or Guide of the monastery and who wants to reach that principle or that key, his duty is to wait with a lot of calm and patience the initiate's years.

Ritualization:

All action or organized movement inside the celestial harmony is in fact a ritual. When we eat, if we do like an animal imitation, we are ritualizing. When we say animal imitation, we are referring to the animal abruptness, since in some cases like the dove, the turkey, Etc carries out runic and lamasic movements before copulating with the female and these movements are ritualistic because they are harmonious.

Essentially on the path of ritualization mention is made to the spiritual part. Groups like the Freemasons, Catholics, Gnostics, Etc. They meet in certain mystic dates to ritualize. Without fear to make a mistake, I can say that these rituals are 100% mechanical. There is not spiritual innovation. The microcosm's man ritualizes constantly; it is logic that is in internal form. **So that the ritualization is Spiritual, its practitioners should not read liturgical books of any species.** Permanently inside the microcosms man

Blue Book: The Path to initiation

or woman, the Interior Father and the Divine Mother they represent the priest and the priestess.

We all possess a Guardian and we possess a Spirit and Soul, all these forces ritualize constantly in us and those that practice the ritualization only will be able to understand the intrinsic meaning that has this principle when they are connected with thyself and can see the spiritual occupation or ritualization that happens in each human being. The rituals are didactics or manifestations of our internal forces. Only that the practitioners have to be synchronized and to capture the voice of the silence, which is given to the unison in all the fraternal members of the temple. This indicates that it cannot exist displeasure or discord for very elementary that seems, among members of the temple that aspire to the ritualization.

For this reason it is difficult initially the practice of this doctrine, the sensorial perception is required to capture the essence of the practice, either a mass or a ritual. The Father Creative ritualize through the Universe and through the life. When have you observed in the creator's ritualization that a setting of sun is similar to the one that saw previous? That is impossible, each day it is a different setting, there is a permanent innovation, here it is completed the acronym or famous prayer: INRI, placed in the superior part of the crucifixions, INRI: **Ignia nature renovatur integrans**, the **fire** renovates unceasingly the nature.

The Yogi:

The Yoga is an ancient practice, praised by Vishnu, in the Sacred Earth of the Vedas. As everything it is dual in the cosmos the expression YO have two channels: One that projects to the Ego and the other one that it projects essentially to the virtue that comes from the Father, is to this YO that makes mention the **Ga** because the word Ga of Gandhi, Ganges, Etc. It means union. In synthesis Yoga it means union with God. In the last times has ramified in seven orders, in those that the follower can choose the path that requires. These are:

The **Hata-yoga** That consists on contorting the body to the maxim, being about to fuse or to find the idioplasmic atoms, more than seventy positions these practitioners assume. We met the case of a practitioner of Hata - Yoga

Blue Book: The Path to initiation

that contortions to the maximum, then introduced himself in a glass cube to which filled with water until covering him totally, forty minutes was there, after of taking out the water, again returned to its natural state this branch of the Yoga, is related a lot with the fakirs.

Mantras - Yoga: This school is based on the sound and its diverse manifestation forms. Mamtrams, is the universal sound, nobody can deny the influence of the sound in the Kingdom of the nature and is demonstrated that the plants are developed more with music, that is to say, Mamtralizing them. The army when marching through a bridge, they break ranks, to avoid that the sound synchronized collapse the bridge. The Bible narrates that by the scream of Josue and the horns, the walls of Jericho fell. The old **yogis** by internal vision discovered that each human being possesses centers called magnetic Chakras that are regenerated or they develop by means of the vocalized sound, they discovered too that each vortices reacts with a different sound and that has to do with the planetary sounds. The school Mamtrams-yoga teaches to their members the development of the psychic power that is not another thing that the integration with seven magnetic forces those which as CHI energy **CHI**, creates prodigies.

Whole hours Mamtralizing remains the yogis, different sounds, until reaching the essential unpronounceable sound. Individual sounds as the vowels, intoned in a level (Decibel) to internal magnitude give as a result, the awakening of a certain magnetic field. Those abilities like the clairvoyance, the intuition, the clairaudience, the telepath, Etc. They are product of the conscious intonation, non fanatic of those sounds. It is possible that you, friend reader don't possess balanced centers. Then it is little what will serve you the intonation of these sounds. This is analog to take medicine without a precise diagnostic. Not all the mamtrams is verbal, nonsound (Breath) and the mental or psychic exist. Everything depends on the state of the magnetic field that you want to develop.

The Kundalini-yoga:

It is necessary to keep in mind that the yogis don't have partners, in general they live away completely of the woman, and more if it is about this school that represents the sex-yoga.

Blue Book: The Path to initiation

From Genesis until the Apocalypse year 92, and from the year 92 until our time, the woman has been displaced by the man, she has been underestimated until arriving to the point of considering the woman an entire Karma.

The allegorical history of Adam and Eve, in which Eve invites Adam to eat of the forbidden fruit and that of all the expulsion of the paradise came. Has been understood in literal sense and arose the sentence "The woman it is the man's perdition". Following the orientations of the Greater Brothers, Lot adverted to his wife to leave without looking back, thing that she didn't do and transformed into a Statue of Salt. This is in **Genesis Chap. 19**, in genesis 19 : the daughters of Lot gave him wine, they make him drunk and they go to bed with him and this way they are able to conceive both. Again the woman's error, but the Bible is definitive, we find in **Leviticus Chap. 12** the following thing: "If the woman gave light to man to be dirty seven days and to remain 33 days purifying. But if she gave birth female will be dirty 14 days and to remain 66 gives purifying, in the Book of the Judges, Chap. 16 "the Fulminated Tower" Sansom falls cheated by **Dalila**.

Kiayok: That founder of the Dragonic Order in China, next to **Jakao** his wife was able to lift a fifth fohatic (fire) order, that of not being for **Jinea**, a seductive woman, the final conquest has been unavoidable. For this reason the current ones professing this path ,they don't marry, they hate the woman and who already enter married, they are not allowed the near of their wife in the street, if they walk together she should go to three steps behind the man.

Almost all the religious, direct institutions or indirectly they perturb the woman, more in a psychological form, but they do it. The woman aware of these actions hoped that the biblical prophecies was completed and the prophesied savior, who came will give the woman the precise place; but the redeemer came "and elected twelve apostles, men all". The beliefs or Churches like Masons, the Catholicism and others, they took this action like definitive and today per today we have the priests officiating alone. Only go to the church and we will see the mass is officiated by the priest, the **Isis** or nun doesn't have participation.

Blue Book: *The Path to initiation*

The Kundalini-yoga pursues the awakening of Kundalini, which is a fohatic snake coiled in the coxis region and slept in the common of people. The alchemists' seers have declared that only through the seminal vapor this vital snake can move, as the ships or the ships moves through vapor. And it is that this class of vapor can organize it:

V: Veracity

A: Auto observation

P: Perseverance

O: Optimism

R: Reencounter

The sexuality has been classified in **three chambers: Infrasexuality, media Sexuality and Suprasexuality.**

Infrasexuality: It is the sphere that sponsors the prostitution, lesbianism, homosexuality, masturbators, Etc, Also is in this sphere of who don't like sex or hate it sex. Those that guide to the youngers to masturbate, because according to them, is not offensive this action, they belong to the infrasexuals, ignoring that a masturbation is equal to seven sexual normal relationships. He who masturbates can sleep the whole night and at dawns is tired. You understand friend reader that in the same form as the seminal vessels expand to expel the energy of the masturbator, it contracts the same to absorb humid air that passes through the ether from the nervous system to the brain, producing nonfluency in the alpha rays that communicate the brain with the mind and in he/she begins to appear lagoons and lost of concentration including general weakness. The student should never masturbate, because will destroy, we repeat, the alpha rays that are those that balance and they organize the memory ,they communicate and later on they will have many difficulties for the study.

Three vital substances have the sexual energy: Silicio - Phosphor, Calcium and Lecithin.

Blue Book: The Path to initiation

Silicio - phosphor are those that vitalize the Nervous System, the Calcium it constitutes the bony medulla or akasic register and Lecithin it is the one that compensates our cerebral neurons. The silicio moves for the system nervous analog to the blood by the arteries. The Calcium vitalizes the medulla that is related with the memories and Lecithin constantly give margin to the renovation of our cells. The **Kundalini - Yoga** (Union with God through the sex) doesn't **allow** its followers to spill the sexual energy and this is based on the Veda books. The Christian also finds that the Bible makes direct mention of the sexual energy, only with reading the book of **Leviticus Chap. 15, verses 16, 17,18**. We will find a great truth on this situation. The Microcosms man are constituted restructuring the lunar hydrogenous that are necessary in him, those that obtains from his couple (woman). In a same way it happens with the Woman, that finds the solar hydrogenous in the man. So that it is **not** the man more than the woman, neither the woman more than a man, they are two parts of the same universal principle.

Seventh Path is: **SACRED MARRIAGE:**

In previous lines we mention the election of the appropriate path. We mention it because in our western culture everything is requested with urgency, if somebody arrives to a ice cream shop and at the ten minutes they have not assisted him, looks for another place, equal it happens with the spiritual path, determines a basic time to reach the final liberation and if in that time doesn't achieve it, is able to renounce. **The great truth is that the initiate should travel these seven paths and to take the essence out of each one of them, only this way will be able to constitute the true microcosms, that is to say that the intimate realization of your magical spiritual presence it arrives when we have embodied step-by-step each one of these paths.** Is not only one path the one that will take to us to the final conquest. We will be able in this existence, to like one says, fertilize the land, because also is possible that you in this life sow the land, and in the next existence water the land and in the one that comes is able to harvest, this is clear.

Blue Book: The Path to initiation

In the external world when somebody wants to build constructions, studies engineering. The same thing happens when wants to heal the humanity, study medicine and successively. The curious of this matter, is when one thinks of the marriage, simply they marry. And as a result of these marriages without preparation, today gives, we have super populated the terrestrial sphere. Seven thousand million inhabitants, the Scientifics has said that if we follow multiplying in the same magnitude, when we arrive to the year 2.100 each human being to occupy a square meter of the terrestrial sphere. On the other hand WOH. (World Organization of the Health) has outlined the humanity the diverse planification methods: Biorhythm, Ogino-Knaus, injections and pills, condom, spermicidal, intra-uterine device, bond and cut of trumpets or vasectomy in the man, system invitalis, Etc. Each one of these methods is direct attempted against the nature, so much interior as external.

The true marriages pursues the authenticate realization of our magical presence. We have been indicated that the Karma is transformed with the scale. What has not been indicated is the technique, today we know that the Microcosms man, possesses **three scales**: and that they constitute them: It Water (Man) and fire (Woman) giving as a result or synthesizing in the balance that is Soul Hydrogen.

The first scale is in the **Testes and the Phallus** in the man, in **the ovaries and uterus** in the woman.

The second formed by the lumbar **vertebras and the kidneys**

The third formed by **The Eyes and the nose**.

It is obvious that these scales are the etheric world and only can be balanced in completely constituted couples at a level physical, energetical and Spiritual. In the physic part the applicant to the sacred marriage should not have commitments but with the suitable woman, if he has children the juridical situation should be clear openly. As for the energetic part they should be free, that is to say **DISLIGATE** or breakaway, the man of all the women with which he has had relationships and the other way too. Understand then that when the man unites to a woman, when they form a single meat, as mention in the Corinthian book Chap. 6 verse 18. Only through the sexual **disligation** is possible the liberation of our energy. In the book "Order Zigk" explains how the person can disligate.

Blue Book: *The Path to initiation*

The soul constitution is through of the **Real Being or Magic Presence** of the male and of the female.

All this indicates that the initiate can arrive to Suprasexuality, when there is already walked all the paths announced. It will be absurd that somebody with only some months of knowing the teachings, seek, without some preparation, to practice the Suprasexuality, this action can take to the failure directly. It is necessary to understand that Sunday doesn't arrive on Friday, but on Sunday. The Suprasexuality should be practiced only when a suitable Guru and with the White fraternity authorization guides it. Then hand in hands, go on directly to the victory.

THE CHRISTIFICATION

The present writings contain the fundamental principles that necessarily can take you to the Soul conquest. This writing presents to you the fifth mystery, the fifth unveiling that is exactly the unveiling of the four gospels. Our **watchword** is to reconcile, integrate, the science and the dogma. The redeemer of the world brought the seed, we through of this unveiling are sowing, so that who listen to us, pick it up, make the harvest with justice and wisdom. We make it with the authority of the evidence and with the force of the reason; the fundamental impulse that moves us do this transcription is to avoid that you ,friend reader, die twice. Each prayer takes in itself the recapitulation of each one of the molds of the chambers of our **spinal medulla**, understand it, because identified yourselves with each one of these medullas, is the **generic indication**, but the intimate initiation of your spiritual medullar grade it is the identification with each one of the 33 chambers, with you the wisdom of **GOD** in mystery, the hidden or occult wisdom.

Blue Book: The Path to initiation

When the divine teacher *Zigk Gnanak* travels to the terrestrial sphere with the generikum coptus scrolls, from the spiritual world, fulfilling cosmic orders, it is intercepted in spiritual form by the lawyistic order, present the scrolls, the beings that understand the current state of the terrestrial sphere are projected to Guru Zigk Gnanak and they say: "That how is possible to give that wisdom to the earth, it is much the wisdom in it ". The Guru responds with simple fraises but specific: "Nobody can receive more of that can channel internally ". The lunatics channel madness and the wise wisdom. These messages are for the strong ones, not to be read by the weak. The Guru Zigk comes closer to the earth and it is intercepted again, now in this occasion for a indimensional being , with principles that the great Guru defines as Ophak (Opaque), it says: "I know what you take in those coptus to the earth, that wisdom is infernal" Words of the being. "*Why do you insist on giving doctrine to the earth and more of subjective order?*" A single fraise is enough so that the being disappear, he answers: *Does your ignorance maybe depend on the Heavens? Is it heritage of the Creative Father the ignorance?*". The Guru Enters in the terrestrial atmosphere through the Diany Boody (the human soul) it begins the projection from the chamber 33.

CHAMBER 1. Never cry when the lamb is sleeping .Do not drink wine when its flavor is unpleasant. That tree that we have planted is dead, but we can warm with its wood and with the ashes plant another tree there.

CHAMBER 2. The soul suffers because of the misplacement and intention of your desires, for the obsession of the lie. Love to immortalize and not to absorb, loves to improve and not to possess, love to give, not to receive.

CHAMBER 3. Do not cry husband because your wife has died, she will return, don't despair. Only went to changed dress, Have present that we are the other ones and the other ones are still us.

CHAMBER 4. All the existent is to be forgotten in the other life, but you will find the freshness of life that approaches and essentially the chastity of the cradle. Then the power of forgetting will be with you and never come the moral hardships.

CHAMBER 5. **IOD HE VAU HE** will be with you from incarnation to incarnation, there you will have him present, those beings that are for you

Blue Book: The Path to initiation

sympathetic, are a sign of reconnaissance of all the incarnations. That's in family, That is in the Universe, that way is in the Earth, the Creative Father's Law fills all the distances and never exists a void between two hearts.

CHAMBER 6. The hell is not paved with good intentions, in essence the crematory oven is paved with disastrous intentions, that the human wanted to fill the heavens of false virtues, but they were discovered.

CHAMBER 7. To each one of you the spiritual justice has given an animal to domain, to exercise the domain on it, it is necessary to tame the lion or the serpent, but not the lamb. When is worshipped the Creative Father the wisdom begins.

CHAMBER 8. All force requires an impulsion, it looks for an action and leans on the resistance. All force dominates the inertia, but not all inertia supports the force. All repeated action determines a force. The continuous force for minimum that is, triumphs before all inertia. Hercules can strike with all his force a curb using its lance; it will be minimum the perforation, but the water slowly through the inertia can pass through you.

CHAMBER 9. The superstition doesn't have any sense before the religion that is eternal, but the religion can fall ostentatiously before the superstition, for the infused power that it has and it is that all force needs of a weakness to be force. All enthusiasm, multiplies the force of the soul, but the enthusiasm is excited generally by the feminine part and this it represents the human weakness.

CHAMBER 10. The absolute thing indefinite is the soul and the absolute thing defined is the wisdom. The unconscious soul is not secured; it is proportional to the soul of the knowledge. When somebody **knows** more, more is the grade of the soul and when somebody **IS** more, more is the spiritual reward. The reason and love circulate around the Science (ZIGK), it corresponds to you have Faith in the science, if it is truly we want to arrive to the science of Faith.

Blue Book: The Path to initiation

CHAMBER 11. To say that **GOD** uses madness to confuse the reason is similar to say that **GOD** uses the night to confuse the light of the sun. The soul has a paradise in the satisfied reason and the irritated madness has it in the Dantesque chambers. The Creative Father is manifested through the Laws and these Laws are stable.

CHAMBER 12. The wrong is not another thing that the abortion of good, one can die as a consequence of an induced abortion or influenced by its internal nature. The human uncertainty has declared that the devil is the madness attributed to the Creative Father and that the miracle is the madness attributed by the nature. This reasoning projects that if a single grain of powder could move contrarily to the gravitational laws of the star Earth, automatically the chain of the tree of the universal life is broken and nobody in this universe will subsist.

CHAMBER 13. Those who are able to turn off their debts gets rich. Who is able to turn off the debts of other automatically is ennobled. The night becomes eternal when the day it is very organized, the pain in the woman that gives birth is to feel the assistant's presence, of equal forms death is the remedy of humanity's miseries. The pain is essential, is absolute, is universal, is even natural, but it is not independent, because until the same pain depends on the Divine Law.

CHAMBER 14. From the same instant in that the being machinist of the nature isolates from her, the Mother Nature has been blind and distorted, but in the whole nature the perfection in latent state is the thinking of **GOD**, comes to be the nature the clock that **GOD** has organized. The resistance is to the force, as is the support point to the lever, it is then the nature a wheel that constantly rotates and when you arrive to the highest, if not being because we determine to detach consciously of it to flow in space, it is necessary and unavoidable to be projected down again with the wheel.

CHAMBER 15. All the beings irradiate force toward others, they are attracted or they are rejected among themselves, with that impetus, even being able to be increased or diminished by the Great Presence or by the capital sin. The magnetism is in the humanity, it is irradiation and physical attractions, and these are determined by the Magic Presence. The runic order determines

Blue Book: The Path to initiation

also the increase of the attraction and the expansion; the parts are magnetized by the way of the left and impaired by the way of the right. A human being represents the Unit, two a force, three an organization, four a circle, then two groups form the perfect circle. Twelve active beings resolved in itself and by thyself to flow and to defend the ideal of their Guru, they change automatically the negative principles of the face of earth.

CHAMBER 16. The two forces of the positive magic and negative have a weakness and it is the sarcasms represented by the jeer, the laughter. All initiate, prophet, magician, avoid to 100% that somebody makes fun of you, in the guffaw and in the laugh is your destruction, the weakness of your right or left powers, do not forget, observe the history of the prophets, it finishes when somebody makes fun of them. When a prophet is killed he can resuscitate at the third day, but when is victim of a sarcastic jeer, he falls boisterously. Not it is the light that the sages fear, but the looks and the obsessions of lunatics.

CHAMBER 17. So that somebody accepts the reality and the truth, there is who prefer wrapping it with lies and other to be able to introduce a lie they wrap it with diversity of truths. There's the reality of the universal unveilments. **Jesus the Christ, Mohammed, Moses:** they are in itself the essence, but the Pentateuch, the Mohammedans and the Christian possess diversity of lies to cover these truths. The currents of the universal magnetism go of a pole to another, they go by the nucleus, they go by the essence, but never they stop to think of it, analog is the action of the pendulum, its oscillation it is from positive end to negative end, but in the time and the eternity determines stopping in the neuter force. This is analog to those that hate during a year a person, but the time discovers that they can love that person for 21 following years.

CHAMBER 18. The whole universe is irradiating, it flows and it reflows, your will escapes from your being and through the fatality and its wheel will return to you, if it is the luminous will it'll return to you and you to bring the being's immortalization, if on the contrary it is not it, you shall die perhaps forever.

CHAMBER 19. Clarify the principles and do not adore the devil's god, neither fear a devil of God. A dogmatic demon is an atheist personified. A devil

Blue Book: *The Path to initiation*

philosopher is the exaggerated ideal of the human freedom. A disastrous being is the magnetism of evil, his essence it is the imbecility and for this reason they call him beast.

CHAMBER 20. The humanity is located on an immense scale whose foot dives in the darkness and its summit hides in the light. These are the two extremities, however there are too many steps, steps and words for the men of the light they are very clear, but for the men of darkness are completely dark, and those lukewarm ones the eternal discussion of the doubtful fraises.

CHAMBER 21. Seeing for the men of above, belief for the men of below, systematism and doubts for those that are in the center, wisdom for the seers, madness for the believing blind men and the abyss for those that doubt. Those that doubt move from the wisdom to the madness, verticalizing in occasions and in other the horizontal line, but they are not well in none of the ends.

CHAMBER 22. For the wise the truth, for the reasoners the doubt, and for the children the fable. Bring up a fable to a sage and this will observe, analyze, investigate a truth inside her. Tell a truth to a reasoner automatically he will place a doubt, then tell a truth to a lunatic and will take it like a fable. You cannot speak to the whole humanity in the same form.

CHAMBER 23. The religious dogmas are dark and absurd apparently, the religion of the sages is the high philosophy. The religion properly speaking replaces for the lunatics, the philosophies of which are unable, as for those that doubt, they don't have neither philosophy, neither religion. If the religion has reasonable formula it will be useless for the sages and rejected by the distorted.

CHAMBER 24. What the nature conserves tends to be smashed in vain by the human opinions. At the present time the most natural and sublime of the religions is taken for the most absurd and the men tends to fall in the absurd thing when they want to formulate the unknown from an instant in a moment. Call a child and talk wisdom to him, he will express a grimace. Now narrate to him a fable and will see like he listens to you. The children will grow, but

Blue Book: The Path to initiation

the Creative Father to preserve the fables will send new children. Do not explain the colors to blind men, instead conduct them, but it is not closing the eyes as they will understand.

CHAMBER 25. The immeasurable infinite has transformed into an invincible absurdity in front of the science, now it corresponds to you specify absurd formulas to the human being that doesn't reason, to maintain the great dream of the infinite. To an abstract, palpable or invisible, square, black, round or white entity, represent it before the humanity to the Scientifics with the scientific name and to the sublime ones with its name. If you search for GOD in the absurd will find the demon, but if you search the devil, you'll find the reason. It is logic and it is the moment to analyze the GOD and the devil that the humanity projects, you will find the GOD, that poeticized ideal of that devil and in the devil the creature of GOD.

CHAMBER 26. CRIYALA, a Sanskrit woman with a pitcher of water in her right hand and with a torch in her hand left, spoke aloud to those that went passing by: "I want to set on fire the heaven with my torch and with my water I want to extinguish my hell, only that way, only starting from this moment will understand the phantom that hides my GOD". **Bruceel** that was passing by told her: "If you cannot understand GOD, at least you know what you say when you babble his name".

CHAMBER 27. Want to know to GOD? Love him more than to your life. The Creator represents the best in all the possible kindnesses. Love him more than your parents. Is the representator of all the mortal beauties, everything is in his Being, everything lives off his life, all irradiates from his light, all laughs and sings of his happiness. He is among us, is around you, speaks to us, touches us, fortifies them in the pain. If we love justice, if we love the truth we will be loving God and we will pay him the true cult that He requests you, but do not condemn others, because automatically condemned you will be, the one that excommunicates, is excommunicated, the one that curses, is cursed and the one that reproves is reprovved.

Blue Book: The Path to initiation

CHAMBER 28. Only a true science exists, is the science of good, it excludes the ignorance that makes you do evil, this is really the apple of Eden pruned singly. The ignorance produces the stupidity and the stupidity is transmitted from the Father to the Son like a tradition of prejudices that calls him fatuously the Faith of our parents. This is the original sin.

CHAMBER 29. The true religion is inseparable of the true science. It corresponds then to know, to create with true reason. Until this moment in the entire world the bad ones seems to be stronger than the good ones. Analyze this and it is because the bad ones know how to evil, but the good ones have not learned how to do good.

CHAMBER 30. Expose the white on the black and the white will turn in total splendor. Now put the black on the white and the black will turn in depth. Mix the black with the white and obtain the oscu that is the gray. This makes part of the three-dimensional world, because in the soul or spirit world you will find black Angels and white Angels, but no matter how much you try will not find gray Angels, there you will find the absolute affirmative(negative) and the absolute firmative(positive), but will not find the doubt.

CHAMBER 31. The universe is a formation of intelligences and forces to which call GOD, these forces through of the alphas and ultra threads, they arrive to the atmosphere of the different stars including the Earth. There we are transformed by the living order of the 7 Kingdoms of nature. It represents then thought isn't produced in our heads, like neither the music is produced in the zither.

CHAMBER 32. If you try to introduce the matter in the fire it will finish destroying itself. If you try to integrate the fire in the water it will return to the ether of origin, if you deposit water in the earth it will be irreversibly absorbed. If you spread powder in the air with the intention of recollecting it, it will be as fusing in your imagination the Akash, Prana and the Ether.

CHAMBER 33. In respect to the multiple unit in his constant perfection, it is lived the **Septenaries organizations** from the cosmos to you. Only finding the elementary position will achieve to walk on the earth, walk on the water,

Blue Book: The Path to initiation

flow very freely with the fire, lift the flight, develop the **Akash Vitali**, absorb Prana and **Christify** the ether; there is no excuse before the matter, the energy and before the **Lawyisticum Spiritual order** for not perfecting yourself.

A LAMA RESPONDS

To guide in a better form our friends readers, we will transcribe you some of the questions that were formulated to the Guru Zigk Gnanak in the temple Apocalipzigk.

Q: Venerable Teacher, are you a LAMA?

A: Lama it is not a physic grade, it is an akashik level that we achieved in the monastery of the Nandas, located to the North of Amritzar and ascending by the Ganges. It is obvious that any Lama should flow in any dimensional order. Lama or Divine Soul is the same thing, the buddification or Krisnification of the Lama is to withdraw the seven veils that cover the seven petals of the lotus flower(Whose shade is the lottery), making this the difference between human soul and divine soul or Lama, in accuracy, this being is a Lama. Every Lama should have other actions, seal the seven dimensions, flow with the seven elements, locate the unseamed mantel and their crown that it is the Casak, identify the oslotto that represents the Creator's Breath.

Q: What is a fast or abstinence?

A: A help to Gnus (God), The fast is a discipline through of which the three states of human constitution (Matter, Energy and Soul) are able to evolve. This represents the partial suspension of their functions. In general the humanity only carries out medium nutritious fasts. The organic fast like minimum should be of 24 hours and it begins seven hours after of having consumed the last food, that is to say that begins in the dawn and it finishes in the dawn. A novice only can begin with a day, and then he goes increasing until carrying out several days of fast.

Blue Book: *The Path to initiation*

To begin this discipline, the beginner can consume fruits during that day, ten days later can carry out a fast consuming only juices, later on only to consume some honey of bees, and when passing three months of practice he can already carry out them only with water. It is clear that with the fast the organism detoxify, this makes that flows in a better form with the energy, providing elementary levels to the soul. It assumes it in a majestic vibratory tonality what makes him favorable to the contemplation.

The organism flows well when is provided little quantity of foods. Take in count that it is not the quantity of foods those that nurture the body, but the quality of these. The alimentation should be organized and enter in the transformation. If now you consume three portions (Breakfast, lunch and dinner), it is logical that in a gradual form, in an conscious organization, non fanatic, because if you enter the fanaticism, you can finish attempting against the physic body (The sacred writings say: "Don't you know that your temple is the living body of God....) and the fast before harming the body, favors him. With a nutritious and balanced alimentation, it is possible to graduate it until ending up consuming less than 500 grams in 24 hours.

Moreover its also possible to modify those 500gr of alimentation, the essential thing is the conquest of the Pranic or manna alimentation all this requires of months, even of years of nutritious discipline.

When fasting, do not carry out daily works, and the humanity should not find out that your fasting, which should be hermetical.

The energy also enters in the fast and has diverse manifestation forms. Those sportsmen that sweats more than 700 c.c. of perspiration in a session, they unbalance their vibratory order, of equal forms those that waste their sexual energy. The energy also is unbalanced through the verb, of what is spoken, of the magnitude of the words that you externalized.

This indicates that the sexual energy should be preserved, the same as the sounds emitted by your larynx. It is necessary to practice the verbal fast, which consists on not speaking. It can begin with a day, increasing gradually until achieving whole weeks without pronouncing words. The verb has been

Blue Book: The Path to initiation

altered, profaned and requires to recover its Sacred state. The purification of your verb can begin finding the words that have subliminal messages, among them has: analyses, information, believe, Etc.

“At the beginning it was the verb and the verb was with God, and the verb was God” John Chap 1

Many people begin their life in a certain religious system or church, and for years remains, either because someone told him or was living in some crisis, and is it in this point where has space the spiritual fast that indicates the partial detention of their spiritual activities to meditate, it is as to make a stop in the path and to wonder, Why am I doing in this Path?, is it by imitation or because I have really understood my position in this church?, What have I achieved until this moment? Its logic that these questions should be formulated in state of deep relaxation.

Q: Teacher Gnanak, how can we represent the seven dimensions?

A: For your dimensional projections locate the first dimension in the center of the earth, the terrestrial mass as the second dimension, the surface where you are is the third, the astral plane is the fourth, the time the fifth, the space the sixth that is the causal or theophanic world, and the eternity the seventh; moreover exists the akashics and pranic dimensions where the absolute happiness reigns.

Q: Dear Guru, some evangelists deny the Old Testament, does it have a validity or the Christ abolished it?

A: The Laws and Codes of Ethics are irrefutable and eternal, it is clear that the Old Testament has as much validity as the new one, and as the same Christ declares: “Not I have come to repeal the Law of the Prophets; I have come so that for my means it is completed”. What has happened is that many religious disorganizations have adapted the sacred writings to their ideas and conveniences, thus the fact of ignoring a Law doesn't invalidate it.

Q: To be your disciples do we have to swear fidelity?

A: Well known that to swear is a crime, since distorts the verb, all physical or religious institution that makes swear to their faithful ones, is acting

Blue Book: The Path to initiation

erroneously and against the Law. Bhagavad-Gita announces to Querubh; the sentence should not make pressure on the morals and the Bible declares: "Do not swear neither for the sky, because it is the throne of God, neither for the earth for that is the stage of their feet, that your words be yes, yes or not, not, because what is more of this of wrong proceeds.

Q: Teacher excuse me, but I militated in an esoteric church and directed for a teacher and there I swore

A: No teacher will make swear filigree, be for sure who made you swear is a human being that ignores the spirit worlds. And an if it was the representative or founder, it was not with his celestial soul at that moment.

Q: Venerable Being: If somebody arrives to the cycle end of their existences and has not conquest the liberation, what happens?

A: The determination of the lawyistic order starts from the scale of Mahatmas in continuous evolution, if arrived to this scale, enters to work the universal mercy and in relation with the Dharmic order of the initiate, it is given him another opportunity, but if with the incarnations didn't arrive to that state, it is purified by the angels of death and returned pure to the universal blaze.

Q: In what does consist the transmigration of the soul of which speaks the Bible?

A: You are septudimensional and therefore you come from the seventh dimension, the transmigration begins in the moment that is projected to the sixth dimension for assimilating the impression of this area, of equal it forms happens in the fifth and quarter dimensions, already in the third dimension that is where you are now, the soul travels of body in body. This is analog to a whirl in the street, always sense the same whirl, but in their journey it goes using diverse parts of wastes and leaving others. Later to this transmigration that puts an end to the established number of existences, the soul descends to the second and first dimension, that which can make unconscious (Without Grades) or conscience (Dharmaraja).

Q: Teacher in what differs or there's preference between a soul grade Master and a Katzy?

A: In fact the important thing in a certain existence is not the grade, but the conscience astral fluency, if a Katzy (Second grade of soul) achieves by

Blue Book: *The Path to initiation*

hydrogenization of its human soul the spiritual fluency, and with this grade is under better conditions than a Master without fluency. In this sense there is missionary preference since it can serve as messenger or messenger of the didactic and soul worlds.

Q: Guru what can you guide us on the virgin's of Fatima messages?

A: The truth is that the virgin's two astral forces have shown in that what you appearances, you have to be careful since the dark forces also have shown on behalf of the virgin and these messages are antichristic and they don't mean that they have to make direct allusion to the dark forces. Scrutinize the messages, and if not found allusive prayers to the preservation of the life or of the energy, they are antichristic. And not only the virgin's messages, but of other leaders too.

Q: Teacher, in the group I attended before, the leader attacks you and others, how can we speak to defend?

A: Do not use any word to defend this being (Guru). Have very present that the Universal Laws work by the pulsation of love, the Terrestrial egocentric Laws work for the pulsation of hate, this indicates that all person or guide that attacks others that dedicates their time not to the realization, but to collapse each day in the darkness of the attacks, is far from embodying the comprehension and the love. For the fruits it is known to the tree. To you we tell, do not talk bad of somebody since your verb is sacred, and it is contaminated by the Law of the retroactivity, who speaks bad of other is helping to lighten its egocentric load.

Q: Dear Guru: Why is that the visions and appearances are no longer given of those that speak the Bible?

A: "they do happen. At the present time it is difficult to find a person regenerated psychosomatically, the capacity of capture that the humanity possesses is elementary. Observe a landscape attentively for one minute, then separate the view of this landscape and try to paint it, or try to listen a message that somebody transmits, when finish listening, transcribe it suitably, if you do it your under conditions of having a vision or unveiling.

Q: What do to recover the memory?

R: What you call memory has its base in the bony medulla , and this has as portal the brain-medullar (spinal Column) lecithin, calcium and phosphor they are the three fundamental substances, and these you do not have to buy o find out of you, since they are contained in power in the sexual waters or semen. All that that wastes their sexual energies, either with their wife, Etc. Is in fact destroying their living temple and with this the lost of their memory. We have already guided three couples so that they transmit this sexual discipline to who request them.

Q: Dear Guru, they are esoteric schools that recommend the practice of the sexual secret with few results, what happens here?

A: To carry out all sexual practice, a high level of wisdom should be possessed on this aspect. Those that have had several women and the women several men, to be able to achieve success in the practices with the creative energy, they should breakaway or disligate, be isolated of the energies that maintain him/her bundles to those spouses. Otherwise, these energies take charge of absorbing the vital principles that heighten. To breakaway of those previous relationships is definitive if it is truly wanted to use the power of the sexual waters.

Q: Loved being, why Christ has more acceptation that Buddha and other prophets?

A: Budda, Krisna and other prophets have accentuated in a high level their theological teachings, in occident it is known little these gospels and there are few followers, but it is very certain that the hierarchal difference exists, and it is that Christ (In Jesus) achieved the resurrection, and this it is the one that defines, and it locates in the cosmic order the initiate.

Q: Why is it allowed by GOD the disastrous knowledge that hurts so much the humanity, that of Darwin for example?

A: Darwin's teachings like other have origin in the universal arks, in the temples of the cosmic wisdom. The problematic is in the ARHAT or Human Soul that captures erroneously the message. If the human soul allows that the mind through the thought codes the message, this it finished distorted and tergiversated. But if i is the brain, through of the imagination who codes

Blue Book: *The Path to initiation*

it, this message will be transmitted suitably to the humanity, since it is made feel the harmonic action of the heart.

It is unquestionable that you were embodied in the body of a fish and of a monkey, but to pass from a body to another you had to die, this it was the part that tergiversate Darwin. If in deep meditating state you project to the past in thousands years, you will find yourself with mineral body, vegetable or animal.

Q: Recapturing a previous question, what is Alchemy?

A: Alchemy is not an action mechanical or physical; it is a force or supradimensional order, living symbol of the chastity. Unreachable for the fornicators, adulterous, homosexual and for those that is bound sexually to other women. The being **Alkimia** arrives to the couples when they are constituted and organized, no couple should try to practice the alkimia without knowing the journey of the energy **Chi** through the Living Temple. For each practice it is required the couple to be completely vegetarian, since is impossible the elaboration of a soul hydrogen with animal alimentation that by the way is a symbol of death.

The humanity's history doesn't register the spiritual realization with an animal alimentation.

Q: Dear Guru, the Christ said: “Who wants to come after me, denie itself, load its cross, and follow me”, can you amplify Us this orientation?

A: Three projections that lead to the christification exist:

The first that is of spiral order and is related with the transformation of your energy from the state saturngnus to the state venust, represent the transformation of the capital sins in their genesis or virtues.

Blue Book: The Path to initiation

The second is the diagonal path and that is related with the action of sharing all the gifts that arrive to you by grace, is to share unconditionally with your fellow men.

The third road is to embody step-for-step with the heart, not with the mind, the superior sexuality and with it to achieve the baptism, the one that only arrives to you by means of the pure waters of life. To find the essence of these teachings it corresponds you to meditate, find the silence, since the capital sin or bad habits possess a subtlety capable of cheating the human soul and to make him/her believe that already the is transforming or dissolving, even, to make him/her believe that the alimentation doesn't influence in the psychological transformation.

Q: Can somebody that has been made the vasectomy or salphinxgectomy (Cut of trumpets in the woman) be liberated?

A: “Not to enter in the congregation of Jehovah who has attack against their genital organs” (Deuteronomy Chap 23 Verse 1) The sex is source of life and it generates the energy most powerful that exists in the universe. In fact each one of you, they are the result of the sexual energy. The fact of attempting against the source of universal life implies to deviate the projection in the world of the realization. It corresponds to those who have carried out this unpleasant action, to learn how to use the etheric part of the mangled organs and to work with this area in the evolutionary process.

Q: Guru, why the Fishermen and farmers live badly economically?

A: The synthesis of this phenomenon has it in the violation of the command that says NOT to KILL. All that kills or attempt against the nature, it doesn't matter as it justifies it, will pay. The Creative Father represents the forgiveness, the man, in some occasions located in the heart, it is able to forgive, but the nature like a protocosmic clock is reactionary and doesn't reconcile the forgiveness.

Q: Does this indicate teacher that the implants to the orange trees are not viable?

Blue Book: *The Path to initiation*

A: For no reason implants should be made, all that that tries **to correct to the nature**, even in ignorance is judged. The Siamese are the result of souls that practice implants; the Mother Nature sends them implanted as exemplary order.

Q: Guru is coloring the hair something bad?

A: The hair is a channeler and originator of waves or energies that develop in the astral world, it channels them to your interior and it emits it to other dimensional worlds, but everything depends on the color of hair that determines the intensity of these waves, we have already said that the black color retains greater energy than the white or yellow color, and it is then the same organism who goes changing tonality of the hair, to assimilate the required index of energy being of balanced nature. An old man that only requires minor energy grades and so its hair is white, painting it black is to attempt or to unbalance its organic nature. The hair neither should intersect nor cut, since it is hollow and when its cut it allows bigger index of canalization of the mega waves of the astral world.

Q: Can one say that the earth has hair?

A: The plants represent the antennas radio stations and receptors that allow the elements and living forms in general (Including the man) to communicate with the beings of other stars, for this reason it is a crime to destroy a tree or plant because it will be the depredator displacing from the area the spiritual part. To the peasants owes orientate so that they learn how to take care of the plants in general.

Q: Venerable teacher, is the sanguine transfusion allowed?

A: Not in any form, and not only it is the sanguine transfusion, but the transplant of any other organ. The blood is the synthesis of your physic, energetic (Egocentric) and Soul figuration. In the transfusion only is studied what has the biological factor of the blood, but not the psychological that is more important than the physical part.

If somebody gives a homosexual's (lesbian) blood, paranoiac, criminal, Etc., this disastrous feels transmits to the patient inevitably altering their genetic code.

Blue Book: The Path to initiation

Q: Teacher what exactly is adultery?

A: The common humanity's only sees in the adultery an extra matrimonial sexual relationship, and this it is only an aspect or a reaction. When one adds coffee to milk or water, you are adulterating both products or substances. The origin of the adultery is psychological, if a married man is passionate for a woman, creates an effigy or image mental egocentric that requests him permanent food, if this effigy doesn't find patronage or food in the man it moves toward the spouse and tends to perturb him the life so that he gives it the food, all know it finishes being unfaithful to the woman. When a man unites to a woman, both form a single flesh or corps, this indicates that they integrate in a single vibratory order. If one of both ends up carrying out a extra matrimonial relationship, obviously is adulterating the matrimonial vibratory level. If the couple unites sexually being the woman in pregnancy, also is adultery.

Q: Tell us Guru where the demons originate?

A: As much the deities as the demons are developed in the **Gestum Laborat** or physic body. What is known as customs, bad habits or capitals sins, are not another things that satanic embryos, that if the human being doesn't analyze his actions, any day insults somebody, later hits another one, after hurts or it disables another person, the day comes that kills one or two . All these actions are levels of the same capital sin that initiates in an embryonic state until ending up transforming into a demon because that is somebody that cuts the life of another.

Q: Dear teacher the woman can be realized spiritually?

A: The humanity's history has located the woman like element that the man manages to his whim. From the genesis until our your days, the man has minimized the woman, and this she has been shown submissive before such a situation. Based in that the wife of Lot you converts in statue of salt by disobedience and of their daughters that made drunk him to copulate with. Many women waited Emmanuel's (God with us) arrival especially the Ladies of the dragon in China, Buddhatas of India, Etc., because the coming of the Messiah will give the woman its stability and the value that they possess as eternal feminine, but the Messiah came and chose twelve apostles all males. This increment the idea that the woman depends on the male, and moreover,

Blue Book: *The Path to initiation*

the Bible dictates that God is Christ's head, as Christ it is the head of all male and the male it is all woman's head.

But the path Universal Zigk declares and gives value to the woman because she can reach the final liberation.

Q: In the group where I militated they affirm that SAMAEEL the angel of the apocalypse incarnated again, is this true?

A: His disincarnation was in the 77, then if it has returned his physical body should not have more than of 18 years. It is necessary be careful of egocentrics forces that go to who invokes them. We have the case of Jose Gregorio Hernandez, near five hundred people they say to embody this man. They even describe places in Venezuela as if they were there, and the reason is it is very simple, it is not the spirit or soul of Gregorio Hernandez who goes to the one invoked or to the medium, it is the ego or psychological aspect that attends. It not has anything of strange that this it is the action that is happening with the psychological attaches of the human soul of Samael and that they were not transformed in their entirety.

Q: But, can an ego manage the suitable information or can lie?

A: The ego is limited to transmit what has lived, but also can deceive the medium or consultant, in fact fiascos are known when putting in practice what one of these entities guides.

Q: Guru, what can you say on the lie, didactically?

A: Three classes of lies exist, the organized one, for ignorance and by pressure. The organized one is that that is planned in full conscience that it is a lie. It is for ignorance when somebody comments something about the life in Egypt, for example, and you without making an analysis diffuse it, being able to be the being's lie that said it. And for pressure when somebody knocks the door and we say: If it is for me say that I am not here, or when they call be telephone Etc. In the retrospection exercises that are carried out at nights when going to bed, in a notebook writes the lies that are said during that day, exercise this daily and propose to diminish the level of lies. Not forget that God represents the truth, to lie is to be in the Creator's opposed side.

Blue Book: *The Path to initiation*

Q: You said that it should not be killed animals, but if they are not killed they won't fit the cows or the pigs in the earth.

A: The nature is beyond the wisdom. It has arithmetical forms of balancing the reproducing power. The dogs, cats, donkeys, horses, toads, vultures, Etc. They don't commonly eat up, and however they don't exist in quantities, there is an entire balance. And it is ms, the animals that the man uses to subsist; some are in way of extinction.

CONCLUSION

It has been time to organize, to live, to intensify, of relocating the principles of the wisdom of God. From the moment of the creation, when the first celestial ray descended to the earth, all started the human soul to live what is his; to cooperate in the spiritual development until the yearned fusion.

If we make a regression in the time, we will find that big initiate as Moses in the Egyptian dynasty; their mission was to guide a people and to take it to the final liberation.

In that time, this great being had the confederational support of the stars most highest, which gave him the keys. Moses who had communication with Jehovah, achieved to unveil the **ARK OF THE ALLIANCE** and with her codes so that the human being when practicing them achieved the likeness that had in the beginning of the creation.

Other messengers also came to the earth, among them Salomon, that great sage that construed the Temple of God like symbol of the physic body, which each human being should build internally, and as it dictates it in the Bible, is constituted by 33 arks in ascendant order . The messengers continue coming to the earth: Daniel, Ezequiel, Elijah. And until the moment in that the great universal blaze sent its son, The Christ embodied in Jesus, as prophet of mystic order.

Blue Book: The Path to initiation

Later to Jesus the Christ and with the wisdom of the four gospels , initiates the foundation of hundred of cultures or Christian churches, which have kept the material robe, and following a historic Christ . But they have forgotten the internal Christ, which is in their development who allows us unveil the secrets of the wisdom that God has for those that love him by heart, the one that the physic view cannot see, neither to hear, since beyond all of the matter.

Of this wisdom have teached Krishna, Paracelsus, Eliphas Levy, Huiracocha, Samael, Etc. These three last carried out agreements with the celestial Law of lifting a select people. Samael on high agreement with Vajratawa **YANG KAREY** contacts to the spiritual regency of Acirfa and with her to the celestial soul **ZIGK GNANAK**, and this postulate in 1989 to continue with this mission of lifting souls and to cooperate to its liberation.

This was like in 1992, in the spring we began this mission in the earth and with the auspice of different theocratic orders we founded the Order Zigk, commanded until our days by the Guru Gnanak. With the unveildment of Ark of the Alliance, we are living those times of Moses. Really, this whole engagement looked like a dream, something supremely impacting for we to understand since of the heavens the messages we receive to the earth without the material human intervention, and it is what has motivated us to continue in this spiritual path.

They have arrived of different parts of Colombia people that feel the impulse evolutionary towards God and we are making a call to all the spiritual different currents, be already Metaphysics, Evangelicals, Harannikos, Buddhists, Witnesses of Jehovah, Adventists, Freemasons, Mormons, Gnostics, Catholics, Taoists.

To all you we tell , the Ark of the alliance is the humanity's spiritual patrimony, therefore, we all have access to her and without social distinction, political, economical or religious, because the important thing is the magnification of your soul. For it is required to be open and to accept the innovations and more if they are of spiritual character.

Allow friend reader this opportunity that the life offers you, and we hope you offers it to your Real Being.
